Part I outlines historical trends in the study and use of color from antiquity to the present, with emphasis on color harmony and color in art. Part II covers the landmark color publications of Goethe, Chevreul, Helmholtz, Kandinsky, etc. Part III includes a bibliography of 100 books on color ranked in order of importance in the study and use of color through time. W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States through his founding role in the NAACP, as well as internationally through the Pan-African movement. Du Bois's sociological and historical research on African-American communities and culture broke ground in many areas, including the history of the post-Civil War Reconstruction period. Du Bois was also a prolific author of novels, autobiographical accounts, innumerable editorials and journalistic pieces, and several works of history. Collected in one volume for the first time, *The World and Africa* and *Color and Democracy* are two of W. E. B. Du Bois's most powerful essays on race. He explores how to tell the story of those left out of recorded history, the evils of colonialism worldwide, and Africa's and African's contributions to, and neglect from, world history. More than six decades after W. E. B. Du Bois wrote *The World and Africa* and *Color and Democracy*, they remain worthy guides for the twenty-first century. With a series introduction by editor Henry Louis Gates, Jr., and two introductions by top African scholars, this edition is essential for anyone interested in world history. The *MINDFULNESS Colouring Book for Adults* is a beautiful and relaxing creative colouring book for all ages! Switch off, unwind, and unleash your inner creativity as you lose yourself in the flow of colouring in these stunning patterns and designs. Each of these beautiful individual designs are printed on a single page with the reverse left blank - so no bleed through, and perfect whether you use pencils, pens or paints. Collect the whole 'Really Relaxing Colouring Book' series, the lovely 'Completely Calming Colouring Books' and 'Colour Me Calm' series or try our unique 'Cool Colouring Books' Collection too! The Woman's Study Bible poignantly reveals the Word of God to women, inviting them to receive God's truth for balance, hope, and transformation. Special features designed to speak to a woman's heart appear throughout the Bible text, revealing Scripture-based insights about how godly womanhood grows from a woman's identity as a Christ-follower and a child of the Kingdom. Now with a beautiful full-color redesign, *The Woman's Study Bible* reflects the contributions of over 80 women from a wide variety of ethnic, denominational, educational, and occupational backgrounds. Since the publication of the first edition of *The Woman's Study Bible* under the editorial guidance of Dorothy Kelley Patterson and Rhonda Harrington Kelley, this landmark study Bible has sold over 1.5 million copies. Features Include: Beautiful full-color design throughout Detailed biographical portraits of over 100 biblical women Thousands of extensive verse-by-verse study notes Over 300 in-text topical articles on relevant issues Insightful essays by women who are recognized experts in the fields of theology, biblical studies, archaeology, and philosophy Book introductions and outlines Hundreds of full-color in-text maps, charts, timelines, and family trees Quoted from godly women throughout history Set of full-page maps of the biblical world Topical index Concordance 10.5-point print size *The NIV Kids' Visual Study Bible*, for ages 8–12, brings the Bible to life in four-color illustrated splendor. This study Bible includes a spectacular full-color interior featuring over 700 illustrations, photos, infographics, and maps on every page that visually represent key Bible information. Each page also features important facts located near the relevant verse. Intriguing facts; colorful, engaging maps; photographs; and illustrations make this a Bible they'll want to explore. Features: Over 700 four-color photographs, illustrations, infographics, and maps throughout Full-color design Book introductions, including important facts and an image to orient the reader One-column format with side bar study notes for ease of reading Presentation page The complete text of the New International Version (NIV) translation of the Bible Incorporate hands-on lab activities that integrate STEAM concepts with 180 days of daily practice! This invaluable resource provides weekly STEAM activities that improve students' critical-thinking skills, and are easy to incorporate into any learning environment. Students will explore STEAM concepts through the inquiry process with hands-on lab activities. Each week introduces a STEAM problem, need, or phenomena that they will address through a guided step-by-step challenge. Aligned to Next Generation Science Standards (NGSS) and state standards, this resource includes digital materials. Provide students with the skills they need to think develop problem-solving skills with this essential resource! *Beijing Opera Costumes: The Visual Communication of Character and Culture* illuminates the links between theatrical attire and social customs and aesthetics of China, covering both the theory and practice of stage dress. Distinguishing attributes include an introduction to the performance style, the delineation of the costume conventions, an analysis of the costumes through their historical precedents and theatrical modifications, and the use of garment shape, color, and embroidery for symbolic effect. Practical information covers dressing the performers and a costume plot, the design and creation of the make-up and hairstyles, and pattern drafts of the major garments. Photographs from live performances, as well as details of embroidery, and close-up photographs of the headdresses thoroughly portray the stunning beauty of this incomparable performance style. Presenting the brilliant colors of the elaborately embroidered silk costumes together with the intricate makeup and glittering headdresses, this volume embodies the elegance of the Beijing opera. *Icons in Time, Persons in Eternity* presents a critical, interdisciplinary examination of contemporary theological and philosophical studies of the Christian image and redefines this within the Orthodox tradition by exploring the ontological and aesthetic implications of Orthodox ascetic and mystical theology. It finds Modernist interest in the aesthetic peculiarity of icons significant, and essential for re-evaluating their relationship to non-representational art. Drawing on classical Greek art criticism, Byzantine ekphrasis and hymnography, and the theologies of St. Maximus the Confessor, St. Symeon the New Theologian and St. Gregory Palamas, the author argues that the ancient Greek concept of *energeia* best conveys the expression of theophany and theosis in art. The qualities that define *energeia* - inherent liveliness, expressive autonomy and self-subsisting form - are identified in exemplary Greek and Russian icons and considered in the context of the hesychastic theology that lies at the heart of Orthodox Christianity. An Orthodox aesthetics is thus outlined that recognizes the transcendent being of art and is open to dialogue with diverse pictorial and iconographic traditions. An examination of Ch'an (Zen) art theory and a comparison of icons with paintings by Wassily Kandinsky, Pablo Picasso, Mark Rothko and Marc Chagall, and by Japanese artists influenced by Zen Buddhism, reveal intriguing points of convergence and difference. The reader will find in these pages reasons to reconcile Modernism with the Christian image and Orthodox tradition with creative form in art. This book brings together two important trends: graph algorithms and high-performance computing. Efficient and scalable execution of graph processing applications in data or network analysis requires innovations at multiple levels: algorithms, associated data structures, their implementation and tuning to a particular hardware. Further, programming languages and the associated compilers play a crucial role when it comes to automating efficient code generation for various architectures. This book discusses the essentials of all these aspects. The book is divided into three parts: programming, languages, and their compilation. The first part examines the manual parallelization of graph algorithms, revealing various parallelization patterns encountered, especially when dealing with graphs. The second part uses these patterns to provide language constructs that allow a graph algorithm to be specified. Programmers can work with these language constructs without worrying about their implementation, which is the focus of the third part. Implementation is handled by a compiler, which can specialize code generation for a backend device. The book also includes suggestive results on different platforms, which illustrate and justify the theory and practice covered. Together, the three parts provide the essential ingredients for creating a high-performance graph application. The book ends with a section on future directions, which offers several pointers to promising topics for future research. This book is intended for new researchers as well as graduate and advanced undergraduate students. Most of the chapters can be read independently by those familiar with the basics of parallel programming and graph algorithms. However, to make the material more accessible, the book includes a brief background on elementary graph algorithms, parallel computing and GPUs. Moreover it presents a case study using Falcon, a domain-specific language for graph algorithms, to illustrate the concepts. Put a veteran mechanic on your bookshelf. From simple 15-minute jobs such as lubing cables and bolting on new air cleaners to more advanced tasks such as cam changes and swapping heads, this how-to guide offers carefully selected projects you can do in a weekend. Color photographs guide you step-by-step through each performance project. Explains why each project should be done and what performance gains you can expect. This book contains a comprehensive treatment of advanced LaTeX features. The focus is on the development of high quality documents and presentations, by revealing powerful insights into the LaTeX language. The well-established advantages of the typesetting system LaTeX are the preparation and publication of platform-independent high-quality documents and automatic numbering and cross-referencing of illustrations or references. These can be extended beyond the typical applications, by creating highly dynamic electronic documents. This is commonly performed in connection with the portable document format (PDF), as well as other programming tools which allow the development of extremely flexible electronic documents. This book constitutes the refereed proceedings of the 14th Latin American Symposium on Theoretical Informatics, LATIN 2020, held in Sao Paulo, Brazil, in January 2021. The 50 full papers presented in this book were carefully reviewed and selected from 136 submissions. The papers are grouped into these topics: approximation algorithms; parameterized algorithms; algorithms and data structures; computational geometry; complexity theory; quantum computing; neural networks and biologically inspired computing; randomization; combinatorics; analytic and enumerative combinatorics; graph theory. Due to the Corona pandemic the event was postponed from May 2020 to January 2021. Marni Lynn Elder has created Volume 2 in the Series of Adult Coloring Books of Victoria, BC Canada. This book is full of different flowers and vegetation from in and around Victoria. Some are even flowers from her own balcony over the years. Living beside the ocean gives Marni Lynn lots of opportunity for taking pictures and changing them into drawings for people to color. Her pictures include flowers, trees, beaches, sea life, ships and historical areas, when out for walks with her dog, Leela. Marni Lynn and Leela, both hope you enjoy this series as much as they have enjoyed exploring their neighborhood, finding the best pictures, for you to color. The four-volume set LNCs 7724--7727 constitutes the thoroughly refereed post-conference proceedings of the 11th Asian Conference on Computer Vision, ACCV 2012, held in Daejeon, Korea, in November 2012. The total of 226 contributions presented in these volumes was carefully reviewed and selected from 869 submissions. The papers are organized in topical sections on object detection, learning and matching; object recognition; feature, representation, and recognition; segmentation, grouping, and classification; image representation; image and video retrieval and medical image analysis; face and gesture analysis and recognition; optical flow and tracking; motion, tracking, and computational photography; video analysis and action recognition; shape reconstruction and optimization; shape from X and photometry; applications of computer vision; low-level vision and applications of computer vision. The Really RELAXING Colouring Book for Adults is a beautiful and relaxing creative colouring book for all ages, and makes the perfect gift for anyone feeling under the weather! The art of colouring is the perfect distraction from feeling ill, and will help them switch off, unwind, and unleash their inner creativity as they get lost in the flow of colouring in these stunning patterns and designs. Each of these beautiful individual designs are printed on a single page with the reverse left blank - so no bleed through, and perfect whether you use pencils, pens or paints. Collect the whole 'Really Relaxing Colouring Book' series, the lovely 'Completely Calming Colouring Books' and 'Colour Me Calm' series or try our unique 'Cool Colouring Books' Collection too! Really RELAXING Colouring Book 1: Playing with Patterns is a beautiful and relaxing creative colouring book for all ages! Switch off, unwind, and unleash your inner creativity as you lose yourself in the flow of colouring in these stunning patterns and designs. Each of these beautiful individual designs are printed on a single page with the reverse left blank - so no bleed through, and perfect whether you use pencils, pens or paints. Collect the whole 'Really Relaxing Colouring Book' series, or try our unique 'Cool Colouring Books' Collection too! The foundation of any archaeometallurgical study is study of excavated assemblages of metals and related remains. This volume presents in detail how the metals and such remains as crucibles excavated from four sites in northeast Thailand have been studied to understand the place of metal objects and technology in the ancient past of this region. In addition to typological examination, hundreds of technical analyses reveal the technological capabilities, preferences, and styles of metal artifact manufacturers in this part of Thailand. Detailed examination of contexts of recovery of metal remains employing a "life history" approach indicates that metal objects in those societies were used primarily in daily life and, only occasionally, as grave goods. The most surprising find is that casting of copper-base artifacts to final form took place at all these village sites during the metal age period, indicating a decentralized final production stage that may prove to be unusual for metal age societies. These insights are made possible by applying the methods and theories introduced in the first volume of the suite of volumes that study the metal remains from Ban Chiang in regional context. Thai Archaeology Monograph Series, 2B; University Museum Monograph, 150 The classic, definitive title on the great Black figures in world history, beginning in antiquity and reaching into the modern age. World's Great Men of Color is the comprehensive guide to the most noteworthy Black personalities in world history and their significance. J.A. Rogers spent the majority of his lifetime pioneering the field of Black studies with his exhaustive research on the major names in Black history whose contributions or even very existence have been glossed over. Well-written and informative, World's Great Men of Color is an enlightening and important historical work. From the burnt-orange bark of the arbutus trees and jewel-green ferns, to the vibrant ochre sea star and the gradated hues of magical sunsets, the colours of British Columbia's coast have long inspired painters, including Yvonne Maximchuk, a versatile artist who is reknowned for her expressive depictions of the land, sea and wildlife. Working from her remote Echo Bay studio, Maximchuk has joined the adult colouring-book craze and created forty original illustrations for colourists to enjoy. Colour the British Columbia Coast is inspired by the infinite material of the West Coast, including floathouses and boats, grizzlies and whales, misty vistas and undersea creatures. Printed on high-quality art paper with perforated pages for easy removal, the book is a receptive foundation for various mediums, from pencil crayons and pastels to felt markers and watercolour paints. Each illustration is accompanied by an in-depth caption describing the scene as well as colouring tips from the artist, making this the perfect keepsake book for anyone looking to unwind and rediscover their creative side--and Coastal BC. "This will be the classic analysis of the legal aspects of the Bush wars. Martin Henn gives--first--a brilliant study of the Bush administration's orders and written opinions. On the other side, he presents the relevant details of the U.S. Constitution and applicable international laws. In this impressive and most careful consideration of all the significant documents on both sides, Under the Color of Law makes clear that the Bush administration was illegal, immoral, and inefficient in its 'war on terror.' Nothing else that I have seen on these matters is more important."---Sidney Winn. University of South Florida and Temple University -- Really RELAXING Colouring Book 9: Gorgeous Geometrics is a beautiful and relaxing creative colouring book for all ages! Switch off, unwind, and unleash your inner creativity as you lose yourself in the flow of colouring in these stunning geometric patterns and designs. Each of these beautiful individual designs are printed on a single page with the reverse left blank - so no bleed through, and perfect whether you use pencils, pens or paints. Collect the whole 'Really Relaxing Colouring Book' series, or try our unique 'Cool Colouring Books' Collection too! This book constitutes the refereed proceedings of the 4th International Conference on Computer Vision/Computer Graphics Collaboration Techniques, MIRAGE 2009, held in Rocquencourt, France, in May 2009. The 41 revised full papers presented were carefully reviewed and selected from a total of 83 submissions. The papers cover a wide range of topics with focus on Computer Vision/Computer Graphics collaboration techniques involving image analysis/synthesis approaches especially concerning theoretical, computational, experimental or industrial aspects of model-based image analysis and image-based model synthesis. Have you ever tried spinning painted top or roving only to be disappointed with the color outcomes in your yarns or finished projects? This book will clearly and artfully walk you through understanding color theory making it less intimidating for both novice and expert spinners alike. Never before has a book presented the same dyed roving worked up into 20+ different approaches accompanied by easy to follow directions so you can see how the techniques look in both a skein and a knitted swatch. Plus there are photos of finished products accompanying the techniques to make envisioning the spinning application even easier. After reading this book you will be inspired to delve into your stash with a new eye and excitement for color in your spinning. In addition to writing books, Alanna also offers workshops both online and in person on spinning and dyeing. You can visit her website [www.alannawilcox.com](http://www.alannawilcox.com) to learn more. Emma FitzGerald's 2015 book *Hand Drawn Halifax* was an immediate hit in Halifax. Emma's appealing sketches of the city's neighbourhoods and her obvious appreciation of the diversity of the city in her notes on her experiences as she drew won her many fans. At events and signings, Emma offered printouts of line drawing versions of a few of the book's illustrations, which were eagerly accepted. Out of that experience comes this book -- a collection of 80 line drawings for colouring book fans, including brand new drawings. There's an opportunity for everyone to produce their own versions of Emma's portraits of Halifax's buildings, places and people. Printed on thick paper selected to prevent bleedthrough, the 80+ illustrations vary in intricacy, giving options to colour-inners of all ages! The quark confinement mechanism is one of the most difficult problems in particle physics, and is listed as the 7 difficult mathematical problems of the new millennium. The first person who first solves this problem will be awarded a prize of US\$ 1 Million by Cray Mathematics Institute. This volume is useful for the systematic understanding of quark confinement and nonperturbative aspects of quantum chromodynamics (QCD) from the wide viewpoints of mathematical physics, lattice QCD physics and quark-hadron physics. It covers the current studies of nonperturbative QCD: quark confinement mechanism; topologies in QCD (instantons, monopoles and vortices); BRS quartet mechanism for color confinement; lattice QCD calculations for quarks, gluons and hadrons; dynamical chiral symmetry breaking and hadrons. Really RELAXING Colouring Book 3: Botanicals in Bloom - A Fun, Floral Colouring Adventure is a beautiful and relaxing creative colouring book for all ages! Switch off, unwind, and unleash your inner creativity as you lose yourself in the flow of colouring in these stunning patterns and designs. Each of these beautiful individual designs are printed on a single page with the reverse left blank - so no bleed through, and perfect whether you use pencils, pens or paints. Collect the whole 'Really Relaxing Colouring Book' series, or try our unique 'Cool Colouring Books' Collection too!

Really RELAXING Colouring Book 2: Colour Me Calm is a beautiful and relaxing creative colouring book for all ages ! Switch off, unwind, and unleash your inner creativity as you lose yourself in the flow of colouring in these stunning patterns and designs. Each of these beautiful individual designs are printed on a single page with the reverse left blank - so no bleed through, and perfect whether you use pencils, pens or paints. Collect the whole 'Really Relaxing Colouring Book' series, or try our unique 'Cool Colouring Books' Collection too! Light Vision Color takes a well-balanced, interdisciplinary approach to our most important sensory system. The book successfully combines basics in vision sciences with recent developments from different areas such as neuroscience, biophysics, sensory psychology and philosophy. Originally published in 1998 this edition has been extensively revised and updated to include new chapters on clinical problems and eye diseases, low vision rehabilitation and the basic molecular biology and genetics of colour vision. Takes a broad interdisciplinary approach combining basics in vision sciences with the most recent developments in the area Includes an extensive list of technical terms and explanations to encourage student understanding Successfully brings together the most important areas of the subject in to one volume We designed this coloring and activity book for your adorable kids from 3- 5 years old The book consists of two main parts, the first for the alphabet from A to Z and the second for the numbers from 1 to 10 The lettering section consists of a large number of coloring pages Each page is devoted to a letter with a beautiful and simple drawing, suitable for children, such as animals, birds, and many other different shapes In the activity pages there are a large number of fun activities such as ? Trace the letter ? Can you find the missing letter? ? Can you find the letter that repeats more than once? ? What is the letter that we all share ? ?Color the picture according to the letters ?Put the correct letter in the square ? A maze And other fun activities In the Numbers section, your curious child will be able to count numbers through coloring pages that contain a number of simple, beautiful shapes designed for coloring. There are many activity pages like ?Trace the number ?Connect the number with the picture on the opposite side ? Can you find the missing number? ? Can you find the number that is repeated more than once? ? Coloring according to the numbers And other wonderful various activities designed specifically to develop your children's mental and motor ability and develop their skills and creativityThis book consists of 120 pages every page is printed on one side of each paper to prevent color bleeding Pages are 8 x 10 inches which is great size for coloring pages and gives your little ones more room to get creative It is a wonderful journey for your child to grow day after day and develop his abilities and talents It is also an amazing journey for parents to see their children in their first steps towards learning
