The role of religion was of paramount importance in the change of attitudes and approaches to health care and charity which took place in the centuries following the Council of Trent. Health Care and Poor Relief in Counter-Reformation Europe, examines the effects of the Counter-Reformation on health care and poor relief in Southern Catholic Europe in the period between 1540 and 1700. As well as a comprehensive introduction discussing issues of the nature of the Catholic or Counter-Reformation and the welfare provisions of the period, Health Care and Poor Relief sets the period in its social, economic, religious and ideological context. The book draws on the practices in different localities in Southern Europe, ranging from the Republic of Venice and the Kingdom of Naples to Germany and Austria. These examples establish how and why a revitalised and strengthened post-Tridentine Catholic church managed to reshape and reinvigorate welfare provisions in Southern Europe. Grubb's comprehensive analysis of his subjects' compelling, if inconspicuous, lives investigates every significant aspect of private experience during the Renaissance: marriage, birth,

death, household relations, work, land, social status, and spirituality. Winner of the Society for Italian Historical Studies's Howard R. Marraro Prize Originally published in 1996. Historical writing on the Renaissance has usually focused on the social extremes that co-existed in the great metropolitan centers—on either elites or the underclass. As a result, the world of the middling families and provincial societies remains largely unexplored. Daily experiences in the lesser cities are, however, no less rich and revealing than those of Florence, Venice, and Milan. In addition, writes historian James Grubb, these experiences offer new perspectives from which to reassess familiar assumptions about domestic life in the fifteenth century. Based on memoirs and other records left by thirteen merchant families from the Veneto cities of Verona and Vincenza, *Provincial Families of the Renaissance* is an engrossing study of daily lives that have until now been overlooked by scholars. Grubb examines the attitudes and experiences of families undistinguished in their modest means and local ambitions from the majority of their compatriots, uncovering a detailed historical landscape rich in social obligations, commercial activities, and religious beliefs. Grubb's comprehensive analysis of his subjects' compelling, if inconspicuous, lives investigates every significant aspect of private experience during the Renaissance: marriage, birth, death, household relations, work, land, social status, and spirituality. In reconstructing provincial life in the Veneto, Grubb discovers in his subjects an independence of mind that mediated their reception of metropolitan ideologies far more than the historiography of the Renaissance might suggest. These "unremarkable" provincials were agents of their own destiny, influenced in equal measures by prevailing attitudes, local customs, and personal convictions. "James Grubb is exploring new terrain in this book. Distinguished by its clarity and eloquence, this is a superior work of historical writing and analysis that merits comparison with the best monographs on the social history of Renaissance

Italy."—Gene Brucker, University of California at Berkeley The raids, therefore, were more than an exotic nuisance, but a key factor in Siena's decision to abandon independence in 1399. Antonio Gramsci used the term 'passive revolution' to describe the limitations and weaknesses of the 19th century bourgeois state in Italy which permitted economic development whilst thwarting social and political progress. This detailed study consists of seven essays each exploring a different theme of the economic and social basis of the Liberal state, providing a broad understanding of the background against the emergence of Italian fascism and present a number of debates and controversies amongst Italian historians. By critical discussion of Gramsci's reading of modern Italian history, the essays present an analysis of the structure and development of social and economic relations in the formation of the Liberal state, illustrating the transition from liberalism to fascism. "An important new book on Chianti Classico: Winners of the André Simon 2013 award for their book *The World of Sicilian Wine*, Nesto and Di Savino have produced the investigative, scholarly and detailed book that Chianti Classico has long deserved. Nesto and Di Savino are brilliant historic investigators. . . . A must-read for anyone seriously interested in wine."—Walter Speller, JancisRobinson.com This book tells the story of the ancient land named Chianti and the modern wine appellation known as Chianti Classico. In 1716, Tuscany's penultimate Medici ruler, Cosimo III, anointed the region of Chianti, along with three smaller areas in the Florentine State, as the world's first legal appellations of origin for wine. In the succeeding centuries, this milestone was all but forgotten. By the late

nineteenth century, the name Chianti, rather than signifying this historic region and its celebrated wine, identified a simple Italian red table wine in a straw-covered flask. In the twenty-first century, Chianti Classico emerged as one of Italy's most dynamic and fashionable wine zones. Chianti Classico relates the fascinating evolution of Chianti as a wine region and reveals its geographic and cultural complexity. Bill Nesto, MW, and Frances Di Savino explore the townships of Chianti Classico and introduce readers to the modern-day winegrowers who are helping to transform the region. The secrets of Sangiovese, the principal vine variety of Chianti, are also revealed as the book unlocks the myths and mysteries of one of Italy's most storied wine regions. The publication of Chianti Classico coincides with the three hundredth anniversary of the Medici decree delimiting the region of Chianti on September 24, 1716. The sixth volume in the Institute of Classical Archaeology's series on the rural countryside (chora) of Metaponto is a study of the Greek settlement at Sant'Angelo Vecchio. Located on a slope overlooking the Basento River, the site illustrates the extraordinary variety of settlements and uses of the territory from prehistory through the current day. Excavators brought to light a Late Archaic farmhouse, evidence of a sanctuary near a spring, and a cluster of eight burials of the mid-fifth century BC, but the most impressive remains belong to a production area with kilns. Active in the Hellenistic, Late Republican, and Early Imperial periods, these kilns illuminate important and lesser-known features of production in the chora of a Greek city and also chronicle the occupation of the territory in these periods. The thorough, diachronic presentation of the evidence from Sant'Angelo Vecchio is complemented by specialist studies on the environment, landscape, and artifacts, which date from prehistory to the post-medieval period. Significantly, the evidence spans the range of Greek site types (farmhouse, necropolis, sanctuary, and production center) as well as the Greek dates (from the Archaic to Early Imperial periods) highlighted during ICA's survey of the Metapontine chora. In this regard, Chora 6 enhances the four volumes of *The Chora of Metaponto 3: Archaeological Field Survey—Bradano to Basento* and provides further insight into how sites in the chora interacted throughout its history. This descriptive catalogue of the western manuscripts dating to 1800 housed in the libraries of the University of Pennsylvania was begun in 1960 and was printed in six issues of *The Library Chronicle*. Actual use of the catalogue led to the revision of some of the entries, additions, and corrections which are incorporated in the present volume. One hundred and seventeen manuscripts are described here for the first time. The manuscripts are described in the order in which they were placed on the shelves, a common but not a logical arrangement. The compilers, therefore, have prepared an extensive index listing title entries; names of authors, scribes, and owners; persons referred to in the text; names of places and countries, as well as other entries deemed useful. The catalogue includes the manuscripts of the Rare Book Collection, Henry C. Lea Library, Edgar F. Smith Collection, and the Veterinary Library. Greatly facilitating access to the resources of the University Libraries, the catalogue also provides an intriguing description of bibliographical riches. This 1989 book is a detailed study of the social

origins of the fascist reaction in Tuscany, which played a key role in the rise of Italian fascism to power. Tuscan fascism was second to none in its violence, organisational strength, intransigence and missionary zeal. The central question is who supported fascism, and why. To what extent did Tuscany, a major agricultural region, conform to national patterns? What are the implications of the pattern of support for fascism in Tuscany for the wider interpretation of the movement? Dr Snowden offers a thematic approach, discussing in turn agrarian fascism, industrial and urban activity, and relations between the black-shirts and state officials. Thus the significance of the fascist militancy of particular social groups and classes can be assessed for the period between the mass strikes in 1919 and the end of labour militancy marked by the beginning of the fascist dictatorship. The nEU-Med project is part of the Horizon 2020 programme, in the ERC Advanced project category. It began in October 2015 and the University of Siena is the host institution of the project. The project is focussed upon two Tuscan riverine corridors leading from the Gulf of Follonica in the Tyrrhenian Sea to the Colline Metallifere. It aims to document and analyze the form and timeframe of economic growth in this part of the Mediterranean, which took place between the 7th and the 12thc. Central to this is an understanding of the processes of change in human settlements, in the natural and farming landscapes in relation to the exploitation of resources, and in the implementation of differing political strategies. This volume presents the multi-disciplinary research focussed upon the key site of the project, Vetricella, and its territory. Vetricella is thought to be the site of Valli, a royal property in the Tuscan march. It is the only Early Medieval property to be extensively studied in Italy. Located on Italy's Tyrrhenian coast, the archaeology and history of this site provide new insights on estate management, metal production and wider Mediterranean relations in the later first millennium. Apart from reports on the archaeology, the finds from excavations and

environmental studies, three essays consider the wider European historical and archaeological context of Vetricella. Future monographs will feature studies by members of the project team on aspects of Vetricella, its finds and territory. In the years since the publication of the Prison Notebooks, the interest and importance of Antonio Gramsci's contribution to Marxist thought and political analysis has become widely recognised. The concern to explore and identify the structures of the capitalist state is both the principal characteristic of Gramsci's theoretical and political writings and also the inspiration for his writings on Italian history. This set re-issues four volumes by leading commentators on Gramsci's politics and philosophy which were originally published between 1979 and 1981. Selected by Choice Magazine as an Outstanding Academic Title Originally published in 1988. In the decades after 1404, traditionally maritime Venice extended its control over much of northern Italy. Citizens of Vicenza, the first city to come under Venetian rule, proclaimed their city "firstborn of Venice" and a model for the Venetian Republic's dominions on the terraferma. In *Firstborn of Venice* James Grubb tests commonplace attributes of the Renaissance state through a rich case study of society and politics in fifteenth-century Vicenza. Looking at relations between Venetian and local governments and at the location of power in Vicentine society, Grubb reveals the structural limitations of Venetian authority and the mechanisms by which local patricians deflected the claims of the capital. *Firstborn of Venice* explores issues that are political in the broadest sense: legal institutions and administrative practices, fiscal politics, the consolidation of elites, ecclesiastical management, and the contrasting governing ideologies of ruler and subjects.
