Long-term care in the United States has taken the nursing home as its benchmark, but the monetary, social, and psychological costs of nursing home care are all too high. This book challenges the current dominance of nursing homes as the principal institution of long-term care. It offers a series of alternative models where both services and housing can be provided in a way that allows long-term consumers to enjoy dignified, "normal" lifestyles. It addresses the political and economic consequences of making this decision. The authors start with the premise that long-term care is designed to assist people who lack the capacity to function fully independently. They argue that no disabled person of any age should be required to forsake his/her humanity in exchange for care. The book rejects the artificial dichotomy between social and medical care, asserting that both play important roles in psychological and physical well-being of long-term care patients. The authors consider the need for competent and compassionate medicine and discuss the methods for improving both its coordination of care and its effectiveness. The book redefines the meaning of safety and protection in long-term care, and how this goal can be accomplished without sacrificing quality of living. As the new millennium and the aging of baby boomers approaches, more creative approaches to providing better long-term care are required. This volume outlines a useful framework for the provision of effective and humane community-based programs that are both feasible and affordable. It will be an invaluable guide for geriatricians, public health professionals, family physicians, nurses and others who care for elderly patients. Films of Alan Ladd. This unique and ground-breaking book is the result of 15 years research and syntheses over 800 meta-analyses on the influences on achievement in school-aged students. It builds a story about the power of teachers, feedback, and a model of learning and understanding. The research involves many millions of students and represents the largest ever evidence based research into what actually works in schools to improve learning. Areas covered include the influence of the student, home, school, curricula, teacher, and teaching strategies. A model of teaching and learning is developed based on the notion of visible teaching and visible learning. A major message is that what works best for students is similar to what works best for teachers – an attention to setting challenging learning intentions, being clear about what success means, and an attention to learning strategies for developing conceptual understanding about what teachers and students know and understand. Although the current evidence based fad has turned into a debate about test scores, this book is about using evidence to build and defend a model of teaching and learning. A major contribution is a fascinating benchmark/dashboard for comparing many innovations in teaching and schools. Many evangelical readers who have learned the basics of eschatology from popular authors and more recently from novelists assume that dispensational premillennialism, with its distinctive teachings about the pretribulation rapture of the church, is the only reliable view of the end times and the return of Christ. This volume, however, offers a compelling case for an alternative perspective—one that was widely prevalent throughout church history. The contributors, all respected scholars in their respective fields, suggest that classic premillennialism offers believers a more coherent and viable approach to understanding eschatology. Their studies, which examine eschatology from biblical, theological, historical, and missiological approaches, provide a broadly accessible argument for returning to the perspectives of historic premillennial eschatology. "[The book] is intended to meet the need for a text to accompany an Advanced Placement French Language course, to supplement courses on similar levels, and to serve as independent preparation for the Advanced Placement Examination in French Language. The overall goal of the course ... is to prepare students to perform at a high level of proficiency in the four basic language skills: listening, speaking, reading, and writing." (introduction) This book is an interactive workbook where clients, students, and everyday people can understand and find step by step solutions for regulating of their emotions. Each chapter allows the reader to find out for themselves how they would personally regulate emotions ranging from anger, resentment and jealousy to other emotions such as depression, anxiety and self-hatred. Twelve different emotions are covered in the workbook giving the reader those emotions most commonly needing regulation in everyday living. The workbook takes a holistic approach where not only one's behavior or feelings are considered. Behavior, thoughts, feelings, beliefs, identity and the emotional climate where emotions are experienced, make up this well-rounded approach to understanding emotional regulation in your personal life. The workbook also includes strategies for professional counselors to successfully deal with client emotions, with the goal of helping to improve the client/counselor relationship. This is the perfect book for one on one conversation or used in groups for a more interactive approach to emotional regulation. Earthen levees are extensively used to protect the population and infrastructure from periodic floods and high water due to storm surges. The causes of failure of levees include overtopping, surface erosion, internal erosion, and slope instability. Overtopping may occur during periods of flooding due to insufficient freeboard. The most problematic situation involves the levee being overtopped by both surge and waves when the surge level exceeds the levee crest elevation with accompanying wave overtopping. Overtopping of levees produces fast-flowing, turbulent water velocities on the landward-side slope that can potentially damage the protective grass covering and expose the underlying soil to erosion. If overtopping continues long enough, the erosion may eventually result in loss of levee crest elevation and possibly breaching of the protective structure. Hence, protecting levees from erosion by surge overflow and wave overtopping is necessary to assure a viable and safe levee system. This book presents a cutting-edge approach to understanding overtopping hydraulics under negative free board of earthen levees, and to the study of levee reinforcing methods. Combining soil erosion test, full-scale laboratory overtopping hydraulics test, and numerical modeling for the turbulent overtopping hydraulics. It provides an analysis that integrates the mechanical and hydraulic processes governing levee overtopping occurrences and engineering approaches to reinforce overtopped levees. Topics covered: surge overflow, wave overtopping and their combination, full-scale hydraulic tests, erosion tests, overtopping hydraulics, overtopping discharge, and turbulent analysis. This is an invaluable resource for graduate students and researchers working on levee design, water resource engineering, hydraulic engineering, and coastal engineering, and for professionals in the field of civil and environmental engineering, and natural hazard analysis. How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of The Adult Learner has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of The Adult Learner will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without. Fifty years after James Bruce brought a copy of the Book of Enoch, found in Ethiopia, to England, Richard Laurence made a first modern translation. Later, R.H. Charles made another translation using some Greek excerpts, and more Ethiopian texts. Then recently, Michael A Knibb, using many texts, and partial texts, put together an 'adequate' translation. Yet, all of these translations are rough, obscure, and confusing to Christians of today. The Dead Sea Scrolls contained many copies and partial copies of the Book of Enoch, In the Dead Sea scrolls, there were found 17 copies. Comparatively, there were 30 copies of Psalms, 25 copies of Deuteronomy, 19 of Isaiah, 15 of Genesis and Exodus, 14 Of Jubilees. Jude validated The Book Of Enoch with his quote from it. Using all of the sources now available, along with an in-depth study of book, I have prepared this paraphrase/translation. Along with such, I have included an commentary to help in its comparison with the Bible. John D. Ladd was raised the son of an Assemblies of God pastor. He attended Northeast Bible College, in Pennsylvania, and later, Malone College, in Canton, Ohio. He pastored for many years, was ordained in the Assemblies of God, but later left to pastor independent churches. Preferring teaching to preaching, he has spent many years studying, reading books from the early church period, and translating/paraphrasing them for ease of use by Christians of today. This book of Enoch's has been translated, paraphrased, and now is being given commentary, to compare it with the Bible's message, to test it by the Word of God. How does it compare? Is it in agreement with the message and prophetic teachings of the Bible? "Elusive Equity" chronicles South Africa's efforts to fashion a racially equitable state education system from the ashes of apartheid. Edward Fiske and Helen Ladd draw on previously unpublished data, interviews with key officials, and visits to dozens of schools to describe the changes made in school finance, teacher assignment policies, governance, curriculum, higher education, and other areas. Today's busy woman finds herself being pulled in many different directions. Based on the book, The Frazzled Factor, authors Karol Ladd and Jane Jarrell offer seven simple steps designed to take the frazzled mom from feelings of guilt to the freedom of grace. A guide to establishing high-quality social and emotional education programs describes approaches to social and emotional learning for all levels and includes thirty-nine guidelines and field-inspired examples for classrooms, schools, and districts. Always study with the most up-to-date prep! Look for AP French Language and Culture Premium, ISBN 9781506283937, on sale July 5, 2022. Publisher's Note: Products purchased from third-party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entities included with the product. Read Along or Enhanced eBook: In 1959 the Boston Red Sox was the last team in the Major Leagues to integrate. But when they call Elijah "Pumpsie" Green up from the minors, Bernard is overjoyed to see a black player on his beloved home team. And, when Pumpsie's first home game is scheduled, Bernard and his family head to Fenway Park. Bernard is proud of Pumpsie and hopeful that this historic event is the start of great change in America. This fictionalized account captures the true story of baseball player Pumpsie Green's rise to the major leagues. The story is a snapshot of the Civil Rights Movement and a great discussion starter about the state of race relations in the United States today. From the Hardcover edition. Fighter pilots! Images of Baron Manfred von Richthofen and Eddie Rickenbacker in the Great War, Johnnie Johnson, Robert Stanford Tuck and Richard Bong in the Second World War, or Robin Olds in Vietnam, all spring to mind. Volumes have been written about them, past and present. Understandably, most of these revolve around the skill, cunning and bravery that characterizes this distinctive band of brothers, but there are other dimensions to those who take to the skies to do battle that have not been given the emphasis they deserve – until now. You do not have to be an aviation aficionado to enjoy Colonel Steve Ladd's fascinating personal tale, woven around his 28-year career as a fighter pilot. This extremely engaging account follows a young man from basic pilot training to senior command through the narratives that define a unique ethos. From the United States to Southeast Asia; Europe to the Middle East; linking the amusing and tongue-in-cheek to the deadly serious and poignant, this is the lifelong journey of a fighter pilot. The anecdotes provided are absorbing, providing an insight into life as an Air Force pilot, but, in this book, as Colonel Ladd stresses, the focus is not on fireworks or stirring tales of derring-do. Instead, this is an articulate and absorbing account of what life is really like among a rare breed of arrogant, cocky, boisterous and fun-loving young men who readily transform into steely professionals at the controls of a fighter aircraft. From F-4 Phantom to A-10 Warthog is a terrific read: the legacy of a fighter pilot. Faithful Warriors is a memoir of World War II in the Pacific by a combat veteran of the 8th Marine Regiment, 2nd Marine Division. Written with award-winning author Steven Weingartner, Col. Ladd's book recounts his experiences as a junior officer in some of the fiercest fighting of the war, during the amphibious invasions of Guadalcanal, Tarawa, Saipan, and Tinian. Ladd's recollections and descriptions of life - and death- on the far-flung battlefronts of the Pacific War are vividly rendered, and augmented by the personal recollections of many of the men who served with and under him in his wartime journey across the Pacific. This vividly written memoir will stir the memories of those who lived during these trying times and will help future generations of readers to understand the realities of the Pacific War. Long-term care in the United States has taken the nursing home as its benchmark, but the monetary, social, and psychological costs of nursing home care are all too high. This book challenges the current dominance of nursing homes as the principal institution of long-term care. It offers a series of alternative models where both services and housing can be provided in a way that allows long-term consumers to enjoy dignified, "normal" lifestyles. It addresses the political and economic consequences of making this decision. The authors start with the premise that long-term care is designed to assist people who lack the capacity to function fully independently. They argue that no disabled person of any age should be required to forsake his/her humanity in exchange for care. The book rejects the artificial dichotomy between social and medical care, asserting that both play important roles in psychological and physical well-being of long-term care patients. The authors consider the need for competent and compassionate medicine and discuss the methods for improving both its coordination of care and its effectiveness. The book redefines the meaning of safety and protection in long-term care, and how this goal can be accomplished without sacrificing quality of living. As the new millennium and the aging of baby boomers approaches, more creative approaches to providing better long-term care are required. This volume outlines a useful framework for the provision of effective and humane community-based programs that are both feasible and affordable. It will be an invaluable guide for geriatricians, public health professionals, family physicians, nurses and others who care for elderly patients. A collection of stories with characters from Mississippi towns called Meridian, Poplarville, and Tupelo, that end up in cities and never cease to cherish a Porsche 911 GT2 or a cold bottle of Orange Crush with equal relish. In 1989 New Zealand embarked on what is arguably the most thorough and dramatic transformation of a compulsory state education system ever undertaken by an industrialized country. Under a plan known as Tomorrow's Schools this island nation of 3.8 million people abolished its national Department of Education and turned control of its nearly 2,700 primary and secondary schools over to locally elected boards of trustees. Virtually overnight, one of the world's most tightly controlled public education systems became one of the most decentralized. Two years later, in 1991, with a new government in power, New Zealand enacted further reforms that introduced full parental choice of schools and encouraged the development of a competitive culture in the state education system. Debate rages in the United States about whether similar reforms would improve the performance of the country's troubled public school system. Judgments about the potential benefits of these ideas, as well as the general relevance of economic models to educational systems, tap into deeply held values, and discussion in the U.S. has been hampered by the lack of practical experience with them. The extended and widespread experiences of New Zealand, whose school system functions much like our own, provide U.S. policy makers with a wide range of appropriate insights and implications to consider as they gauge the merits of bold education reform. When Schools Compete is the first book to provide detailed quantitative and qualitative analysis of the New Zealand experiment. Combining the perceptive observations of a prominent education journalist and the analytical skills of an academic policy analyst, this book will help supporters and critics of market-based education reforms better anticipate the potential long-term consequences of applying ideas of market competition to the delivery of education. This book examines ways of conserving, managing, and interacting with plant and animal resources by Native American cultural groups of the Pacific Coast of North America, from Alaska to California. These practices helped them maintain and restore ecological balance for thousands of years. Building upon the authors' and others' previous works, the book brings in perspectives from ethnography and marine evolutionary ecology. The core of the book consists of Native American testimony: myths, tales, speeches, and other texts, which are treated from an ecological viewpoint. The focus on animals and in-depth research on stories, especially early recordings of texts, set this book apart. The book is divided into two parts, covering the Northwest Coast, and California. It then follows the division in lifestyle between groups dependent largely on fish and largely on seed crops. It discusses how the survival of these cultures functions in the contemporary world, as First Nations demand recognition and restoration of their ancestral rights and resource management practices. This work covers 840 intentional suicide cases initially reported in Daily Variety (the entertainment industry's trade journal), but also drawing attention from mainstream news media. These cases are taken from the ranks of vaudeville, film, theatre, dance, music, literature (writers with direct connections to film), and other allied fields in the entertainment industry from 1905 through 2000. Accidentally self-inflicted deaths are omitted, except for a few controversial cases. It includes the suicides of well-known personalities such as actress Peg Entwistle, who is the only person to ever commit suicide by jumping from the top of the Hollywood Sign, Marilyn Monroe and Dorothy Dandridge, who are believed to have overdosed on drugs, and Richard Farnsworth and Brian Keith, who shot themselves to end the misery of terminal cancer. Also mentioned, but in less detail, are the suicides of unknown and lesser-known members of the entertainment industry. Arranged alphabetically, each entry covers the person's personal and professional background, method of suicide, and, in some instances, includes actual statements taken from the suicide note. Everywhere the church is rediscovering Jesus' call to live under God's rule. What the world needs, however, is not just greater kingdom awareness but more kingdom action. How can the church stabilize families, revitalize, neighborhoods, create just societies and a peaceful world? How can we hasten the day when the kingdoms of this world will become the kingdom of our Lord? "Earthen levees are extensively used to protect the population and infrastructure from periodic floods and high water due to storm surges. The causes of failure of levees include overtopping, surface erosion, internal erosion, and slope instability. Overtopping may occur during periods of flooding due to insufficient freeboard. The most problematic situation involves the levee being overtopped by both surge and waves when the surge level exceeds the levee crest elevation with accompanying wave overtopping. Overtopping of levees produces fast-flowing, turbulent water velocities on the landward-side slope that can potentially damage the protective grass covering and expose the underlying soil to erosion. If overtopping continues long enough, the erosion may eventually result in loss of levee crest elevation and possibly breaching of the protective structure. Hence, protecting levees from erosion by surge overflow and wave overtopping is necessary to assure a viable and safe levee system. This book presents a cutting-edge approach to understanding overtopping hydraulics under negative free board of earthen levees, and to the study of levee reinforcing methods. Combining soil erosion test, full-scale laboratory overtopping hydraulics test, and numerical modeling for the turbulent overtopping hydraulics, it provides an analysis that integrates the mechanical and hydraulic processes governing levee overtopping occurrences and engineering approaches to reinforce overtopped levees. Topics covered surge overflow, wave overtopping and their combination, full-scale hydraulic tests, erosion tests, overtopping hydraulics, overtopping discharge, and turbulent analysis. This is an invaluable resource for graduate students and researchers working on levee design, water resource engineering, hydraulic engineering, and coastal engineering, and for professionals in the field of civil and environmental engineering, and natural hazard analysis"-- Meet Barry Ladd. He is a family physician who practiced medicine for thirty years in a small country town, forty miles south of a major city. He calls it "Our Town," because the residents, including himself, so personally identified with the community. In the thirty years that Ladd practiced in "Our Town," he delivered fifteen hundred babies and had one hundred and eighty thousand office visits. He delivered the babies of the babies, and took care of four generations in the same family. During that time, there was an explosion of technology and scientific information. The practice of medicine shifted from being more of an art to being more of a science. During this time, Ladd was a participant and observer. He saw how personal events and decisions played out over time. He tells his readers what he saw, heard, and felt. These are all true stories. Some are composites of several people. The names have been changed. In this widely praised exposition of Revelation, George Eldon Ladd treats the Apocalypse as a true prophecy--one that reflects the situation of the church when the book was written as well as the situation the church will face at the time of the consummation of God's redemptive plan. This edition contains 220 pages of exercises developed to meet the general objectives of an advanced French language course, as well as to help students prepare for the Educational Testing Service's Advanced Placement French Language Examination, including the latest changes in the speaking section. Nine units cover specific skills in four basic areas emphasized by the AP course--listening, speaking, reading, and writing. Although this text is geared primarily to the AP course, this is a fine complementary text for any advanced course in French. Audio contain the listening sections that accompany the student book of AP French: Preparing for the Language Examination 2/e and is available on CD or Cassettes. Not compatible with the First Edition.
