What justifications exist for jurisdictions to maintain statutes that favour 'priority' creditors over other creditors and contributories? This book examines preferential debts

derived from specific legislative provisions applying to corporate insolvency. In exploring the concept of preferential treatment, Statutory Priorities in Corporate Insolvency Law includes chapters that provide a doctrinal, theoretical and historical analysis of who enjoys preferred creditor status. As well as examining the traditional major categories of priorities, this work also identifies potential new categories for priority status such as environmental clean-up costs, international creditors, tort claimants and consumers among

other non-consensual creditors. While the study focuses on Australian corporate insolvency law, where appropriate, comparisons are made with other common law jurisdictions, particularly the UK, Canada, New Zealand and the US. Do your students struggle to engage with legal topics? Look no further than Marson & Ferris' Business Law to help them actively engage with the law, understand it, and approach it with confidence. Written with business, management, and finance and accounting students in mind, the authors put the law into a

context that they can easily understand by introducing case studies in every chapter. 'Business Scenarios' help the students contextualize the law by presenting the reader with an example of an everyday problem which demonstrates how the law can affect a company, employer, employee, or other individual. Throughout each chapter the students are asked to pause and consider how the content applies to these routine business problems, enabling them to become active readers and think independently about how the law operates. The first chapter provides a

helpful guide to studying the law and advice on how to excel in assessments so that students can fulfil their potential. This chapter includes a sample problem question and model answer. Further sample problem and essay questions can be found at the end of chapters, giving readers an opportunity to test their understanding and practise for assessments. Students will be able to find indicative answers to these questions hosted with the online resources for this book. At the end of each chapter the authors provide further reading suggestions to guide students that want to deepen their knowledge,

including well-maintained and trusted websites, Twitter feeds, and YouTube channels in addition to suitable books and articles. Online resources This book is accompanied by a suite of online resources to support students' learning, including flashcard cases, self-test questions and answers with feedback, and additional material on legislation. In recent years the library community has seen a renewed interest in library architecture and design. This is due to the change of focus from content and collection development to how libraries engage with their users in a digital age. This means that

librarians, architects, politicians and patrons must develop new visions, concepts and ideas for the design and building of libraries. This book brings together a number of articles based on presentations from the IFLA World Congress 2009: historical view of the development of children's libraries over the last century, a look at how children use new media, libraries of the future, innovative design projects for children's libraries from around the world. current theme historical view and new projects "The use of solitary confinement in prisons became

common with the rise of the modern penitentiary during the first half of the nineteenth century and his since remained a feature of many prison systems all over the world. Solitary confinement is used for a panoply of different reasons although research tells us that these practices have widespread negative health effects. Besides the death penalty, it is arguably the most punitive and dangerous intervention available to state authorities in democratic nations. Nevertheless, in the United States there are currently an estimated 80,000 to 100,000 prisoners in small cells for more than 22 hours

per day with little or no social contact and no physical contact visits with family or friends. Even in Scandinavia, thousands of prisoners are placed in solitary confinement every year and with an alarming frequency. These facts have spawned international interest in this topic and a growing international reform movement, which includes researchers, litigators, and human rights defenders as well as prison staff and prisoners. This book is the first to take a broad international comparative approach and to apply an interdisciplinary

lens to this subject. In this volume neuroscientists, high-level prison officials, social and political scientists, medical doctors, lawyers, and former prisoners and their families from different countries will address the effects and practices of prolonged solitary confinement and the movement for its reform and abolition"-- This volume collects notable writings of Barnabas A. Samatta, Chief Justice of Tanzania from 2000 to his retirement in 2007, together with writings by others that document his career and show the judgment of his peers about his work on the Court of Appeal of

Tanzania. The writings include Samatta's thoughts on Tanzania's constitutional order and the importance of the rule of law, as well as a number of key rulings and judgments. Annotation ©2011 Book News, Inc., Portland, OR (booknews.com). Australian Business Law was previously published by CCH Australia. This latest volume in this important international series discusses practical errors and wrongdoing considered under the action theory (praxiological) umbrella, linking these to ethical

behavior. Human actions related to the conduct of business should be effective and efficient. But such praxiological criteria are of secondary importance to norms that should also be taken into account. The primary norm is ethical behavior, which defines the morality of business activities on the basis of the good; these are the presupposed foundations for the human actions in business. The articles in this volume discuss whistleblowing, or the exposure of behavior that violates the ethical foundations of business. They are written from different angles and

present a variety of experiences, adding new value to both the subject of praxiology as well as ethics as it relates to economic activity in its social and global context. The issues, problems, and questions raised by this international group of eminent scholars have much to add to the contemporary debate induced by the present economic crises. These crises have revealed practical errors and hypocrisy of those responsible for leadership and management, primarily of financial institutions. This new edition of Business Law has been thoroughly updated and

expanded to provide a clear and comprehensive treatment of the key aspects of business law. Includes a clear and concise discussion of key topic areas, points of law illustrated by case examples, references to legislation and links to relevant government and statutory body websites. In October 1993, Robert Latimer, a Saskatchewan farmer, decided to end the life of his chronically ill daughter rather than subject her to another painful surgery. Tracy, who had the mental capacity of a five-month-old infant, was twelve at the time of her death. She had already

endured multiple operations to correct conditions caused by her severe cerebral palsy. Tracy's death and the charge of murder laid against Robert Latimer set in motion Canada's most famous and controversial case of "mercy killing." The case sparked a national debate about euthanasia and the rights of the severely disabled that continues today. Author Gary Bauslaugh takes us back to the beginning of this case, describes its explosion on the national scene during two highly publicized trials, and looks at later conflicts surrounding Latimer's parole hearing. In clear,

insightful prose, Bauslaugh discusses the conflicting views of Latimer's sympathizers and detractors in chapters that explore the ethical dilemmas as well as the legal issues that this case has raised. As a reporter who has followed the case from its beginnings and interviewed Latimer multiple times during his imprisonment and subsequent parole, Bauslaugh's intimate knowledge of the personalities and facts of this difficult case allow him to write a revealing and informed book. Seminar paper from the year 2012 in the subject Law - Comparative Legal Systems, Comparative Law, grade: 1,0, Anglia Ruskin University (Lord Ashroft International Business School), course: Comparative Business Law, language: English,

abstract: In this paper Germany and the United Kingdom are comparatively analysed. The focus is on breach of duty as a part of negligence whose other aspects will be shortly illustrated as well. The aim of the paper is to show the differences between common law and civil law states by comparing a case that deals with the chosen aspect. The case that will be analysed deals with an accident in a wall climbing centre. It will be discussed if the centre acted negligent for omitted instructions to the customer. It will become clear that even though contributory action of the customer is considered the club

still breached its duty to take reasonable care. Moreover the English case will be applied under the German procedure. Again, the club will be held liable for breaching its duty of care. Based on the analysis of the case under both legal systems the similarities and differences will be explained. Far-reaching and detailed, Card & James' Business Law is the definitive guide to the subject. Roach encourages students to understand the basics and challenges them to push their grasp of the legal principles further. Accompanied by an abundance of learning features

and a suite of online resources designed to hone critical assessment skills. Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law covering merchants' status and obligations - including the laws governing state intervention in economic activities - in Australia provides quick and easy guidance on such commercial and economic matters as business assets, negotiable instruments, commercial securities, and regulation of the conditions of commercial transactions. Lawyers who handle

transnational business will appreciate the explanation of local variations in terminology and the distinctive concepts that determine practice and procedure. Starting with a general description of the specifically applicable concepts and sources of commercial law, the book goes on to discuss such factors as obligations of economic operators and institutions, goodwill, broker/client relations, commercial property rights, and bankruptcy. Discussion of economic law covers the laws governing establishment, supervision of economic activities,

competition law, and government taxation incentives. These details are presented in such a way that readers who are unfamiliar with specific terms and concepts in varying contexts will fully grasp their meaning and significance. Thorough yet practical, this convenient volume is a valuable tool for business executives and their legal counsel with international interests. Lawyers representing parties with interests in Australia will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative commercial and

economic law. This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. Whether you're new to higher education, coming to legal study for the first

time or just wondering what Business Law is all about, *Beginning Business Law* is the ideal introduction to help you hit the ground running. Starting with the basics and an overview of each topic, it will help you come to terms with the structure, themes and issues of the subject so that you can begin your Business Law module with confidence. Adopting a clear and simple approach with legal vocabulary explained in a detailed glossary, Chris Monaghan breaks the subject of Business Law down using practical everyday examples to make it understandable for anyone, whatever

their background. Diagrams and flowcharts simplify complex issues, important cases are identified and explained and on-the-spot questions help you recognise potential issues or debates within the law so that you can contribute in classes with confidence. *Beginning Business Law* is an ideal first introduction to the subject for LLB, GDL or ILEX and especially international students, those enrolled on distance learning courses or on other degree programmes. Though it remains impossible to conjure a definitive image that captures the breadth of this highly nuanced term, today at least we are able to consider an array of visual representations that have been put into circulation by lesbians themselves

over the last six or seven decades. In the early twentieth century, though, no notion of lesbianism as a coherent social or cultural identity yet existed. In *Women Together/Women Apart*, Tirza True Latimer explores the revolutionary period between World War I and World War II when lesbian artists working in Paris began to shape the first visual models that gave lesbians a collective sense of identity and allowed them to recognize each other. Flocking to Paris from around the world, artists and performers such as Romaine Brooks, Claude Cahun, Marcel Moore, and Suzy Solidor used

portraiture to theorize and visualize a "new breed" of feminine subject. The book focuses on problems of feminine and lesbian self-representation at a time and place where the rights of women to political, professional, economic, domestic, and sexual autonomy had yet to be acknowledged by the law. Under such circumstances, same-sex solidarity and relative independence from men held important political implications. Combining gender theory with visual, cultural, and historical analysis, Latimer draws a vivid picture of the impact of sexual

politics on the cultural life of Paris during this key period. The book also illuminates the far-reaching consequences of lesbian portraiture on contemporary constructions of lesbian identity. Provides a clear and concise guide to the key elements of management law. The books in the Cavendish "Essential" series are intended as a helpful revision aid for the law student, primarily at undergraduate level, but they should be helpful to any student studying law as

part of a course. Australian Business Law is a must-have for law and business students, practitioners and those interested in contemporary business law. It discusses the main areas of law affecting business and includes case examples, references to legislation, links to the main government (and other) websites and flow charts and diagrams to support explanations. The text has been reviewed and updated to improve readability and to reflect changes to the law, including those made by the Civil Liability Acts, Australian Consumer Law, Competition and Consumer Act,

National Credit Code and the Personal Property Securities Act. This 2016 edition contains valuable expanded commentary on: The Civil Liability Acts Competition and Consumer Law Obligations of the banking and finance sector Intellectual property The Amendments to the Insurance Contracts Act Areas of business law discussed include, torts, contracts, property, sale of goods, business finance and insurance in Hong Kong, Malaysia and Singapore with reference to case law. The law is stated as of 1 January 1991. In January 1889, as London constables

hunted for Jack the Ripper and theaters around the world presented theatrical renditions of the Jekyll and Hyde story, Jackson, Michigan, Police Captain Jack Boyle searched for the murderer of Mary Latimer. This book follows Captain Boyle to the bordellos of gaslight-era Detroit--populated by madams, pimps, prostitutes and gamblers. It describes the investigation that led him to a pharmacist that prowled the streets, akin to a real-life Jekyll and Hyde. Ultimately, the book delves into the mind of Robert Irving Latimer, known as the most dangerous prisoner

in Michigan and the man who inspired talk about resurrecting the state's long-dead death penalty. John Livermore's succinct monograph provides a useful overview of Australian transport law, as of July 2017...This is a readable and useful publication which provides a good summary of Australian transport law. Simon Baughen, Professor of Shipping Law, Swansea University /Artho Cyraith Llongau Extract from full review of the 3rd edition in Journal of International Maritime Law, January 2020 This updated edition of Transport Law in Australia describes

the main sources of transport law, jurisdiction and courts, state immunity, and the legal role of transport intermediaries. The scope of the book is broad in that it encompasses maritime, road, rail, air, and multimodal transport law. Almost half the book is devoted to maritime and shipping law which, for an island nation with over 95% of its international trade carried by sea, is as important as it is unsurprising. Whilst works of this nature have the potential to be a 'dry' read, in this case the author has taken an approach which makes the book eminently readable and usable. The text is

well supported by in-depth research and enhanced with comprehensive referencing, footnotes, tables of cases and statutes, as well as a selected bibliography. With Australian society and the economy vitally dependent on all modes of transport this book will be a valuable addition for many in the transport community. This includes transport operators, shippers and freight forwarders, transport regulators and lawyers, as well as academics, researchers and students engaged in the study of transport. The author's practical and masterful approach to the

subject should go a long way to ensuring the success of Transport Law in Australia as well as being a valuable addition to the body of literature on this important topic. Barrie Lewarn, Professor, Australian Maritime College, National Centre for Ports and Shipping, University of Tasmania Review of the second edition of Transport Law in Australia Business Law, 5th Edition (James et al.) is written for business students to provide a clear and accessible introduction to the legal system. Business law courses are the first exposure to law for many business students and the

first time they are obliged to think deeply about the discipline. This updated edition presents business law in a practical context rather than the doctrinal context that many major legal publishers use. The Business Law interactive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes practitioner videos from Herbert Smith Freehills, animated work problems and questions with immediate feedback. This new edition is a unique resource that can form the basis of a blended learning solution for

lecturers. Essential management law (Cavendish essential series) Australian Business Law 2011 is both an essential complement to studies in business law and a concise overview of the principles of business law for practitioners and students.
