A Nuclear-weapon-free Zone in the Middle East Nov 27
2019 Kareem is eminently qualified to write on the role
of Nuclear Weapons-Free Zones (NWFZs) in the processes
of averting nuclear weapons proliferation, arresting the
nuclear arms race, and eliminating the scourge of
nuclear weapons. Kareem's well-written, extensively
documented, and cogent argument for a NWFZ in the Middle
East reflects his scholarly and professional expertise

on the technical and political issues surrounding such a proposal. . . . This is an important and much needed contribution to the literature on peace studies, arms limitation, disarmament, and world order studies. It should be part of every library collection. Choice It is clear that the proliferation of nuclear weapons among the nations of the Middle East would pose grave problems for that politically explosive region and throughout the world. In this thoughtful study, Dr Karem examines the possibility of avoiding such a situation and reducing tensions generally by implementing United Nations resolutions calling for the establishment of a nuclear-weapon-free zone (NWFZ) in the Middle East. Arguing that the NWFZ approach is a viable solution, he suggests how to implement it and how diplomatic obstacles facing such an agreement can be overcome.

Automatic Distribution-free Statistical Signal Detection May 26 2022 Distribution-free statistical techniques are reviewed and evaluated for possible application to the signal detection problem. These techniques are classified into three types: (1) The noise distribution is known but the signal-plus-noise is not, (2) neither distribution is known but a pure-noise sample is available, and (3) the distributions and a pure-noise sample are all unavailable. Several of the distribution-free detectors are almost as efficient as their parametric counterparts and several are uniformly better than the parametric detectors for certain classes of Gaussian noise. (Author).

Prospects for Free Trade in the Americas _____ Nov 19 2021

Negotiations on a Free Trade Area of the Americas (FTAA) began in 1998. This study examines the prospects for the FTAA in light of economic and political turmoil in Latin America and the continuing impasse of US "fast track" authority. It also evaluates progress in the trade talks, challenges of the Quebec Summit in April 2001, and proposals for accelerating the target date of January 2005 for concluding negotiations.
