Laying Down the Law provides a comprehensive and accessible introduction to the study of law. The ninth edition of Keay's Insolvency has come at a time when major insolvency reforms, foreshadowed in previous editions, have just been announced. While none of these has become law, the authors have introduced readers to the proposed changes and the considerable impact they will have on the

operation of the law and the administration of insolvencies. These include the introduction of a safe harbour defence to insolvent trading, allowing more emphasis on informal restructuring, restrictions on counter-parties terminating contracts under "ipso facto" clauses, and allowing small companies to go through a streamlined liquidation process. The timing of these reforms, and their significance, is such that those studying and practicing in insolvency need to have an understanding of what is coming, which Keay will provide, even if by way of brief comment at various points throughout. Those reforms have confirmed the authors' continued and increased focus on corporate restructuring law and practice, including outside the context of formal insolvency, an on-going trend in Australia, and internationally. This edition also has new commentary on the roles and duties of lawyers acting in insolvency. PPS law and practice and further embedded in the commentary, along with cross-border insolvency, tax, banking and other related laws. The text has necessarily been updated with commentary on new and important case law, with an emphasis on decisions from the High Court and Courts of Appeals, or on decisions that add new perspectives on the law and practice. The authors have given greater emphasis to legal and insolvency practice - with references throughout to ASIC and AFSA regulatory guidance, Court rules, the ARITA Code, tax issues and forms. Useful tables have been added to explain the details in the text and each chapter now has a summary table of references to the particular parts of the legislation, regulatory guidance, and court rules. The book also cross-references to cases in the new case book, *Insolvency Law - Commentary and Materials*. Commentary on the statistical trends available

from the October 2015 annual reports of the regulators, and other data, is explained, in particular in as far as they may support the law reform trends. The final chapter in the last edition of the text critically assessed Australia's insolvency regime. The authors stand by that commentary and have necessarily updated and added to it in light of the law reform announcements, remaining of the view that while the laws work well enough, the environment local and international environment in which they operate has significantly changed such that, while the reforms are welcomed, a wholesale review of the regime in Australia is still needed. The authors are pleased to see the recognition given to Australian insolvency law and practice through the election of Mr Mark Robinson of PPB Advisory as President of INSOL International in 2015, and of Professor Rosalind Mason, of Queensland University of Technology (QUT), as Chair of INSOL Academics. Both have contributed enormously to the development of the practice and law of insolvency both in Australia and internationally. We are very pleased to have Mark Robinson contribute a foreword to this edition of the book. Michael Murray remains a visiting fellow at the Queensland University of Technology, and is now a Fellow of the Australian Academy of Law, and continues to work in and contribute to the development and thinking of insolvency and restructuring law, practice and policy. Jason Harris is now an Associate Professor in Law at the University of Technology, Sydney, and continues to teach and write extensively in the area, in particular in corporate law and restructuring. Each brings his respective knowledge, experience and thoughts to this important area of law and practice. Looking in Classrooms uses educational, psychological, and social science theories and classroom-

based research to teach future classroom teachers about the complexities and demands of classroom instruction. While maintaining the core approach of the first ten editions, the book has been thoroughly revised and updated with new research-based content on teacher evaluation, self-assessment, and decision-making; special emphases on teaching students from diverse ethnic, cultural, class, and gender-identity contexts; and rich suggestions for integrating technology into classroom instruction. Widely considered to be the most comprehensive and authoritative source available on effective, successful teaching, *Looking in Classrooms* synthesizes the knowledge base on student motivation, classroom management, teacher expectations, teacher effectiveness, adaptive instruction for individual learners, and informative observational techniques for enhancing teaching. It addresses key topics in classroom instruction in an accessible fashion, promoting easy interpretation and transfer to practice, and articulates the roles of teacher-centered pedagogy, student-centered instruction, and project-based learning in today ' s classroom. Guided by durable historical knowledge as well as dynamic, emerging conceptions of teaching, this text is ideal for undergraduate teacher training programs and for masters-level courses for teachers, administrators, and superintendents. For over forty years, *Theories of Human Communication* has facilitated the understanding of the theories that define the discipline of communication. The authors present a comprehensive summary of major communication theories, current research, extensions, and applications in a thoughtfully organized and engaging style. Part I of the extensively updated twelfth edition sets the stage for how to think about and study communication. The

first chapter establishes the foundations of communication theory. The next chapter reviews four frameworks for organizing the theories and their contributions to the nature of inquiry. Part II covers theories centered around the communicator, message, medium, and communication with the nonhuman. Part III addresses theories related to communication contexts—relationship, group, organization, health, culture, and society. “ From the Source ” contributions from theorists provide insight into the inspirations, motivations, and goals behind the theories. Online instructor ’ s resource materials include sample syllabi, key terms, exam questions, and text graphics. The theories include those important for their continuing influence in the field as well as emerging theories that encourage thinking about issues in new ways. For a reasonable price, readers are able to explore the patterns, trends, trajectories, and intricacies of the landscape of communication theory and will have an invaluable resource for future reference. With its balanced mix of theory and practice, as well as current coverage of emerging trends and topics, MODERN HUMAN RELATIONS AT WORK is a pre-eminent textbook for introducing students and novice practitioners to the field. Hegar provides many practical examples and techniques, as well as experiential and application-oriented exercises to show how human relations concepts and skills can increase productivity and job satisfaction in the workplace. "Research methodology is a dynamic enterprise. Even after writing 10 editions of this book, we have continued to draw new material and inspiration from ground-breaking advances in research methods and in nurse researchers' use of those methods. It is thrilling to share many of those developments in this new edition. We expect that many of the new methodologic and technological enhancements will be translated into powerful evidence for nursing practice. Four years ago, we considered the 10th edition as a watershed edition of a classic textbook, having added two new chapters. We are persuaded, however, that this 11th edition is even better than the previous one. We have retained many features that made this book a classic textbook and resource, including its focus on research as a support for evidence-based nursing, but have introduced important innovations that we hope will help to shape the future of nursing research"-- Using her unique M-A-P approach (Model-Analysis-Practice), Susan Fawcett ' s books have guided hundreds of thousands of students through the writing process, from foundations of grammar, mechanics, and spelling through writing clear sentences and well-organized paragraphs. Her inductive approach; plentiful, high-interest student models and practices; and contemporary readings engage and motivate students.
