Tin is the most famous fae in Oz for all the wrong

reasons. Cursed with a stone heart, he is the perfect assassin: ruthless, efficient, and merciless with thousands of kills to his name. When his old friend, Lion, offers him a small fortune to deliver Dorothy to the South for his lover to wear the girl's head as her own, Tin doesn't hesitate to accept the unsavory deal. Dorothy Gale lost everything—her family to illness, her dog to age, and now her farm to foreclosure. The entire town thought she was crazy for believing in a faerie world called Oz, but even after ten years have passed, she can't help knowing she was right. So when an emerald green portal opens in her wheat field, she jumps at the opportunity to return to the only place she ever felt like she belonged. Tin wasn't expecting a grown woman to step through the portal, just as Dorothy wasn't expecting Tin to have his stone heart back, but Oz holds more unexpected things than either could have imagined. Magic has hidden dangerous lies behind glamour, trapped innocents in curses, and left the land of Oz in turmoil—none more so than the South. As Tin and Dorothy travel together for the second time in a decade, their lives begin to make sense again. Soon, they must decide who to give their loyalties to before Lion takes Dorothy's head and Tin's cursed heart is forever doomed. #1 NEW YORK TIMES BESTSELLER • Now a major motion picture directed by Steven Spielberg. “Enchanting . . . . starts out like a simple bit of fun and winds up feeling like a rich and plausible picture of future friendships in a world not too distant from our own.”—iO9 Living with the Stars tells the fascinating story of what truly makes the human body. The body that is with us all our lives is always changing. We are quite literally not who we were years, weeks, or even days ago: our cells die and are replaced by new ones at an astonishing pace. The entire body continually rebuilds itself, time and again, using the food and water that flow through us as fuel and as construction material. What persists over time is not fixed but merely a pattern in flux. We rebuild using elements captured from our surroundings, and are thereby connected to animals and plants around us, and to the bacteria within us that help digest them, and to geological processes such as continental drift and volcanism here on Earth. We are also intimately linked to the Sun's nuclear furnace and to the solar wind, to collisions with asteroids and to the cycles of the birth of stars and their deaths in cataclysmic supernovae, and ultimately to the beginning of the universe. Our bodies are made of the burned out embers of stars that were released into the galaxy in massive explosions billions of years ago, mixed with atoms that formed only recently as ultrafast rays slammed into Earth's atmosphere. All of that is not just remote history but part of us now: our

human body is inseparable from nature all around us and intertwined with the history of the universe. When James Killian comes out to his father, he finds himself banished from his home and fired from his job. His savior comes in the unlikely form of Ethan Whitehall, his older brother's best friend. Ethan has always had a soft spot where Jamie Killian was concerned, and he will do whatever it takes to keep his new lover safe. Mila, the daughter of Andy and Effie from DESCENDER, spends her days exploring the lonely wilds of the planet Sampson and trying to stay out of the clutches of the evil disciples of the all-powerful vampire witch known only as Mother. But, like her parents, Mila doesn't like to play by the rules, and when a certain robot pal of her dad's shows up, nothing will ever be the same! With all the scope and heart of the sci-fi classic DESCENDER, LEMIRE and NGUYEN reunite to take readers on an unforgettable fantasy quest! The bestselling novelist and award-winning Hollywood producer

weaves a high-tension novel of suspense around a chilling conspiracy of corruption within the LAPD, reminiscent of the classic movie "Chinatown." Inside the department, they're called Tin Collectors: Internal Affairs Agents, the police of the police. If they catch you breaking the rules, they'll come after your badge. If they want you badly enough, they'll collect more than just your tin. LAPD Detective Shane Scully is startled awake in the middle of the night by a call from his ex-partner's wife, who is being beaten by her abusive husband. Racing to their house to stop the fight, Scully ends up killing his ex-partner, a cop who is beloved within the department. Suddenly, Scully finds himself an outcast, shunned by his fellow cops who intend to exact vengeance no matter what the cost. Internal Affairs zeroes in on the "renegade" cop with their sharpest young prosecutor, the ice queen Alexa Hamilton, who has her own reasons for taking revenge on Scully. Desperate to save his career, Scully starts kicking over rocks within the LAPD. What he uncovers is pure evil: a conspiracy going to the very top that ultimately threatens not just his own life but that of a young teenage boy, Chooch, entrusted to Scully's care by his mother - Sandy Sandoval. Known as the Black Widow, Sandy is a beautiful and courageous woman who also happens to be the LAPD's most important undercover informant, and Scully will do anything

to keep her son safe. Stephen J. Cannell combines mystery and violence, loyalty and passion in a tale with an ending as unpredictable as LA itself.

Starting with a simple question - 'Which way am I looking?' - Tristan Gooley blends natural science, myth, folklore and the history of travel to introduce you to the rare and ancient art of finding your way using nature's own sign-posts, from the feel of a rock to the look of the moon. In this fully updated edition you'll learn why some trees grow the way they do and how they can help you find your way in the countryside. You'll discover how it's possible to find North simply by looking at a puddle and how natural signs can be used to navigate on the open ocean and in the heart of the city. Wonderfully detailed and full of fascinating stories, this is a glorious exploration of the rediscovered art of natural navigation. Now a major motion picture starring Brie Larson, Naomi Watts and Woody Harrelson. This is a startling memoir of a successful journalist's journey from the deserted and dusty mining towns of the American Southwest, to an antique filled apartment on Park Avenue. Jeanette Walls narrates her nomadic and adventurous childhood with her dreaming, 'brilliant' but alcoholic parents. At the age of seventeen she escapes on a Greyhound bus to New York with her older sister; her younger siblings follow later. After pursuing the education and civilisation her parents

sought to escape, Jeanette eventually succeeds in her quest for the 'mundane, middle class existence' she had always craved. In her apartment, overlooked by 'a portrait of someone else's ancestor' she recounts poignant remembered images of star watching with her father, juxtaposed with recollections of irregular meals, accidents and police-car chases and reveals her complex feelings of shame, guilt, pity and pride toward her parents. "Caitlyn Reed and her dog, Renegade, are thrown into the midst of murder and intrigue when they discover a dead body while on a trail ride in the black hills of Wyoming. The local sheriff is hell bent on a conviction, and Caitlyn's brother, Dylan, is in his crosshairs. Desperate to prove his innocence, Caitlyn turns to Deputy Colt Branson for help, but she must grapple with their rocky romantic past to gain his aid. As Caitlyn and Renegade pursue the killer, the investigation catapults their lives in a dangerous new direction, one with mysterious strangers, convoluted clues, and deadly violence. In a whip-cracking turn of events, Caitlyn finds herself under suspicion. When all the chips fall, Caitlyn uncovers shocking evidence that rocks their small-town community to its core."-- AN INSTANT NEW YORK TIMES BESTSELLER "Fierce and unrelenting...Do yourself a favor and get lost in this beautiful book!" —Tomi Adeyemi, #1 New York Times bestselling author of Children of Blood and

This gentle introduction to discrete mathematics is written for first and second year math majors, especially those who intend to teach. The text began as a set of lecture notes for the discrete mathematics course at the University of Northern Colorado. This course serves both as an introduction to topics in discrete math and as the "introduction to proof" course for math majors. The course is usually taught with a large amount of student inquiry, and this text is written to help facilitate this. Four main topics are covered: counting, sequences, logic, and graph theory. Along the way proofs are introduced, including proofs by contradiction, proofs by induction, and combinatorial proofs. The book

contains over 470 exercises, including 275 with solutions and over 100 with hints. There are also Investigate! activities throughout the text to support active, inquiry based learning. While there are many fine discrete math textbooks available, this text has the following advantages: It is written to be used in an inquiry rich course. It is written to be used in a course for future math teachers. It is open source, with low cost print editions and free electronic editions. This third edition brings improved exposition, a new section on trees, and a bunch of new and improved exercises. For a complete list of changes, and to view the free electronic version of the text, visit the book's website at [discrete.openmathbooks.org](http://discrete.openmathbooks.org)
