The secret history of our most vital organ: the human heart. The Man Who Touched His Own Heart tells the raucous, gory, mesmerizing story of the heart, from the first "explorers" who dug up cadavers and plumbed their hearts' chambers, through the first heart surgeries -- which had to be completed in three minutes before death arrived -- to heart transplants and the latest medical efforts to prolong our hearts' lives, almost defying nature in the process. Thought of as the seat of our soul, then as a mysteriously animated object, the heart is still more a mystery than it is understood. Why do most animals only get one billion beats? (And how did modern humans get to over two billion, effectively letting us live out two lives?) Why are sufferers of gingivitis more likely to have heart attacks? Why do we often undergo expensive procedures when cheaper ones are just as effective? What do Da Vinci, Mary Shelley, and contemporary Egyptian archaeologists have in common? And what does it really feel like to touch your own heart, or to have someone else's beating inside your chest? Rob Dunn's fascinating history of our hearts brings us deep inside the science, history, and stories of the four chambers we depend on most. Photography has transformed the way we picture ourselves. Although photographs seem to "prove" our existence at a given point in time, they also demonstrate the impossibility of framing our multiple and fragmented selves. As Linda Haverty Rugg convincingly shows, photography's double take on self-image mirrors the concerns of autobiographers, who see the self as simultaneously divided (in observing/being) and unified by the autobiographical act. Rugg tracks photography's impact on the formation of self-image through the study of four literary autobiographers concerned with the transformative power of photography. Obsessed with self-image, Mark Twain and August Strindberg both attempted (unsuccessfully) to integrate photographs into their autobiographies. While Twain encouraged photographers, he was wary of fakery and kept a fierce watch on the distribution of his photographic image. Strindberg, believing that photographs had occult power, preferred to photograph himself. Because of their experiences under National Socialism, Walter Benjamin and Christa Wolf feared the dangerously objectifying power of photographs and omitted them from their autobiographical writings. Yet Benjamin used them in his photographic conception of history, which had its testing ground in his often-ignored *Berliner Kindheit um 1900*. And Christa Wolf's narrator in *Patterns of Childhood* attempts to reclaim her childhood from the Nazis by reconstructing mental images of lost family photographs. Confronted with multiple and conflicting images of themselves, all four of these writers are torn between the knowledge that texts, photographs, and indeed selves are haunted by undecidability and the desire for the returned glance of a single self. 'So honest and pure as to count as a true rapture' JOAN DIDION 'A poetic masterpiece' JOHNNY DEPP 'Our St John of the Cross, a mystic full of compassion' EDMUND WHITE 'A roadmap to my life', from the National Book Award-winning author of *Just Kids: an unforgettable odyssey of a legendary artist, told through the prism of cafés and haunts she has worked in around the world* REVISED EDITION WITH FIVE THOUSAND WORDS OF BONUS MATERIAL AND NEW PHOTOGRAPHS M Train begins in the tiny Greenwich Village café where Smith goes every morning for black coffee, ruminates on the world as it is and the world as it was, and writes in her notebook. Through prose that shifts fluidly between dreams and reality, past and present, and across a landscape of creative aspirations and inspirations, we travel to Frida Kahlo's Casa Azul in Mexico; to a meeting of an Arctic explorer's society in Berlin; to a ramshackle seaside bungalow in New York's Far Rockaway that Smith acquires just before Hurricane Sandy hits; and to the graves of Genet, Plath, Rimbaud and Mishima. Woven throughout are reflections on the writer's craft and on artistic creation. Here, too, are singular memories of Smith's life in Michigan and the irremediable loss of her husband, Fred Sonic Smith. Braiding despair with hope and consolation, illustrated with her signature Polaroids, M Train is a meditation on travel, detective shows, literature and coffee. It is a powerful, deeply moving book by one of the most remarkable artists at work today. "Yoga Sutra" is the basic scripture of yoga, in the sense of a Hindu philosophical view, and is essential for anyone who wants to gain deeper insight of the spiritual aspects of yoga. In translation and commentary by the founder and teacher of darshana-yoga, this text reveals the true nature of yoga as the quest for the highest reality. (World Religions) This volume is the official reference manual for GNU Bash, the standard GNU command-line interpreter. Paul John Eakin's earlier work *Fictions in Autobiography* is a key text in autobiography studies. In it he proposed that the self that finds expression in autobiography is in fundamental ways a kind of fictive construct, a fiction articulated in a fiction. In this new book Eakin turns his attention to what he sees as the defining assumption of autobiography: that the story of the self does refer to a world of biographical and historical fact. Here he shows that people write autobiography not in some private realm of the autonomous self but rather in strenuous engagement with the pressures that life in culture entails. In so demonstrating, he offers fresh readings of autobiographies by Roland Barthes, Nathalie Sarraute, William Maxwell, Henry James, Ronald Fraser, Richard Rodriguez, Henry Adams, Patricia Hampl, John Updike, James McConkey, and Lillian Hellman. In the introduction Eakin makes a case for reopening the file on reference in autobiography, and in the first chapter he establishes the complexity of the referential aesthetic of the genre, the intricate interplay of fact and fiction in such texts. In subsequent chapters he explores some of the major contexts of reference in autobiography: the biographical, the social and cultural, the historical, and finally, underlying all the rest, the somatic and temporal dimensions of the lived experience of identity. In his discussion of contemporary theories of the self, Eakin draws especially on cultural anthropology and developmental psychology. Kurt von der Groote is the first mate on an oil tanker, has been for many years. An accident occurs. A friend dies, he blames himself and quits. It's a decision that changes his life, leading him to deliver *FORBIDDEN JUSTICE*. This is a fast-moving, hard-hitting story of a man and his friends seeking revenge on a gang of white slavers, pirates and drug runners operating in areas of the world where the law wouldn't or couldn't go. The early twentieth century brought about the rejection by physicists of the doctrine of determinism - the belief that complete knowledge of the initial conditions of an interaction in nature allows precise and unambiguous prediction of the outcome. This book traces the origins of a central problem leading to this change in viewpoint and paradoxes raised by attempts to formulate a consistent theory of the nature of light. It outlines the different approaches adopted by members of different national cultures to the apparent inconsistencies, explains why Einstein's early (1905) attempt at a resolution was not taken seriously for fifteen years, and describes the mixture of ideas that created a route to a new, antideterministic formulation of the laws of nature. Dr Wheaton describes the experimental work on the new forms of radiation found at the turn of the century and shows how the interpretation of energy transfer from X-rays to matter gradually transformed a classical wave explanation of light to one based on particle like quanta of energy, and further, he explains how influential scientists came reluctantly to accept a wavelike interpretation of matter as well. This new and distinctively different account of one of the major theoretical shifts in modern physical thought will be of fundamental interest to physical scientists and philosophers, as well as to historians of science. "An essential book" on PTSD, an all-too-common condition in both military veterans and civilians (*The New York Times Book Review*). Post-traumatic stress disorder afflicts as many as 30 percent of those who have experienced twenty-first-century combat—but it is not confined to soldiers. Countless ordinary Americans also suffer from PTSD, following incidences of abuse, crime, natural disasters, accidents, or other trauma—yet in many cases their symptoms are still shrouded in mystery, secrecy, and shame. This "compulsively readable" study takes an in-depth look at the subject (*Los Angeles Times*). Written by a war correspondent and former Marine with firsthand experience of this disorder, and drawing on interviews with individuals living with PTSD, it forays into the

scientific, literary, and cultural history of the illness. Using a rich blend of reporting and memoir, *The Evil Hours* is a moving work that will speak not only to those with the condition and to their loved ones, but also to all of us struggling to make sense of an anxious and uncertain time. One of the great documents of colonial Mexico, the *Codex Chimalpopoca* chronicles the rise of Aztec civilization and preserves the mythology on which it was based. Its two complementary texts, *Annals of Cuauhtitlan* and *Legend of the Suns*, record the pre-Cortésian history of the Valley of Mexico together with firsthand versions of that region's myths. Of particular interest are the stories of the hero-god Quetzalcoatl, for which the *Chimalpopoca* is the premier source. John Bierhorst's work is the first major scholarship on the *Codex Chimalpopoca* in more than forty years. His is the first edition in English and the first in any language to include the complete text of the *Legend of the Suns*. The precise, readable translation not only contributes to the study of Aztec history and literature but also makes the codex an indispensable reference for Aztec cultural topics, including land tenure, statecraft, the role of women, the tribute system, warfare, and human sacrifice. The *Treatise of Hernando Ruiz de Alarcón* is one of the most important surviving documents of early colonial Mexico. It was written in 1629 as an aid to Roman Catholic churchmen in their efforts to root out the vestiges of pre-Columbian Aztec religious beliefs and practices. For the student of Aztec religion and culture is a valuable source of information. Hernando Ruiz de Alarcón was born in Taxco, Guerrero, Mexico, in the latter part of the sixteenth century. He attended the University of Mexico and later took holy orders. Sometime after he was assigned to the parish of Atenango, he began writing the *Treatise* for his fellow priests and church superiors to use as a guide in suppressing native "heresy." With great care and attention to detail Ruiz de Alarcón collected and recorded Aztec religious practices and incantations that had survived a century of Spanish domination (sometimes in his zeal extracting information from his informants through force and guile). He wrote down the incantations in Nahuatl and translated them into Spanish for his readers. He recorded rites for such everyday activities as woodcutting, traveling, hunting, fishing, farming, harvesting, fortune telling, lovemaking, and the curing of many diseases, from toothache to scorpion stings. Although Ruiz de Alarcón was scornful of native medical practices, we know now that in many aspects of medicine the Aztec curers were far ahead of their European counterparts. About the Book: Learn colors with this bilingual children's picture book dictionary. English-Serbian (Cyrillic) Bilingual Children's Picture Dictionary Book of Colors www.rich.center The edge of irony, says Linda Hutcheon, is always a social and political edge. Irony depends upon interpretation; it happens in the tricky, unpredictable space between expression and understanding. *Irony's Edge* is a fascinating, compulsively readable study of the myriad forms and the effects of irony. It sets out, for the first time, a sustained, clear analysis of the theory and the political contexts of irony, using a wide range of references from contemporary culture. Examples extend from Madonna to Wagner, from a clever quip in conversation to a contentious exhibition in a museum. *Irony's Edge* outlines and then challenges all the major existing theories of irony, providing the most comprehensive and critically challenging theory of irony to date. Before *The Exorcist* and *Rosemary's Baby*, there was *The Case Against Satan* By the twentieth century, the exorcism had all but vanished, wiped out by modern science and psychology. But Ray Russell—praised by Stephen King and Guillermo del Toro as a sophisticated practitioner of Gothic fiction—resurrected the ritual with his classic 1962 horror novel, *The Case Against Satan*, giving new rise to the exorcism on page, screen, and even in real life. Teenager Susan Garth was "a clean-talking sweet little girl" of high school age before she started having "fits"—a sudden aversion to churches and a newfound fondness for vulgarity. Then one night, she strips in front of the parish priest and sinks her nails into his throat. If not madness, then the answer must be demonic possession. To vanquish the Devil, Bishop Crimmings recruits Father Gregory Sargent, a younger priest with a taste for modern ideas and brandy. As the two men fight not just the darkness tormenting Susan but also one another, a soul-chilling revelation lurks in the shadows—one that knows that the darkest evil goes by many names.
