Socialism, Capitalism and Alternatives Sep 16 2021 In 1989 the Berlin Wall came down. Two years later the Soviet Union disintegrated. The collapse of communism in Eastern Europe and the Soviet Union discredited the idea of socialism for generations to come. It was seen as representing the final and irreversible victory of capitalism. This triumphal dominance was barely challenged until the 2008 financial crisis threw the Western world into a state of turmoil. Through analysis of post-socialist Russia and Central and Eastern Europe, as well as of the United Kingdom, China and the United States, *Socialism, Capitalism and Alternatives* confronts the difficulty we face in articulating alternatives to capitalism, socialism and threatening populist regimes. Beginning with accounts of the impact of capitalism on countries left behind by the planned economies, the volume moves on to consider how China has become a beacon of dynamic economic growth, aggressively expanding its global influence. The final section of the volume poses alternatives to the ideological dominance of neoliberalism in the West. Since the 2008 financial crisis, demands for social change have erupted across the world. Exposing the failure of neoliberalism in the United Kingdom and examining recent social movements in Europe and the United States, the closing chapters identify how elements of past ideas are re-emerging, among them Keynesianism and radical socialism. As those chapters indicate, these ideas might well have potential to mobilise support and challenge the dominance of neoliberalism.

Abroad presents a wide-ranging look at how whiteness—defined in terms of race or ethnicity—forms a category toward which people strive in order to gain power and privilege. Collectively these pieces treat global spaces whose nation building and identity formation have turned on biological and genealogical exigencies to whiten themselves. Drawing upon racialized, national practices implemented prior to and during the twentieth century, each of the essays enlists literature or performance to reflect the sociopolitical imperatives that secured whiteness in the respective locations they study. They range from examinations of whiteness in the literature of Appalachia and contemporary Argentinean poetry to an analysis of performances memorializing the colonial experience in Italy and an exploration into the white rap music of Eminem and contemporary multiracial passing. As the contributors show, literary and performance representations have the power to chronicle histories that reflect the behaviors and lived realities of our selves. Whether whiteness, in addition to its physical manifestation, presents itself as identity, symbol, racism, culture, social formation, political imposition, legal imposition, or pathology, it has been outed into the visible, even in national spaces where the term “whiteness” has yet to be translated and entered into the official lexicon. The ten essays collected here provide powerful insights into where and how the race for biological and genealogical whiteness persists in various geopolitical realms and the ways in which Nordic whites, as well as ethnic whites and nonwhites, resecure its ascendance. La Vinia Delois Jennings is professor of English at the University of Tennessee, Knoxville. Her recent critical study *Toni Morrison and the Idea of Africa* won the 2008 Toni Morrison Society Prize for Best Single-Authored Book on the Nobel laureate and Pulitzer-Prize winning author.

On Migration Jul 27 2022 This volume is based on the section 'Transnationalities - Transidentities - Hybridities - Diasporization', organized

by the Ibero-American and Francophone Research Centres of the University of Leipzig as part of the First Annual Conference of the Centre for Area Studies at the University of Leipzig. By now, already a decade has passed since our conference section took place and it is due to various circumstances that this volume has not been published earlier. It carries along, in some sense, its own migration trace. Nevertheless, the questions examined in the contributions have reached even more relevance since then in both, the Old World and the New, due to the various political, social, economic and ecological crisis around the globe that have led to the increased arrival of refugees to Europe and the harsh discussion about a concrete or 'intelligent' wall to shield the USA from Latin American migrants, among others. Today, there is an urgent political and social need for concepts of living together in much more heterogeneous and much less familiar societies. The questions, notions and cases explored in the nine contributions that comprise this publication focus on this emergency. Participants on the volume: A. Chanady; A. de Toro; W. Ch. Dimock; D. Ingenschay; J. Mecke; M. Rössner; G. Pizarz-Ramirez; C. Sieber.

Tracing Language Movement in Africa Apr 23 2022 The great diversity of ethnicities and languages in Africa encourages a vision of Africa as a fragmented continent, with language maps only perpetuating this vision by drawing discrete language groups. In reality, however, most people can communicate with most others within and across linguistic boundaries, even if not in languages taught or learned in schools. Many disciplines have looked carefully at language movement and change on the continent, but their lack of interaction has prevented the emergence of a cohesive picture of African languages. *Tracing Language Movement in Africa* gathers eighteen scholars together to offer a truly multidisciplinary representation of language in Africa, combining insights from history, archaeology, religion, linguistics, political science, and philosophy. The resulting volume illuminates commonalities and distinctions in these disciplines' understanding of language change and movement in Africa. The volume is empirical -- aiming to represent language more accurately on the continent -- as well as theoretical. It identifies the theories that each discipline uses to make sense of language movement in Africa in plain terms and highlights the themes that cut across all disciplines: how scholars use data, understand boundaries, represent change, and conceptualize power. The volume is organized to reflect differing conceptions of language that arise from its discipline-specific contributions: that is, tendencies to study changes that consolidate language or those that splinter it, viewing languages as whole or in part. Each contribution includes a short explanation of a discipline's theoretical and methodological approaches to language movement and change to ensure that the chapters are accessible

to non-specialists, followed by an illustrative empirical case study. This volume will inspire multidisciplinary conversations around the study of language change in Africa, opening new interdisciplinary dialogue and spurring scholars to adapt the questions, data, and method of other disciplines to the problems that animate their own fields.

The Merchant of Venice Dec 20 2021 The New Cambridge Shakespeare appeals to students worldwide for its up-to-date scholarship and emphasis on performance. The series features line-by-line commentaries and textual notes on the plays and poems. Introductions are regularly refreshed with accounts of new critical, stage and screen interpretations. This second edition of *The Merchant of Venice* retains the text and Introduction prepared by M. M. Mahood and features a new introductory section by Charles Edelman. Where Mahood focuses in her Introduction on the expectations of the play's first audience and on our modern experience of seeing and hearing the drama performed, Edelman explores the play's sexual politics. He also foregrounds recent scholarship on the position of Jews in Shakespeare's time and surveys the international scope and diversity of theatrical interpretations of the text in the 1980s and 1990s. He pays particular attention to the ways in which directors and actors tackle the troubling figure of Shylock.

[The Global Encyclopaedia of Informality, Volume 1](#) Jul 15 2021 Alena Ledeneva invites you on a voyage of discovery, to explore society's open secrets, unwritten rules and know-how practices. Broadly defined as 'ways of getting things done', these invisible yet powerful informal practices tend to escape articulation in official discourse. They include emotion-driven exchanges of gifts or favours and tributes for services, interest-driven know-how (from informal welfare to informal employment and entrepreneurship), identity-driven practices of solidarity, and power-driven forms of co-optation and control. The paradox, or not, of the invisibility of these informal practices is their ubiquity. Expertly practised by insiders but often hidden from outsiders, informal practices are, as this book shows, deeply rooted all over the world, yet underestimated in policy. Entries from the five continents presented in this volume are samples of the truly global and ever-growing collection, made possible by a remarkable collaboration of over 200 scholars across disciplines and area studies. By mapping the grey zones, blurred boundaries, types of ambivalence and contexts of complexity, this book creates the first Global Map of Informality. The accompanying database is searchable by region, keyword or type of practice, so do explore what works, how, where and why! Praise for *The Global Encyclopaedia of Informality* 'The Global Encyclopaedia of

Informality represents the beginning of a new era in informality studies. With its wealth of information, diversity, scope, theoretical innovation and artistic skill, this collection touches on all the aspects of social and cultural complexity that need to be integrated into policy thinking.' Predrag Cvetković, Centre for Empirical Cultural Studies of South-East Europe, Belgrade, Serbia 'This is a monumental achievement – an indispensable reference for anyone in the social sciences interested in informality.' Martin Holbraad, Professor of Social Anthropology, UCL, and editor-in-chief of *Social Analysis* 'This impressive work helps us understand our complex times by showing how power develops through informal practices, mobilizing emotional, cognitive and relational mechanisms in strategies of survival, but also of camouflage and governance.' Donatella della Porta, Director of Centre of Social Movements Studies, Scuola normale superiore, Firenze, Italy 'An impressive, informative, and intriguing collection. With evident passion and patience, the team of 250 researchers insightfully portrays the multiplicity of informal and often invisible expressions of human interdependence.' Subi Rangan, Professor of Strategy and Management, INSEAD, Fontainebleau, France 'This compendium of terms used in different cultures to express aspects of informal economy provides a unique supplement to studies of a major (yet understated by academic economics) social issue. It will be of key significance for in-depth teaching of sociology, economics and history.' Teodor Shanin, OBE Professor and President of the Moscow School of Social and Economic Sciences 'Modern states have sought to curb, control and subdue informality. The entries in the *Global Encyclopaedia* demonstrate the endurance of informality over such efforts. More recently, the rise and political success of anti-establishment movements in so many parts of the world is a wide-ranging challenge and delegitimation of national and transnational formal institutions of governance. Understanding the perceived shortcomings of formal institutions and the appeal of anti-establishment movements must at least in part be informed by a study of informality and its networks. This *Encyclopaedia* is essential reading if we wish to understand and engage with these challenges of our age.' Fredrik Galtung, Chairman, Integrity Action

Language and Nature in the Classical Roman World Oct 06 2020 A familiar theme in Greek philosophy, largely due to the influence of Plato's *Cratylus*, linguistic naturalism (the notion that linguistic facts, structures or behaviour are in some significant sense determined by nature) constitutes a major but under-studied area of Roman linguistic thought. Indeed, it holds

significance not only for the history of linguistics but also for philosophy, stylistics, rhetoric and more. The chapters in this volume deal with a range of naturalist theories in a variety of authors including Cicero, Varro, Nigidius Figulus, Posidonius, and Dionysius of Halicarnassus. The result is a complex and multi-faceted picture of how language and nature were believed to interrelate in the classical Roman world.

Legal Passing Oct 18 2021 Legal Passing offers a nuanced look at how the lives of undocumented Mexicans in the US are constantly shaped by federal, state, and local immigration laws. Angela S. García compares restrictive and accommodating immigration measures in various cities and states to show that place-based inclusion and exclusion unfold in seemingly contradictory ways. Instead of fleeing restrictive localities, undocumented Mexicans react by presenting themselves as “legal,” masking the stigma of illegality to avoid local police and federal immigration enforcement. Restrictive laws coerce assimilation, because as legal passing becomes habitual and embodied, immigrants distance themselves from their ethnic and cultural identities. In accommodating destinations, undocumented Mexicans experience a localized sense of stability and membership that is simultaneously undercut by the threat of federal immigration enforcement and complex street-level tensions with local police. Combining social theory on immigration and race as well as place and law, Legal Passing uncovers the everyday failures and long-term human consequences of contemporary immigration laws in the US.

Latin to GCSE Part 1 Jul 03 2020 A companion to Bloomsbury's popular two-volume Greek to GCSE, this is the first course for Latin students that directly reflects the curriculum in a clear, concise and accessible way. Enhanced by colour artwork and text features, the books support the new OCR specification for Latin (first teaching 2016) as well as meeting the needs of later students, both at university and beyond. Written by two experienced school teachers, one also an examiner, the course is based on a keen understanding of what pupils find difficult, concentrating on the essentials and on the explanation of principles in both accidence and syntax: minor irregularities are postponed and subordinated so that the need for rote learning is reduced. User-friendly, it also gives pupils a firm foundation for further study. Part 1 covers the basics and is self-contained, with its own reference section. It outlines the main declensions, a range of active tenses and a vocabulary of 275 Latin words to be learned. Pupil confidence is built up by constant consolidation of the material covered. After the preliminaries, each chapter concentrates on stories with one source or subject: the Fall of Troy, the journeys of Aeneas, the founding of Rome and the early kings, providing an excellent introduction to Roman culture alongside the language study.

School Success for At-Risk Students Feb 07 2021 School Success for At-Risk Students: A Culturally Responsive Tiered Approach introduces a model that incorporates cultural responsiveness into the familiar three-tiered model of behavioural and academic support. The model is designed to modify learning environments to support all students, identify students at risk, and provide a continuum of supports for those who need it. The characteristics, outcomes, and support needs of at-risk students are explored in detail. These students include those with disabilities, those who are English language learners, refugees, indigenous, LGBT+, students from low SES backgrounds, and those who are involved with the juvenile justice or out-of-home care systems. The concepts of cultural responsiveness and competence are defined and discussed, then incorporated into a framework that includes the Response to Intervention and Positive Behavioural Interventions and Supports frameworks. This revised framework is investigated in regards to theory, research, and practice. The importance of cultural competence for at-risk students and ways to improve this in schools are suggested. This book is a necessary companion for educators and researchers who have an interest in exploring the nature and context of educating at-risk students from the perspective of a culturally responsive multi-tiered system of support. It will also be of

interest to a wide range of individuals working in education with at-risk youth, including preservice and veteran teachers, leadership teams, school psychologists, and school counsellors, as well as teacher educators.
