Math, phonics, grammar, writing, reading activities plus stickers and game board. The bestselling inspirational book in which the author reunites with a childhood football hero, now a minister and coach, and witnesses a revelatory demonstration of the true meaning of manhood—Season of Life is a book that “should be required reading for every high school student in America and every parent as well” (Carl Lewis, Olympic champion). Joe Ehrmann, a former NFL football star and volunteer coach for the Gilman high school football team, teaches his players the keys to successful defense: penetrate, pursue, punish, love. Love? A former captain of the Baltimore Colts and now an ordained minister, Ehrmann is serious about the game of football but even more serious about the purpose of life. Season of Life is his inspirational story as told by Pulitzer Prize-winning journalist Jeffrey Marx, who was a ballboy for the Colts when he first met Ehrmann. Ehrmann now devotes his life to teaching young men a whole new meaning of masculinity. He teaches the boys at Gilman the precepts of his Building Men for Others program: Being a man means emphasizing relationships and having a cause bigger than yourself. It means accepting responsibility and leading courageously. It means that empathy, integrity, and living a life of service to others are more important than points on a scoreboard. Decades after he first met Ehrmann, Jeffrey Marx renewed their friendship and watched his childhood hero putting his principles into action. While chronicling a season with the Gilman Greyhounds, Marx witnessed the most extraordinary sports program he'd ever seen, where players say “I love you” to each other and coaches profess their love for their players. Off the field Marx sat with Ehrmann and absorbed life lessons that led him to reexamine his own unresolved relationship with his father. Season of Life is a book about what it means to be a man of substance and impact. It is a moving story that will resonate with athletes, coaches, parents—anyone struggling to make the right choices in life. **Workbook Features:** • Ages 9-11, Grades 4-5 • 160 pages, about 8 inches x 10 1/2 inches • Reading, writing, math, science, social studies, and more • Includes fun fitness activities • Flash cards, stickers, completion certificate, and answer key included **Hands-On Summer Learning:** Summer Bridge Activities Workbook helps fourth—fifth graders keep their skills sharp during the summer months to prevent summer learning loss through fun practice pages and activities, engaging fitness activities, and more. **What's Included:** This book covers all subjects, focusing on reading passages, grammar, multiplying, dividing, social studies, science experiments, fitness activities, and more. A philosopher son comes to grips with his evangelist father's life and ministry, and his passion for winning lost souls. The author situates Percy Crawford within the fundamentalist movement he encountered in 1923, when he came to Los Angeles to get a college education, and instead got converted at Reuben Torrey's Church of the Open Door. The book identifies Crawford's main contributions to fundamentalism at a critical time in its history --the 1930s and '40s-- when it was languishing and marginalized in American life. Crawford was one of the "young men on fire" who effectively used the new medium of radio (and later television) as vehicles for spreading the gospel. His direct and hard-hitting preaching style, together with a high-quality musical program assembled by his wife and life-long partner in evangelism, Ruth, helped to remake the public image of fundamentalism and rekindle the spirit of revivalism. For more than 50 years, the Mathematical Association of America has been engaged in the construction and administration of challenging contests for students in American and Canadian high schools. The problems for these contests are constructed in the hope that all high school students interested in mathematics will have the opportunity to participate in the contests and will find the experience mathematically enriching. These contests are intended for students at all levels, from the average student at a typical school who enjoys mathematics to the very best students at the most special school. In the year 2000, the Mathematical Association of America initiated the American Mathematics Competitions 10 (AMC 10) for students up to grade 10. The Contest Problem Book VIII is the first collection of problems from that competition covering the years 2001-2007. J. Douglas Faires and David Wells were the joint directors of the AMC 10 and AMC 12 during that period, and have assembled this book of problems and solutions. There are 350 problems from the first 14 contests included in this collection. A Problem Index at the back of the book classifies the problems into the following major subject areas: Algebra and Arithmetic, Sequences and Series, Triangle Geometry, Circle Geometry, Quadrilateral Geometry, Polygon Geometry, Counting Coordinate Geometry, Solid Geometry, Discrete Probability, Statistics, Number Theory, and Logic. The major subject areas are then broken down into subcategories for ease of reference. The problems are cross-referenced when they represent several subject areas. Some girls seem to have it all... The top grades The best clothes A great body A cute boyfriend But they may also have... Exhaustion Anxiety Eating disorders Crippling insecurity From grammar school girls to working women, the pressure to be perfect is spreading like a disease. These Supergirls feel the unrelenting need to succeed -- sometimes at the cost of their own happiness and sanity. A recovering Supergirl herself, Liz Funk exposes the dangerous consequences that can come from striving for perfection. By closely following five girls and interviewing nearly one hundred more, she takes us inside the Supergirl psyche, explaining the causes of this phenomenon and showing how Supergirls can let their (sleek and shiny) hair down and find some time to relax and enjoy life! With practical advice, biting humor, and the sensitivity of someone who's been through it all, Funk's Supergirls Speak Out is the absolutely necessary companion for any girl who thinks 100 percent just isn't enough. Publishing Spring 2022. / Both BTEC Applied Psychology Books 1 and 2 are being revised to match the revised Unit 1 and Unit 3 specifications for first teaching from September 2021. / Unit 1 - Psychological approaches and applications completely revised and updated. / Endorsed for BTEC. / Each book provides knowledge and evaluation of theories and studies combined with many engaging activities which deliver the vocational element. / Activities aim to prepare students for internal and external assessments. / The brilliant visual style and tone will encourage students through every step of the course. Acclaim for "In today's world, 'innumeracy' is an even greater danger than illiteracy, and is perhaps even more common. Advertisers and politicians exploit it; intellectuals (self-styled) even flaunt it. I hope that this wise and witty book will provide cures where they are possible, and warnings where they are necessary. "It's also a lot of fun. I can guarantee that 100%."--Arthur C. Clarke "Dewdney retells with charm and wit magnificent morsels of

mathematical mayhem discovered by his army of volunteer 'abuse detectives.' From 'sample trashing' to 'numerical terrorism,' from 'percentage pumping' to 'dimensional dementia,' 200% of Nothing plumbs the depths of innumeracy in daily life and reveals what ordinary people can do about it. A rich, readable, instructive, and persuasive book."--Lynn Arthur Steen, Professor of Mathematics, St. Olaf College

Galileo's trial by the Inquisition is one of the most dramatic incidents in the history of science and religion. Today, we tend to see this event in black and white--Galileo all white, the Church all black. Galileo in Rome presents a much more nuanced account of Galileo's relationship with Rome. The book offers a fascinating account of the six trips Galileo made to Rome, from his first visit at age 23, as an unemployed mathematician, to his final fateful journey to face the Inquisition. The authors reveal why the theory that the Earth revolves around the Sun, set forth in Galileo's Dialogue, stirred a hornet's nest of theological issues, and they argue that, despite these issues, the Church might have accepted Copernicus if there had been solid proof. More interesting, they show how Galileo dug his own grave. To get the imprimatur, he brought political pressure to bear on the Roman Censor. He disobeyed a Church order not to teach the heliocentric theory. And he had a character named Simplicio (which in Italian sounds like simpleton) raise the same objections to heliocentrism that the Pope had raised with Galileo. The authors show that throughout the trial, until the final

sentence and abjuration, the Church treated Galileo with great deference, and once he was declared guilty commuted his sentence to house arrest. Here then is a unique look at the life of Galileo as well as a strikingly different view of an event that has come to epitomize the Church's supposed antagonism toward science. Annotation copyrighted by Book News, Inc., Portland, OR Its 100,000 years ago and Earth is visited by a benevolent race known as Phalecians. In an experiment, these beings alter the pre-humans' DNA in preparation for their return to Earth once human civilization is ready for first contact. However, as time passes, the Phalecians lose track of Earth's experiment, allowing its inhabitants to continue developing on their own. Earth and humanity are rediscovered by a Phalecian starship passing through the distant part of the galaxy. A massive search begins of Earth's archival records. The Phalecians must now decide whether to make contact or simply leave Earth alone...forever...with a major invasion by the dreaded cannibalistic Thetans looming over Earth's horizon. Paula Yoo scores big in her hilarious debut novel about an overachiever who longs to fit in and strives to stand out. The pressure is on! How to make your Korean parents happy: 1. Get a perfect score on the SATs. 2. Get into HarvardYalePrinceton. 3. Don't talk to boys.* Patti's parents expect nothing less than the best from their Korean-American daughter. Everything she does affects her chances of getting into an Ivy League school. So winning assistant concertmaster in her All-State violin competition and earning less than 2300 on her SATs is simply not good enough. But Patti's discovering that there's more to life than the Ivy League. To start with, there's Cute Trumpet Guy. He's funny, he's talented, and he looks exactly like the lead singer of Patti's favorite band. Then, of course, there's her love of the violin. Not to mention cool rock concerts. And anyway, what if Patti doesn't want to go to HarvardYalePrinceton after all? *Boys will distract you from your studies. In this Very Short Introduction, Alan Taylor presents the current scholarly understanding of colonial America to a broader audience. He focuses on the transatlantic and a transcontinental perspective, examining the interplay of Europe, Africa, and the Americas through the flows of goods, people, plants, animals, capital, and ideas. Ideal for any IT professional who uses Cisco technologies on a daily basis, or anyone who is preparing for their Cisco Certified Network Professional (CCNP) certification. The topics covered will be more in depth than other introductory-level books of similar topics, and will span from layer 2 technologies such as switching, STP, etherchannel, and trunking, all the way to application layer security topics such as firewall inspection and intrusion prevention systems. Items being covered in the middle will include all the common routing protocols RIP, EIGRP, OSPF and BGP. Many other routing technologies and WAN protocols will be covered including Multicast, MPLS, Cable and DSL. Coverage of redundancy protocols such as HSRP, VRRP and GLBP will be examined. A thorough coverage of convergence topics such as how voice, video and wireless traffic affect the network, and what can be done to improve the effects such as QOS and queuing. This book is a key component for any IT professional preparing for their CCNP certification, as it covers in-depth the topics tested on in all four CCNP exams: Building Scalable Cisco Internetworks (642-901) Building Cisco Multilayer Switched Networks (642-812) Implementing Secure Converged Wide Area Networks (642-825) Optimizing Converged Cisco Networks (642-485) CD includes the exclusive Sybex Test Engine, with two Practice CCNP exams, as well as author code files. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file. Test with success using Spectrum Word Study and Phonics for grade 5! The lessons encourage creativity and strengthen phonics skills by focusing on digraphs, diphthongs, syllables, homophones, idioms, and dictionary skills. The book features full-color illustrations, provides essential tools for achieving reading fluency, and includes an answer key. Today, more than ever, students need to be equipped with the skills required for school achievement and success on proficiency tests. This 176-page book aligns with state and national standards, is perfect for use at home or in school, and is favored by parents, homeschoolers, and teachers. A magnificent new romance by New York Times bestselling author Emma Chase. Dean Walker is all about keeping life simple. He's effortlessly talented and intelligent—spending his summers playing drums in the local band and the rest of the year teaching high school in the same Jersey town where he grew up. He likes his love life simple too, enjoying the commitment-free hook-ups his good looks and sexy charm have always made oh so easy. Then he meets Lainey Burrows. And his simple, easy life gets turned upside down. One wild one-night stand was all it was ever supposed to be, so Lainey is shocked when she discovers that her sizzling summer fling is also her son's new math teacher. But that's nothing compared to the most unexpected twist of all—their hot hook-up left Lainey knocked up, and now they're about to become parents. Together. What ensues is an addictive, insatiable, sweet and tender romance that won't be simple, but it will be more than worth the fight. "This story was fast paced, wickedly sharp and, brought to life by supremely stellar narration, it's another unputdownable story I never wanted to end." —Jessica, Angie and Jessica's Dreamy Reads "Getting Played is equal parts funny, sexy, sweet and moving and is superbly narrated by the well-matched team of Andi Arndt and Zachary Webber, who deftly portray both the lighthearted, humorous banter and the more emotional dialogue and intimate moments. Introducing an extraordinary new voice who shows us how powerful an act of kindness, a hint of magic, and a little hope can be. "A book that reminds us of the kindness we are all capable of." -- Gary D. Schmidt, Newbery Honor winner and author of Okay For Now A well. A wish. And a little drop of hope. Times are tough. Jobs are scarce and miracles are in short supply. But something strange is happening in Cliffs Donnelly, Ohio. An old well has suddenly, impossibly, begun to grant wishes. And three sixth graders are the only ones who know why. Ernest Wilmette believes a good deed makes magic happen. Ryan Hardy thinks they should just mind their own business. Lizzy MacComber believes in facts, not fairy tales. Of course, you don't have to believe in wishes to make one. As more wishes are made, the well's true secret gets harder and harder to keep. Ernest, Ryan, and Lizzy know they can't fix the world. But in their own little corner of it, they can give everyone a little hope... one wish at a time. A Collects simple and unique ideas for managing the classroom, including varying classroom routine, motivating students, and facilitating parent involvement.
