The Eighteenth-Century Fortepiano Grand and Its Patrons Sep 28 2019 “Badura-Skoda addresses the place of the piano in the eighteenth century from the perspective of a scholar and performer” (Eighteenth-Century Music). In the late seventeenth century, Italian musician and inventor Bartolomeo Cristofori developed a new musical instrument—his cembalo che fa il piano e forte, which allowed keyboard players flexible dynamic gradation. This innovation, which came to be known as the hammer-harpsichord or fortepiano grand, was slow to catch on in musical circles. However, as renowned piano historian Eva Badura-Skoda demonstrates, the instrument inspired new keyboard techniques and performance practices and was eagerly adopted by virtuosos of the age, including Scarlatti, J. S. Bach, Clementi, Haydn, Mozart, and Beethoven. Presenting a rich array of archival evidence, Badura-Skoda traces the construction and use of the fortepiano grand across the musical cultures of eighteenth-century Europe, providing a valuable resource for music historians, organologists, and performers. “Badura-Skoda has written a remarkable volume, the result of a lifetime of scholarly research and investigation. . . . Essential.” —Choice

The Music of J. S. Bach Oct 29 2019 This volume contains contributions by nine scholars on two broad themes: the analysis of Johann Sebastian Bach's orchestral works, especially

his concertos, and the interpretation and performance of his music in general. The contributors are a diverse group, active in the fields of performance, organology, music theory, and music history. Several work in more than one of these areas, making them particularly well prepared to write on the interdisciplinary themes of the volume. Part 1 includes Alfred Mann's introduction to Bach's orchestral music as well as essays by Gregory G. Butler and Jeanne Swack on the Brandenburg Concertos. Part 2 offers groundbreaking articles by John Koster and Mary Oleskiewicz on the harpsichords and flutes of Bach's day as well as essays by David Schulenberg and William Renwick on keyboard performance practice and the study of fugue in Bach's circle. Paul Walker explores the relationships between rhetoric and fugue, and John Butt reviews some recent trends in Bach performance.

Baroque Music Feb 11 2021 Research in the 20th and 21st centuries into historical performance practice has changed not just the way performers approach music of the 17th and 18th centuries but, eventually, the way audiences listen to it. This volume, beginning with a 1915 Saint-Sa? lecture on the performance of old music, sets out to capture musicological discussion that has actually changed the way Baroque music can sound. The articles deal with historical instruments, pitch, tuning, temperament, the nexus between technique and style, vibrato, the performance implications of musical scores, and some of the vexed questions relating to rhythmic alteration. It closes with a section on the musicological challenges to the ideology of the early music movement mounted (principally) in the 1990s. Leading writers on historical performance practice are represented. Recognizing that significant developments in historically-inspired performance have been led by instrument makers and performers, the volume also contains

representative essays by key practitioners.

The Organ Music of Johannes Brahms Mar 27 2022 Influenced by Robert and Clara Schumann and Joseph Joachim, Johannes Brahms not only learned to play the organ at the beginning of his career, but also wrote significant compositions for the instrument as a result of his early counterpoint study. He composed for the organ only sporadically or as part of larger choral and instrumental works in his subsequent career. During the final year of his life, however, he returned to pure organ composition with a set of chorale preludes--though many of these are thought to have been revisions of earlier works. Today, the organ works of Johannes Brahms are recognized as beautifully-crafted compositions by church and concert organists across the world and have become a much-cherished component of the repertoire. Until now, however, most scholarly accounts of Brahms's life and work treat

his works for the organ as a minor footnote in his development as a composer. Precisely because the collection of organ works is not extensive, the pieces--composed at different times during Brahms's lifetime--help to map his path as a composer, pinpointing various stages in his artistic development. In this volume, Barbara Owen offers the first in-depth study of this corpus, considering Brahms's organ works in relation to his background, methods, and overall artistic development, his contacts with organs and organists, the influence of his predecessors and contemporaries, and analyses of each specific work and its place in Brahms's career. Her expert history and analysis of Brahms's individual organ works and their interpretation also investigates contemporary practices relative to the performance of these pieces. The book's three valuable appendices present a guide to editions of Brahms's organ works, a discussion of the organ in Brahms's world that highlights some organs the composer would have heard, and a listing of the organ transcriptions of Brahms's work. Blending unique insights into composition and performance practice, this book will be read eagerly by performers, students, and scholars of the organ, Brahms, and the music of the Nineteenth Century.

Company of Pianos Apr 03 2020 This beautifully written history of the piano is at once remarkably informative and uniquely engaging. Performer and historian Richard Burnett traces the development of the piano from its origins to the present day, drawing on keyboard instruments from his internationally known collection, at the Finchcocks Museum in Kent, England. Sixty-one of these instruments, including organs, harpsichords, clavichords, and a wide range of pianos, feature in what amounts to a ground-breaking social history of the piano. Richard Burnett is an international concert pianist who acquired Finchcocks, the beautiful Georgian mansion in 1971 as a home for his collection. His fascinating book ingeniously interweaves the biographies of the pianos with the history of the various manufacturing firms and the remarkable lives of some of the builders and the musicians associated with them, all set against the vividly depicted social backdrop of the periods under review. In the second part of his book, the author looks particularly at how the development of the instruments has influenced the output of the classical composers - Mozart, Haydn, Beethoven, Weber, Schubert and others. The fast-flowing anecdotal style of the writing means that this will be of interest and entertainment to the general reader, as well as those who already have some knowledge of the subject. The book also includes a complimentary CD, in which the music of 33 of the Finchcocks period instruments can be

heard being played by Richard Burnett and Steven Devine."This is a handsome book and it makes a fine coffee-table present for any music and piano lover." John Amis - broadcaster, music presenter, performer and the 'symphony man' in the long-running radio show, 'My Music'."This book is a landmark in music."Alan Hacker, OBE - one of the world's top clarinettists."This is the best book I have read (or heard) on the subject and recommend it highly." Rick Ohlendorf, Piano Tuners Association News"After reading Company of Pianos, I found myself playing Beethoven with a heightened awareness ... and for that alone I am grateful." Angela Hewitt, Times Literary Supplement"Anecdotal, wryly humorous and authoritative ...the text of the Company of Pianos by itself would be an essential purchase for pianophiles. But the standard to which the book has been produced is something else." Jeremy Nicholas, Piano International"Company of Pianos might have been entitled 'In the Company of Richard Burnett'.... For those who do not know him and for us all, this is a work that reveals the delightful and impassioned character of one who has done so much for the historical piano, not only as a player and a collector but also as its advocate and true restorer". Early Music Magazine"The author takes us on a social and historical journey that is entertaining, witty, lucid and informed, but never dull or pedantic. A delight to the mind, the ears and the eyes. The Company of Pianos is good company indeed." Southern California Early Music Society"Every music school, serious pianist, library and early-music enthusiast should have this wonderful volume." Paul James Dwyer, Opus Magazine"... No

music lovers, be they pianists, listeners or historians can afford to be without this fascinating and enlightening book." Charlotte Ellis, Newsletter of the Dolmetch Foundation

Bach, Handel, Scarlatti 1685-1985 Apr 27 2022 1985 celebrated the 300th anniversary of the births of Bach, Handel and Scarlatti. This volume covers all three composers and contains essays from an international team of scholars. Some essays make a contribution towards a better understanding of one or other composer, but at least half of them are concerned with ideas connecting two or even all three of them. The essays are concerned with many aspects of the music - technical, chronological, critical, speculative, theoretical and (importantly) practical - and the distinguished contributors have often endeavoured to ask questions rather than jump to conclusions. Every essay makes fresh points and can open up new avenues for players and (in the broadest sense) students, especially in the present climate of wishing to return to 'authentic conditions of performance'.
