An Introduction to Book History Jul 21 2022 This is a comprehensive introduction to books and print culture which examines the move from the spoken word to written texts, the book as commodity, the power and profile of readers, and the future of the book in an electronic age.

Why Study History? Oct 20 2019 What is the purpose of studying history? How do we reflect on contemporary life from a historical perspective and can such reflection help us better understand ourselves, the world around us, and the God we worship and serve? In this introductory textbook, accomplished historian John Fea shows why Christians should study history, how faith is brought to bear on our understanding of the past, and how studying the past can help us more effectively love God and others. Deep historical thinking can relieve us of our narcissism; cultivate humility, hospitality, and love; and transform our lives more fully into the image of Jesus Christ.

History in the Plural Mar 17 2022 Reinhart Koselleck (1923–2006) was one of most imposing and influential European intellectual historians in the twentieth century. Constantly probing and transgressing the boundaries of mainstream historical writing, he created numerous highly innovative approaches, absorbing influences from other academic disciplines as represented in the work of philosophers and political thinkers like Hans Georg Gadamer and Carl Schmitt and that of

internationally renowned scholars such as Hayden White, Michel Foucault, and Quentin Skinner. An advocate of "grand theory," Koselleck was an inspiration to many scholars and helped move the discipline into new directions (such as conceptual history, theories of historical times and memory) and across disciplinary and national boundaries. He thus achieved a degree of international fame that was unusual for a German historian after 1945. This book not only presents the life and work of a "great thinker" and European intellectual, it also contributes to our understanding of complex theoretical and methodological issues in the cultural sciences and to our knowledge of the history of political, historical, and cultural thought in Germany from the 1950s to the present.

End of History and the Last Man Feb 16 2022 Ever since its first publication in 1992, *The End of History and the Last Man* has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. Now updated with a new afterword, *The End of History and the Last Man* is a modern classic.

The Dawn of Everything Nov 20 2019 INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins

of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. *The Dawn of Everything* fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual

range, animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

The Moon Dec 22 2019 A Sunday Times must read book of 2019 'An out-of-this-world read ... brilliant and compelling. Morton is a high-octane British science journalist, and every chapter is littered with material that strikes, amazes or haunts ... this is a book filled not just with a lifetime's knowledge of its subject but with a lifetime's suppressed excitement.' James McConnachie, Sunday Times Every generation has looked up from the Earth and wondered at the beauty of the Moon. 50 years ago, a few

Americans became the first to do the reverse - with the whole world watching through their eyes. In this short but wide-ranging book, Oliver Morton explores the history and future of humankind's relationship with the Moon. A counterpoint in the sky, it has shaped our understanding of the Earth from Galileo to Apollo. Its gentle light has spoken of love and loneliness; its battered surface of death and the cosmic. For some, it is a future on which humankind has turned its back. For others, an adventure yet to begin. Advanced technologies, new ambitions and old dreams mean that men, women and robots now seem certain to return to the Moon. What will they learn there about the universe, the Earth-and themselves? And, this time, will they stay?

A History of the People's Action Party, 1985-2021

May 07 2021 The People's Action Party (PAP) of Singapore is among the longest-ruling democratically-elected political parties in the world, in power continuously since Singapore gained self-rule in 1959. Such longevity is the product of an institution that is itself dynamic and responsive. But remarkably, the story of the party as institution has not received the sustained study it deserves from either historians or political scientists. This narrative history of the PAP follows the story through decisions made by party leaders as they sought to respond to the changing

demands and expectations of the Singapore electorate over a thirty-year period that saw Singapore enter the ranks of developed nations. The focus is on change in four dimensions: in the communications methods and styles the party adopted, the mechanisms it developed for managing institutional change, the sometimes vexed question of party renewal, and the evolution of economic and social policy. Drawing on internal party documents and multiple interviews with key leaders over the course of a decade, this book provides a detailed portrait of a robust political institution and establishes a distinctive new narrative of Singapore politics.

Index, A History of the: A Bookish Adventure from Medieval Manuscripts to the Digital Age Nov 13 2021
A New York Times Editors' Choice Book Named a Most Anticipated Book of 2022 by Literary Hub and Goodreads A playful history of the humble index and its outsized effect on our reading lives. Most of us give little thought to the back of the book—it's just where you go to look things up. But as Dennis

Duncan reveals in this delightful and witty history, hiding in plain sight is an unlikely realm of ambition and obsession, sparring and politicking, pleasure and play. In the pages of the index, we might find Butchers, to be avoided, or Cows that sh-te Fire, or even catch Calvin in his chamber with a Nonne. Here, for the first time, is the secret world of the index: an unsung but extraordinary everyday tool, with an illustrious but little-known past. Charting its curious path from the monasteries and universities of thirteenth-century Europe to Silicon Valley in the twenty-first, Duncan uncovers how it has saved heretics from the stake, kept politicians from high office, and made us all into the readers we are today. We follow it through German print shops and Enlightenment coffee houses, novelists' living rooms and university laboratories, encountering emperors and popes, philosophers and prime ministers, poets, librarians and—of course—indexers along the way. Revealing its vast role in our evolving literary and intellectual culture, Duncan shows that, for all our anxieties about the Age of Search, we are all index-rakers at heart—and we have been for eight hundred years.

History of Shit Jun 20 2022 "A brilliant account of the politics of shit. It will leave you speechless." Written in Paris after the heady days of student revolt in May 1968 and before the devastation of the AIDS epidemic, *History of Shit* is emblematic of a wild and adventurous strain of 1970s' theoretical writing that attempted to marry theory, politics, sexuality, pleasure, experimentation, and humor. Radically redefining dialectical thought and post-Marxist politics, it takes an important—and

irreverent—position alongside the works of such postmodern thinkers as Foucault, Deleuze, Guattari, and Lyotard. Laporte's eccentric style and ironic sensibility combine in an inquiry that is provocative, humorous, and intellectually exhilarating. Debunking all humanist mythology about the grandeur of civilization, *History of Shit* suggests instead that the management of human waste is crucial to our identities as modern individuals—including the organization of the city, the rise of the nation-state, the development of capitalism, and the mandate for clean and proper language. Far from rising above the muck, Laporte argues, we are thoroughly mired in it, particularly when we appear our most clean and hygienic. Laporte's style of writing is itself an attack on our desire for "clean language." Littered with lengthy quotations and obscure allusions, and adamantly refusing to follow a linear argument, *History of Shit* breaks the rules and challenges the conventions of "proper" academic discourse.

The History Manifesto Oct 12 2021 How should historians speak truth to power – and why does it matter? Why is five hundred years better than five months or five years as a planning horizon? And why is history – especially long-term history – so essential to understanding the multiple pasts which gave rise to our conflicted present? The History Manifesto is a call to arms to historians and everyone interested in the role of history in contemporary society. Leading historians Jo Guldi and David Armitage identify a recent shift back to longer-term narratives, following many decades of increasing specialisation, which they argue is vital for the future of historical scholarship and how it is communicated. This provocative and thoughtful book makes an important intervention in the debate about the role of history and the humanities in a digital age. It will provoke discussion among policymakers, activists and entrepreneurs as well as ordinary listeners, viewers, readers, students and teachers. This title is also available as Open Access.
