Problems and Questions in Physics Jun 10 2021
Contesting Islam, Constructing Race and Sexuality Aug 12 2021 The current political standoffs of the 'War on Terror' illustrate that the interaction within and between the so-called

Western and Middle Eastern civilizations is constantly in flux. A recurring theme however is how Islam and Muslims signify the 'Enemy' in the Western socio-cultural imagination and have become the 'Other' against which the West identifies itself. In a unique and insightful blend of critical race, feminist and post-colonial theory, Sunera Thobani examines how Islam is foundational to the formation of Western identity at critical points in its history, including the Crusades, the Reconquista and the colonial period. More specifically, she explores how masculinity and femininity are formed at such pivotal junctures and what role feminism has played in the wars against 'radical' Islam. Exposing these symbiotic relationships, Thobani explores how the return of 'religion' is reworking the racial, gender and sexual politics by which Western society defines itself, and

more specifically, defines itself against Islam. **Contesting Islam, Constructing Race and Sexuality unpacks conventional as well as unconventional orthodoxies to open up new spaces in how we think about sexual and racial identity in the West and the crucial role that Islam has had and continues to have in its development.**

Achieving sustainable production of poultry meat Volume 1 Mar 27 2020 To meet growing demand, the FAO has estimated that world poultry production needs to grow by 2-3% per year to 2030. Much of the increase in output already achieved has been as a result of improvements in commercial breeds combined with rearing in more intensive production systems. However, more intensive systems and complex supply chains have increased the risk of rapid transmission of animal diseases and zoonoses. Consumer expectations of sensory and nutritional quality have never been higher. At the same time

consumers are more concerned about the environmental impact of poultry production as well as animal welfare. Drawing on an international range of expertise, this book reviews research on safety, quality and sustainability issues in poultry production. Part 1 discusses risks from pathogens, detection and safety management on farms and in slaughterhouse operations. Part 2 looks at ways of enhancing the flavour, colour, texture and nutritional quality of poultry meat. Finally, the book reviews the environmental impact of poultry production. Achieving sustainable production of poultry meat Volume 1: Safety, quality and sustainability will be a standard reference for poultry and food scientists in universities, government and other research centres and companies involved in poultry production. It is accompanied by two further volumes which review

poultry breeding, nutrition, health and welfare.

The National Question and Electoral Politics in Quebec and Scotland Jun 29 2020 In Quebec and Scotland, questions of constitutional change, national identity, and national grievance play an important role in the electoral calculations of political parties and voters. Taking a strong stance on the national question can have strategic benefits both for parties pushing for greater autonomy and for those endorsing the status quo. In this in-depth look at issue voting, authors Éric Bélanger, Richard Nadeau, Ailsa Henderson, and Eve Hepburn examine how the national question affects political parties and voter behaviour in both substate nations. Through party manifestos, interviews with legislators, and opinion survey data, this book demonstrates that calls for constitutional change influence political debate, competition, voter choice, and the outcome of

elections not only within Quebec and Scotland but also across Canada and the United Kingdom. Minority nationalist parties, the authors show, can gain support by claiming ownership of issues with widespread public agreement, such as self-determination and protecting the identity and interests of the nation. A comprehensive analysis of recent electoral politics, *The National Question and Electoral Politics in Quebec and Scotland* greatly enhances our understanding of the electoral impact of substate nationalism.

***Environmental Success Stories* Aug 20 2019 Unlike many titles on environmental issues that portend a dark future, *Environmental Success Stories* delves into the most daunting ecological and environmental challenges humankind has faced and shows how scientists, citizens, and a responsive public sector have dealt**

with them successfully. In addition to presenting the basic chemical and environmental science underlying problems like providing clean drinking water, removing DDT and lead from agriculture and our homes, and curtailing industrial pollution, this book also discusses the political actors, agency regulators, and community leaders who have collaborated to enact effective legislation. Sharing the stories of the people, organizations, and governments who have addressed these problems successfully, Frank M. Dunnivant explains how we might confront the world's largest and most complex environmental crisis: climate change. Now is the time for rededicated scientific exploration and enlightened citizen action to save our environment, and Dunnivant's book offers a stirring call to action.
