Documents on Australian

Foreign Policy: Australia and

Papua New Guinea, 1970-1972:

The transition to self-

governance May 02 2020 This

volume, commissioned by the Department of Foreign Affairs and Trade in the Documents on Australian Foreign Policy series, is the first comprehensive survey of Australia's approach to the world in the 1920s. DFAT Documents on Australian Foreign Policy, Australia and Papua New Guinea, 1970 - 1972 is the second of three volumes on on Papua New Guinea and its transition to self-government. This era saw monumental change in the relationship between Australia and Papua New Guinea as PNG went from a territory firmly controlled by Canberra to self-government in 1975.

Documents outline the role of Australian Prime Minister John Gorton who quickened the pace of change following a visit to PNG by Gough Whitlam at the start of 1970, and the Australian ministers and officials who worked constructively with their PNG counterparts, including Andrew Peacock, at territories minister from early 1972.

Fisheries Subsidies, Sustainable Development and the WTO Mar 31 2020

The fisheries sector is in crisis. Inappropriate subsidies to the fishing industry are a key factor responsible for worldwide fisheries depletion, overcapitalization and ecosystem degradation. There is an urgent need for an international mechanism to promote the appropriate restructuring of fisheries subsidies in order to create a more sustainable industry. In recent years the leading international forum charged with providing such a mechanism has been the World Trade Organization (WTO). This book explains why and how the reform of fisheries subsidies has become one of the most concrete and potentially successful international efforts to achieve

global environmental, economic and developmental policy coherence. It describes the history and current status of the discussions at the WTO, drawing on UNEP's key documents and reflecting on the major issues.

Accompanying the book is a CD-Rom containing full-text versions of the most important source material used in the publication. The book is aimed at a broad stakeholder audience, including policymakers in the fields of trade, fisheries, environmental economics and international environmental governance, as well as academics and others looking for an overview of the fisheries subsidies issue and an introduction to its technical components. Published with the United Nations Environment Programme (UNEP)

**Dynamics of Meteor
Outbursts and Satellite
Mitigation Strategies** Sep 25

2019 The potential threat posed by Leonid meteoroids to orbiting spacecraft over the next several years calls for new dynamic mitigation strategies to assist the satellite community in reducing the danger to its vehicles. This book offers deliberate dynamic mitigation strategies to complement the traditional shielding strategies, providing mission operators additional ways to decrease the danger. Five different attitude control and orbit maneuvering options are examined in detail. The information is presented in algorithmic form to allow technically competent, but meteoroid inexperienced, operators to easily understand the phenomena, assess the danger, and implement procedures. Although general in scope, the book emphasizes the Leonid meteor events of the 1998-2002 timeframe. [Water-supply and Irrigation Papers of the United States Geological Survey](#) Sep 05 2020
