Riedizione del Volume pubblicato nel 2008 (nella I ed. presentato nella Collana "Testo Unico Sicurezza del Lavoro") sul quadro sanzionatorio e sulle regole innovative che governano il sistema istituzionale della vigilanza in materia di sicurezza sul lavoro a seguito dell'entrata in vigore del decreto legislativo 9 aprile 2008, n. 81 (Testo Unico). La riedizione si è resa necessaria in seguito alle rilevanti modifiche introdotte dal decreto correttivo del Testo Unico Sicurezza del Lavoro (D.Lgs. 106/2009). Il volume si presenta suddiviso in varie parti rispettivamente dedicate: all'esame specifico dei nuovi meccanismi istituzionali che governano il complesso fenomeno delle ispezioni e della vigilanza in materia di sicurezza sul lavoro alle linee di sviluppo del nuovo apparato sanzionatorio così come individuato dal d.lgs. n. 81/2008 e successivamente modificato dal d.lgs. 106/2009, con particolare riferimento: al procedimento ispettivo e sanzionatorio, amministrativo e penale, ai limiti di applicabilità dei poteri degli organi di vigilanza (prescrizione, disposizione, diffida), alla lettura dell'apparato punitivo fra contravvenzioni e sanzioni amministrative, alla responsabilità diretta dell'ente, alle condizioni di estinzione agevolata dell'illecito, all'esercizio dei diritti della persona offesa all'analisi dell'apparato sanzionatorio e alla puntuale individuazione di tutte le ipotesi sanzionatorie previste dal nuovo testo unico, anche mediante apposite tabelle che individuano: la fattispecie illecita, la reazione punitiva, le forme di estinzione agevolata dell'illecito Infine viene proposta: la normativa e la prassi amministrativa di principale rilievo, accanto alla modulistica riguardante le fasi principali del procedimento sanzionatorio penale e amministrativo. Bodei segue la distinzione tra oggetti e cose, dove le cose sono ciò verso cui si ha un investimento affettivo, mentre gli oggetti sono semplicemente ciò che si contrappone ai soggetti. Le nature morte, cui Bodei dedica alcune tra le pagine più belle di questo libro, sono la massima espressione della caducità, perché gli oggetti trionfano sulla morte, i soggetti no, a meno che si facciano imbalsamare diventando oggetti resistenti. Maurizio Ferraris, "Il Sole 24 Ore" Questo volume ha qualcosa di eccezionale e sorprendente, anche se parte da un'osservazione che tutti in un certo

momento della vita abbiamo fatto: gli oggetti vivono dentro di noi ma hanno anche una loro vita indipendentemente da noi. Bodei tocca e scioglie una serie di nodi che spesso impigliano la nostra mente e i nostri pensieri. Eugenio Scalfari, "L'espresso" Semplici cose. Oggetti nudi, ancora nuovi o già logori, intatti o consumati, comunque destinati all'insignificanza e alla distruzione. È questo il destino delle cose? O esiste un altro sguardo su di esse, capace in qualche modo di riscattarle dal loro ruolo anonimo e inerte? È questa la domanda, intensa e originale, che pone Remo Bodei in questo libro. Roberto Esposito, "la Repubblica" In this first detailed and comprehensive account of Leopardi's theory of poetry, G. Singh assesses both the literary and critical attainments of a poet whose eminence ranks him with Dante and Petrarch. Singh's analysis, which employs extensive reference to Leopardi's work in order to illustrate the author's own comments, sets forth Leopardi's views on the larger questions of tradition, inspiration, and the imagination in poetry. Later chapters are concerned with the more specific matters of the poetic image, style, and language. The intellectual societies known as Academies played a vital role in the development of culture, and scholarly debate throughout Italy between 1525-1700. They were fundamental in establishing the intellectual networks later defined as the 'République des Lettres', and in the dissemination of ideas in early modern Europe, through print, manuscript, oral debate and performance. This volume surveys the social and cultural role of Academies, challenging received ideas and incorporating recent archival findings on individuals, networks and texts. Ranging over Academies in both major and smaller or peripheral centres, these collected studies explore the interrelationships of Academies with other cultural forums. Individual essays examine the fluid nature of academies and their changing relationships to the political authorities; their role in the promotion of literature, the visual arts and theatre; and the diverse membership recorded for many academies, which included scientists, writers, printers, artists, political and religious thinkers, and, unusually, a number of talented women. Contributions by established international scholars together with studies by younger scholars active in this developing field of research map out new perspectives on the dynamic place of the Academies in early modern Italy. The publication results from the research collaboration 'The Italian Academies 1525-1700: the first intellectual networks of early modern Europe' funded by the Arts and Humanities Research Council and is edited by the senior investigators. La dinamica dei prezzi è uno degli argomenti classici della storia economica. L'attenzione per questo tema fu particolarmente viva a partire dagli anni trenta del novecento, in tutti i paesi europei. I materiali raccolti e pubblicati a quell'epoca continuano a costituire una base documentaria importante per ogni ricerca sull'andamento economico delle economie pre-industriali. L'interesse per i prezzi si ridusse dagli anni settanta agli anni novanta. È ripreso, tuttavia, negli ultimi quindici-venti anni come conseguenza della rinnovata attenzione per il tema della crescita e per i cambiamenti di lungo periodo nelle economie del passato. Il confronto fra i livelli di sviluppo di economie diverse, come quella europea e quella asiatica, insieme con l'uso di strumenti statistici più avanzati nel campo della storia economica, ha rafforzato l'interesse per i prezzi. I contributi presenti in questo volume si articolano intorno a due macro-temi: La formazione dei prezzi nelle economie e società pre-industriali durante i secoli dal XII all'inizio del XIX e il movimento dei prezzi nel lungo periodo, nonché il rapporto esistente con quello di altre variabili economiche e non-economiche, quali la popolazione, la massa monetaria, il prodotto, la produttività, la velocità di circolazione della moneta, i cambiamenti nelle istituzioni. When Archaeology Meets Communities examines the history of nineteenth-century Sicilian archaeology through the archival documentation for the excavations at Tindari, Lipari and nearby minor sites in the Messina province, from Italy's Unification to the end of the First World War (1861-1918). Every legal system, at the outset of court proceedings, has rules aimed at safeguarding parties' interests during the time needed to obtain a

judgment on the merits. However, as the European Commission put the case in a 1997 communication, 'a comparative survey of national legislation reveals that there are virtually no definitions of provisional/protective measures and that the legal situations vary widely. The only convergence that can be ascertained is between the function of such measures.' Recognizing that after almost twenty years the issues noted by the Commission have not found a satisfactory solution, here at last is a book that collects and compares the ideas behind the 'preliminary injunction' (an expression the authors use as a general term for a great variety of provisional and precautionary measures) with an eye to defining and organizing this small but very important aspect of the law. Although the analysis touches on relevant measures from many countries, the authors focus on the national legislation in four EU Member States - England, France, Germany, and Italy - to highlight the nature of the differences these kinds of measures entail. They compare and contrast such aspects as the following: - differences in civil procedure; - the types of measures that may be taken; - the terms on which preliminary injunctions, which are normally directly enforceable, may be ordered by a court; - the kind of assets that may be affected; - the relationship between proceedings in an interlocutory action and proceedings on the substance; - necessity of credible evidence that immediate and irreparable injury, loss, or damage will result if no preliminary injunction is granted; and - the role of protective measures in summary proceedings. The study also describes and examines the recent European order for payment (EC Regulation No. 1896/2006), the most significant existing transnational instrument aimed at granting preliminary protection of creditors' rights. This incomparable book represents a major contribution to a growing debate, particularly in Europe, on ways and means of securing equivalent protection for all litigants. Given the variety of legal systems and of measures available, the debate will have to focus on the functions served by provisional/protective measures, the minimum conditions to be satisfied, the adversary procedure requirement, the enforceability of the measures, and possible redress procedures. There is no more thorough and reliable resource available to clarify these issues for practitioners and interested policymakers everywhere. For the last decade, early modern studies have significantly been reshaped by raising new and different questions on the uses of religion. This 'religious turn' has generated new discussion of the social processes at work in early modern Europe and their cultural effects - from the struggle over religious rites and doctrines to the persecution of secret adherents to forbidden practices. The issue of religious pluralisation has been mostly debated in terms of dissent and escalation. But confessional controversy did not always erupt into hostilities over how to symbolize and perform the sacred nor lead to a paralysis of social agency. The order of the day may often have been to suspend confessional allegiances rather than enforce religious conflict, suggesting a pragmatic rather than polemic handling of religious plurality. This raises the urgent question of how 'normal' transconfessional and even transreligious interaction was produced in a context of highly sharpened and always present reflexivity on religious differences. Our volume takes up this question and explores it from an interdisciplinary and interconfessional perspective. The title "Forgetting Faith?" raises the question whether it was necessary or indeed possible to sidestep religious issues in specific contexts and for specific purposes. This does not mean, however, to describe early modern culture as a process of secularization. Rather, the collection invites discussion of the specific ways available to deal with confessional conflict in an oblivional mode, precisely because faith still mattered more than many other social paradigms emerging at that time, such as nationhood, ethnic origin or class defined through property.
