10 Mindframes for Visible Learning Mar 04 2020 The original Visible Learning research concluded that one of the most important influencers of student achievement is how teachers think about learning and their own role. In Ten Mindframes for Visible Learning, John Hattie and Klaus Zierer define the ten behaviors or mindframes that teachers need to adopt in order to maximize student success. These include: thinking of and evaluating your impact on students' learning; the importance of assessment and feedback for teachers; working collaboratively and the sense of community; the notion that learning needs to be challenging; engaging in dialogue and the correct balance between talking and listening; conveying the success criteria to learners; building positive relationships. These powerful mindframes, which should underpin every action in schools, are founded on the principle that teachers are evaluators, change agents, learning experts, and seekers of feedback who are constantly engaged with dialogue and challenge. This practical guide, which includes questionnaires, scenarios, checklists, and exercises, will show any school exactly how to implement Hattie's mindframes to maximize success.

10% Happier Apr 04 2020 #1 New York Times Bestseller and winner of the 2014 Living Now Book Award for Inspirational Memoir. 'An enormously smart, clear-eyed, brave-hearted, and quite a personal look at the benefits of meditation' - Elizabeth Gilbert, author of Eat, Pray, Love 'Dan Harris skilfully demystifies meditation, reminding us all that a healthy and happy mind is not only essential for our own sanity, but also for those around us. More importantly, he provides a compelling invitation to move beyond words, from the idea to the experience. A wonderful book and excellent advice.' - Andy Puddicombe, founder of Headspace 10% Happier is a spiritual book written for - and by - someone who would otherwise never read a spiritual book. It is both a deadly serious and seriously funny look at mindfulness and meditation as the next big public health revolution. Dan Harris always believed the restless, relentless, impossible-to-satisfy voice in his head was one of his greatest assets. How else can you climb the ladder in an ultra-competitive field like TV news except through nonstop hand-wringing and hyper vigilance? For a while, his strategy worked. Harris anchored national broadcasts and he covered wars. Then he hit the brakes, and had a full-blown panic attack live on the air. What happened next was completely unforeseen. Through a bizarre series of events - involving a disgraced evangelical pastor, a mysterious self-help guru and a fateful gift from his wife - Harris stumbled upon something that helped him tame the voice in his head: meditation. At first, he was deeply suspicious. He had long associated meditation with bearded swamis and unwashed hippies. But when confronted with mounting scientific evidence that just a few minutes a day can literally rewire the brain for focus, happiness and reduced reactivity, Harris took a deep dive. He spent years mingling with scientists, executives and marines on the front lines of a quiet revolution that has the potential to reshape society. He became a daily meditator, and even found himself on a ten-day, silent meditation retreat, which was simultaneously the best and worst experience he'd ever had. Harris's life was not transformed into a parade of rainbows and unicorns, but he did gain a passion for daily meditation. While the book itself is a narrative account of Dan's conversion amid the harried and decidedly non-Zen world of the newsroom, it concludes with a section for the novice on how to get started.
