*ICT in Education* Oct 29 2019 This book presents a peer reviewed selection of extended versions of ten original papers that were presented at the 15th International Symposium on Computers in Education (SIIE 2013) held in Viseu, Portugal. The book provide a representative view of current Information and Communications Technology (ICT) educational research approaches in the Ibero-American context as well as internationally. It includes studies that range from elementary to higher education, from traditional to distance learning settings. It considers special needs and other inclusive issues, across a range of disciplines, using multiple and diverse perspectives and technologies to furnish detailed information on the latest trends in ICT and education globally. Design, development and evaluation of educational software; ICT use and evaluation methodologies; social web and collaborative systems; and learning communities are some of the topics covered.

*Exotic Betting* Aug 27 2019 In "Exotic Betting," the horseplayer takes a colorful wagering ride by learning to maximize profits by betting on a multitude of exotic wagers including the daily double, exacta, trifecta, quinella, superfecta, pick 3, 4, and 6.

**Actionable Agile Metrics for Predictability** Jul 07 2020 "When will it be done?" That is probably the first question your customers ask you once you start working on something for them. Think about how many times you have been asked that question. How many times have you ever actually been right? We can debate all we want whether this is a fair question to ask given the tremendous amount of uncertainty in knowledge work, but the truth of the matter is that our customers are going to inquire about completion time whether we like it or not. Which means we need to come up with an accurate way to answer them. The problem is that the forecasting tools that we currently utilize have made us ill-equipped to provide accurate answers to reasonable customer questions. Until now. Topics Include Why managing for flow is the best strategy for predictability-including an introduction to Little's Law and its implications for flow. A definition of the basic metrics of flow and how to properly visualize those metrics in analytics like Cumulative Flow Diagrams and Scatterplots. Why your process policies are the potentially the biggest reason that you are unpredictable.

Managed Code Rootkits Jun 29 2022 Managed Code Rootkits is the first book to cover application-level rootkits and other types of malware inside the application VM, which runs a platform-independent programming environment for processes. The book, divided into four parts, points out high-level attacks, which are developed in intermediate language. The initial part of the book offers an overview of managed code rootkits. It explores environment models of managed code and the relationship of managed code to rootkits by studying how they use application VMs. It also discusses attackers of managed code rootkits and various attack scenarios. The second part of the book covers the development of managed code rootkits, starting with the tools used in producing managed code rootkits through their deployment. The next part focuses on countermeasures that can possibly be used against managed code rootkits, including technical solutions, prevention, detection, and response tactics. The book concludes by presenting techniques that are somehow similar to managed code rootkits, which can be used in solving problems. Named a 2011 Best Hacking and Pen Testing Book by InfoSec Reviews Introduces the reader briefly to managed code environments and rootkits in general Completely details a new type of rootkit hiding in the application level and demonstrates how a hacker can change language runtime implementation Focuses on managed code including Java, .NET, Android Dalvik and reviews malware development scanarios

*Seven Layers of Social Media Analytics* Jan 05 2023 The book offers concepts, tools, tutorials, and case studies that business managers need to extract and analyze the seven layers of social media data, including text, actions, networks, apps, hyperlinks, search engines, and location layers. Social media analytics is about converting unstructured social media data into meaningful business insights. By the end of this book, you will have mastered the concepts, techniques, and tools used to extract business insights from social media that help increase brand loyalty, generate leads, drive traffic, and ultimately make good business decisions. The book is non-technical in nature best suited for business managers, owners, consultants, students, and professors, etc. Here is how the book is structured: Chapter 1: The Seven Layers of Social Media Analytics Chapter 2: Understanding Social Media Chapter 3: Social Media Text Analytics Chapter 4: Social Media Network Analytics Chapter 5: Social Media Actions Analytics Chapter 6: Social Media Apps Analytics Chapter 7: Social Media Hyperlinks Analytics Chapter 8: Social Media Location Analytics Chapter 9: Social Media Search Engine Analytics Chapter 10: Aligning Social Media Analytics with Business Goals The book also comes with a companion site (<http://7layersanalytics.com/>) which offers Updated Tutorials, Power-Point Slide, Case Studies, Sample Data, and Syllabus.

*The Cloud-Based Demand-Driven Supply Chain* Apr 27 2022 It's time to get your head in the cloud! In today's business environment, more and more people are requesting cloud-based solutions to help solve their business challenges. So how can you not only anticipate your clients' needs but also keep ahead of the curve to ensure their goals stay on track? With the help of this accessible book, you'll get a clear sense of cloud computing and understand how to communicate the benefits, drawbacks, and options to your clients so they can make the best choices for their unique needs. Plus, case studies give you the opportunity to relate real-life examples of how the latest technologies are giving organizations worldwide the opportunity to thrive as supply chain solutions in the cloud. Demonstrates how improvements in forecasting, collaboration, and inventory optimization can lead to cost savings Explores why cloud computing is becoming increasingly important Takes a close look at the types of cloud computing Makes sense of demand-driven forecasting using Amazon's cloud Whether you work in management, business, or IT, this is the dog-eared reference you'll want to keep close by as you continue making sense of the cloud.

**The Main Street Vegan Academy Cookbook** Oct 22 2021 When someone goes vegan on Park Avenue or Beverly Drive, they have a private chef and a personal assistant to do the troubleshooting. When we make the shift on Main Street, we could use some help, too. For nearly six years, acclaimed author, speaker, podcaster, and Main Street Vegan Academy director, Victoria Moran, has trained individuals to become vegan lifestyle coaches and educators. Now, Victoria has teamed up with one her Academy alums turned faculty member, cookbook author, culinary instructor, and radio host, JL Fields, to bring that very same coaching to you. In The Main Street Vegan Academy Cookbook, Victoria and JL, along with over a hundred certified vegan lifestyle coaches, join you in the kitchen as you discover more than 100 of their favorite plant-sourced recipes. Whether you're new to the diet or a seasoned plant-based eater, vegan or just veg-curious, their tips, tricks, shortcuts, and strategies will transform your cooking, your eating, and your life. Inside, you'll find wholesome, delectable, and accessible recipes like: • PB&J Sammie Smoothie • Sweet Red Chili Potato Skins • Pepperoni Pizza Puffs • Avocado-Cucumber Soup • Cranberry-Kale Pilaf • Crisp Mocha Peanut Butter Bars Anchored in compassion, The Main Street Vegan Academy Cookbook is more than a cookbook; it's a complete guide to going vegan, from FAQs, troubleshooting, and menu plans to inspiration and innovations for navigating the culinary, nutritional, and social landscape of plant-based eating. Embrace a healthier, more compassionate you, with Victoria, JL, and the rest of the Main Street Vegan Academy coaches by your side.

**Digital-Forensics and Watermarking** May 17 2021 This book constitutes the thoroughly refereed post-conference proceedings of the 13th International Workshop on Digital-Forensics and Watermarking, IWDW 2014, held in Taipei, Taiwan, during October 2014. The 32 full and 14 poster papers, presented together with 1 keynote speech, were carefully reviewed and selected from 79 submissions. The papers are organized in topical sections on forensics; watermarking; reversible data hiding; visual cryptography; and steganography and steganalysis.

Lessons Learned in Software Testing Dec 04 2022 Decades of software testing experience condensed into the most important lessons learned. The world's leading software testing experts lend you their wisdom and

years of experience to help you avoid the most common mistakes in testing software. Each lesson is an assertion related to software testing, followed by an explanation or example that shows you the how, when, and why of the testing lesson. More than just tips, tricks, and pitfalls to avoid, *Lessons Learned in Software Testing* speeds you through the critical testing phase of the software development project without the extensive trial and error it normally takes to do so. The ultimate resource for software testers and developers at every level of expertise, this guidebook features:

- \* Over 200 lessons gleaned from over 30 years of combined testing experience
- \* Tips, tricks, and common pitfalls to avoid by simply reading the book rather than finding out the hard way
- \* Lessons for all key topic areas, including test design, test management, testing strategies, and bug reporting
- \* Explanations and examples of each testing trouble spot help illustrate each lesson's assertion

**Affordable Excellence** Mar 15 2021 This is the story of the Singapore healthcare system: how it works, how it is financed, its history, where it is going, and what lessons it may hold for national health systems around the world. Singapore ranks sixth in the world in healthcare outcomes, yet spends proportionally less on healthcare than any other high-income country. This is the first book to set out a comprehensive system-level description of healthcare in Singapore, with a view to understanding what can be learned from its unique system design and development path. The lessons from Singapore will be of interest to those currently planning the future of healthcare in emerging economies, as well as those engaged in the urgent debates on healthcare in the wealthier countries faced with serious long-term challenges in healthcare financing. Policymakers, legislators, public health officials responsible for healthcare systems planning, finance and operations, as well as those working on healthcare issues in universities and think tanks should understand how the Singapore system works to achieve affordable excellence.

**Impact Mapping** Oct 10 2020 A practical guide to impact mapping, a simple yet incredibly effective method for collaborative strategic planning that helps organizations make an impact with software.

*Notes on Architecture* Jun 17 2021 A concise introduction to architecture including the definition of problems, evaluation of alternatives, and the implementing of solutions. More than 125 line drawings and sketches.

**Calibre Manual** Mar 03 2020 Calibre is an ebook library manager. It can view, convert and catalog ebooks in most of the major ebook formats. It can also talk to many ebook reader devices. It can go out to the Internet and fetch metadata for your books. It can download newspapers and convert them into ebooks for convenient reading. It is cross platform, running on Linux, Windows and OS X.

**Daily Painting** Oct 02 2022 A unique system for jump-starting artistic creativity, encouraging experimentation and growth, and increasing sales for artists of all levels, from novices to professionals. Have you landed in a frustrating rut? Are you having trouble selling paintings in galleries, getting bogged down by projects you can't seem to finish or abandon, or finding excuses to avoid working in the studio? Author Carol Marine knows exactly how you feel—she herself suffered from painter's block, until she discovered "daily painting." The idea is simple: do art (usually small) often (how often is up to you), and if you'd like, post and sell it online. Soon you'll find that your block dissolves and you're painting work you love—and more of it than you ever thought possible! With her encouraging tone and useful exercises, Marine teaches you to:

- Master composition and value
- Become confident in any medium including oil painting, acrylic painting, watercolors, and other media
- Choose subjects wisely
- Stay fresh and loose
- Photograph, post, and sell your art online
- Become connected to the growing movement of daily painters around the world

**Scrum Insights for Practitioners** Sep 28 2019 Hiren Doshi, Scrum.org Professional Scrum Trainer & Coach in his book, *Scrum Insights for Practitioners: The Scrum Guide Companion* helps the practitioners master the Scrum framework by gaining in-depth practical insights and helps answer questions like: What are some common myths, mysteries, and misconceptions of Scrum? The Scrum Guide recommends three to nine members in a Development Team, but we have fifteen members. Is this Scrum? Can you share some tactics to do effective Sprint Planning, Daily Scrum, Sprint Review, Sprint Retrospective, and Product Backlog Refinement? My designation is development manager. Does this mean I have no role in Scrum? How is Scrum Empirical? Can Scrum Master and Product Owner be the same person? We don't have a Scrum Master. Are we still practicing Scrum? What does Self-Organization really mean? How does Scrum embrace the four values and twelve principles of the Agile Manifesto? Please share a case study on Scrum based product development? Recommendations for the book from the Scrum champions Take advantage of Hiren's vast experience and avoid making the common errors people make as they begin their journey. This book contains a wealth of practical information that will be useful to readers as they work to implement the basic theory found in *The Scrum Guide*-Steve Porter, team member, Scrum.org In his book *Scrum Insights for Practitioners*, Hiren has extended the core rules of *The Scrum Guide* with practices he has found useful. Hiren answers questions regarding Scrum that potentially remain unanswered even after one reads *The Scrum Guide*. Hiren dismantles common misconceptions about Scrum, regardless of the source of such misconceptions. Hiren elaborates on basic information provided in *The Scrum Guide*, as well as on the principles underlying Scrum-Gunther Verheyen, Author of "*Scrum - A Pocket Guide, a Smart Travel Companion*" Hiren Doshi has written a fine companion to *The Scrum Guide*, filling in some of the intentional gaps left in the Scrum framework. Using this companion along with *The Scrum Guide* will undoubtedly improve the outlook for those teams that internalize its teachings."-Charles Bradley, ScrumCrazy.com This book will help you understand the nuances of Scrum. It takes a very practical approach toward implementing Scrum without compromising on its values and principles. A useful and handy reference for Scrum practitioners!-Gopinath R, Agile coach and practitioner

**The Rainbow Troops** Jul 19 2021 Published in Indonesia in 2005, *The Rainbow Troops*, Andrea Hirata's closely autobiographical debut novel, sold more than five million copies, shattering records. Now it promises to captivate audiences around the globe. Ikal is a student at the poorest village school on the Indonesian island of Belitung, where graduating from sixth grade is considered a remarkable achievement. His school is under constant threat of closure. In fact, Ikal and his friends—a group nicknamed the Rainbow Troops—face threats from every angle: skeptical government officials, greedy corporations hardly distinguishable from the colonialism they've replaced, deepening poverty and crumbling infrastructure, and their own low self-confidence. But the students also have hope, which comes in the form of two extraordinary teachers, and Ikal's education in and out of the classroom is an uplifting one. We root for him and his friends as they defy the island's powerful tin mine officials. We meet his first love, the unseen girl who sells chalk from behind a shop screen, whose pretty hands capture Ikal's heart. We cheer for Lintang, the class's barefoot math genius, as he bests the students of the mining corporation's school in an academic challenge. Above all, we gain an intimate acquaintance with the customs and people of the world's largest Muslim society. This is classic storytelling in the spirit of Khaled Hosseini's *The Kite Runner*: an engrossing depiction of a milieu we have never encountered before, bursting with charm and verve.

**Hav** Apr 03 2020 A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

*UX Storytellers - Connecting the Dots* Dec 24 2021

**Introduction to Trading Psychology** Jan 13 2021 Mike describes the foundation of building a successful career in trading around the three essential pillars of technology, strategy, and psychology. While technology and strategy may seem like the ideal place to the majority of your time perfecting, it truly is the focus on the psychology pillar that will bring your trading to an entirely different level. Join Mike and Andrew as they explore

how the mind affects your trading performance. The practical guide is broken down into six parts to assist you in discovering the concepts associated with trading psychology. During part 1, you will embark on a journey which explores the challenges of trading, self-evaluation, and how to determine your trader personality. Mike will then put you in the front row of learning about how your mind deals with uncertainty and how it affects your decision-making process. Part 3, you see the importance of discipline in the trading and why some people who are well-disciplined in a particular profess does not necessarily carry over into being a well-disciplined trader. The next part introduces you concept of remaining mindful and in the present moment while you are analyzing the market prior, during, and after a trade. Part 5 covers the inevitable feeling of doubt during a drawdown, and how the attribute of mental resilience plays a vital role in recovering your emotional capital. Finally, the book concludes with the often forgotten about aspect of living a healthy lifestyle and the impacts it has on your trading account.

The Nexus Framework for Scaling Scrum Sep 01 2022 Improve and Accelerate Software Delivery for Large, Distributed, Complex Projects The Nexus Framework is the simplest, most effective approach to applying Scrum at scale across multiple teams, sites, and time zones. Created by Scrum.org—the pioneering Scrum training and certification organization founded by Scrum co-creator Ken Schwaber—Nexus draws on decades of experience to address the unique challenges teams face in coming together, sharing work, and managing and minimizing dependencies. The Nexus™ Framework for Scaling Scrum is a concise book that shows how Nexus helps teams to deliver a complex, multi-platform, software-based product in short, frequent cycles, without sacrificing consistency or quality, and without adding unnecessary complexity or straying from Scrum’s core principles. Using an extended case study, the authors illustrate how Nexus helps teams solve common scaling challenges like reducing cross-team dependencies, preserving team self-organization and transparency, and ensuring accountability. Understand the challenges of delivering working, integrated product increments with multiple teams, and how Nexus addresses them Form a Nexus around a new or existing product and learn how that Nexus sets goals and plans its work Run Sprints within a Nexus, provide transparency into progress, conduct effective Nexus Sprint reviews, and use Nexus Sprint Retrospectives to continuously improve Overcome the distributed team collaboration challenges

Innovation in Public Sector Services Feb 23 2022 This is a timely and important contribution on innovation processes within the public sector. Departing from the myth of private equal to entrepreneurial, public equal to bureaucratic paralysis , it offers precious insights into public sector learning, entrepreneurship, of course inertias, and also the trade-offs involved in different management philosophies and performance evaluation methods. It is a rare example of political economy done right . Giovanni Dosi, Sant Anna School of Advanced Studies, Pisa Innovation and entrepreneurship have become the cornerstones for economic growth, jobs and competitiveness in the global economy. However, the burden for generating an innovative economy has fallen on the private sector. Scholars have been remarkably taciturn concerning the role for innovation and entrepreneurship in the public sector has remained strikingly invisible. No more. In Innovation in Public Sector Services, the authors assemble a team of leading international scholars in a path breaking study to identify the potential for the public sector in contributing to innovation and entrepreneurship. In particular, the volume introduces an insightful new analytical framework that lays the foundations for transforming a sleepy public sector into a dynamic, innovative and highly effective partner for leadership and change in the global era. Scholars, policy makers and business leaders who think that the public sector is condemned to being a hindrance to innovation and entrepreneurship rather than a leader championing change and competitiveness in a global economy would be well advised to read this important new book. David B. Audretsch, Indiana University, Bloomington, US and WHU, Germany This groundbreaking book provides new key insights and opens up an important research agenda. The book develops a new taxonomy of the different types of innovation found in public sector services, and investigates the key features and drivers of public sector entrepreneurship. The book contains new statistical studies and a set of six international case studies in health and social services. The research shows that public sector organisations are important innovators in their own right. Economic growth and social development depend on efficient public sector organisations that deliver high quality services, are effectively organised, and have excellent interactions with the private sector, NGOs and citizens. Public sector innovation is complex, invariably involving changes in services, organisational structures, and managerial practices. Essential to successful innovation are the policy entrepreneurs and service entrepreneurs who develop, organise and manage new innovations. This book provides key lessons for these public sector entrepreneurs. Innovation in Public Sector Services fills a fundamental gap; explaining the dynamics of innovation and entrepreneurship in public sector services and is of great importance for researchers, academics and students interested in innovation, entrepreneurship and strategy management. It provides a stimulating read for anyone working or interested in health and social services.

Blockchain Nov 30 2019 The internet was envisaged as a decentralised global network, but in the past 25 years it has come to be controlled by a few, very powerful, centralised companies. Blockchain is a technological paradigm shift that allows secure, reliable, and direct information transfer between individuals, organisations, and things, so that we can manage, verify, and control the use of our own data. Blockchain also offers a new opportunity for humanity to fix some major problems. It can authenticate data, manage its analysis, and automate its use. With better data comes better decision-making. In this way, Blockchain can contribute to solving climate change, reduce voting fraud, fix our identity systems, improve fair trade, and give the poor an opportunity to improve their lives by monetising their (digital) capital. A world built upon peer-to-peer transactions and smart contracts can empower individuals and communities. This book offers a fresh perspective with which to consider this transformative technology. It describes how Blockchain can optimise the processes that run our society. It provides practical solutions to global problems and offers a roadmap to incorporate Blockchain in your business. It offers a blueprint for a better world. Filled with easy-to-understand examples, this book shows how Blockchain can take over where the internet has fallen short.

Prototyping Nov 10 2020 Prototyping is a great way to communicate the intent of a design both clearly and effectively. Prototypes help you to flesh out design ideas, test assumptions, and gather real-time feedback from users. With this book, Todd Zaki Warfel shows how prototypes are more than just a design tool by demonstrating how they can help you market a product, gain internal buy-in, and test feasibility with your development team.

The Network Control Center Jun 05 2020

50 Markets of Illustration Nov 03 2022 This overview of the numerous markets that currently exist for illustrators reveals a vast and wide-ranging pool of potential freelance opportunities. This reference catalogs many lesser-known, supplementary markets beyond the traditional, more-populated avenues for illustration assignments. Features fifty specialized markets in which artists and illustrators can potentially prosper.

**How to Day Trade for a Living** Aug 20 2021 Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I

sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. In *How to Day Trade for a Living*, I will show you how you too can take control over your life and have success in day trading on the stock market. I love teaching. It's my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to launch yourself into day trading on the stock market. This book is definitely NOT a difficult, technical, hard to understand, complicated and complex guide to the stock market. It's concise. It's practical. It's written for everyone. You can learn how to beat Wall Street at its own game. And, as a purchaser of my book, you will also receive a membership in my community of day traders at [www.vancouver-traders.com](http://www.vancouver-traders.com). You can monitor my screen in real time, watch me trade the strategies explained in his book, and ask questions of me and other traders in our private chat room. I invite you to join me in the world of day trading. I'm a real person who you can connect with. I'm not just a photograph here on the Amazon site. I love what I do. You can follow my blog post under Author Updates on my Author page on Amazon. It's honest. You'll see I lose some days. You can read the reviews of my book. I know you will learn much about day trading and the stock market from studying my book. You can join at no cost and with no obligation my community of day traders at [www.vancouver-traders.com](http://www.vancouver-traders.com). You can ask us questions. Practical, hands-on knowledge. That's *How to Day Trade for a Living*.

*Essential Software Architecture* Sep 08 2020 Job titles like "Technical Architect" and "Chief Architect" nowadays abound in software industry, yet many people suspect that "architecture" is one of the most overused and least understood terms in professional software development. Gorton's book tries to resolve this dilemma. It concisely describes the essential elements of knowledge and key skills required to be a software architect. The explanations encompass the essentials of architecture thinking, practices, and supporting technologies. They range from a general understanding of structure and quality attributes through technical issues like middleware components and service-oriented architectures to recent technologies like model-driven architecture, software product lines, aspect-oriented design, and the Semantic Web, which will presumably influence future software systems. This second edition contains new material covering enterprise architecture, agile development, enterprise service bus technologies, RESTful Web services, and a case study on how to use the MeDICi integration framework. All approaches are illustrated by an ongoing real-world example. So if you work as an architect or senior designer (or want to someday), or if you are a student in software engineering, here is a valuable and yet approachable knowledge source for you.

**Lean UX** Apr 15 2021 UX design has traditionally been deliverables-based. Wireframes, site maps, flow diagrams, content inventories, taxonomies, mockups helped define the practice in its infancy. Over time, however, this deliverables-heavy process has put UX designers in the deliverables business. Many are now measured and compensated for the depth and breadth of their deliverables instead of the quality and success of the experiences they design. Designers have become documentation subject matter experts, known for the quality of the documents they create instead of the end-state experiences being designed and developed. So what's to be done? This practical book provides a roadmap and set of practices and principles that will help you keep your focus on the the experience back, rather than the deliverables. Get a tactical understanding of how to successfully integrate Lean and UX/Design; Find new material on business modeling and outcomes to help teams work more strategically; Delve into the new chapter on experiment design and Take advantage of updated examples and case studies.

*EDA for IC Implementation, Circuit Design, and Process Technology* Aug 08 2020 Presenting a comprehensive overview of the design automation algorithms, tools, and methodologies used to design integrated circuits, the Electronic Design Automation for Integrated Circuits Handbook is available in two volumes. The second volume, EDA for IC Implementation, Circuit Design, and Process Technology, thoroughly examines real-time logic to GDSII (a file format used to transfer data of semiconductor physical layout), analog/mixed signal design, physical verification, and technology CAD (TCAD). Chapters contributed by leading experts authoritatively discuss design for manufacturability at the nanoscale, power supply network design and analysis, design modeling, and much more. Save on the complete set.

*The Organisation of Tomorrow* May 05 2020 The Organisation of Tomorrow presents a new model of doing business and explains how big data analytics, blockchain and artificial intelligence force us to rethink existing business models and develop organisations that will be ready for human-machine interactions. It also asks us to consider the impacts of these emerging information technologies on people and society. Big data analytics empowers consumers and employees. This can result in an open strategy and a better understanding of the changing environment. Blockchain enables peer-to-peer collaboration and trustless interactions governed by cryptography and smart contracts. Meanwhile, artificial intelligence allows for new and different levels of intensity and involvement among human and artificial actors. With that, new modes of organising are emerging: where technology facilitates collaboration between stakeholders; and where human-to-human interactions are increasingly replaced with human-to-machine and even machine-to-machine interactions. This book offers dozens of examples of industry leaders such as Walmart, Telstra, Alibaba, Microsoft and T-Mobile, before presenting the D2 + A2 model - a new model to help organisations datafy their business, distribute their data, analyse it for insights and automate processes and customer touchpoints to be ready for the data-driven and exponentially-changing society that is upon us This book offers governments, professional services, manufacturing, finance, retail and other industries a clear approach for how to develop products and services that are ready for the twenty-first century. It is a must-read for every organisation that wants to remain competitive in our fast-changing world.

**Foundations of Topology** May 29 2022 Topology is a branch of pure mathematics that deals with the abstract relationships found in geometry and analysis. Written with the mature student in mind, *Foundations of Topology, Second Edition*, provides a user-friendly, clear, and concise introduction to this fascinating area of mathematics. The author introduces topics that are well motivated with thorough proofs that make them easy to follow. Historical comments are dispersed throughout the text, and exercises, varying in degree of difficulty, are found at the end of each chapter. *Foundations of Topology* is an excellent text for teaching students how to develop the skill to write clear and precise proofs.

**Essential Electronic Design Automation (EDA)** Jan 31 2020 & Describes the engineering needs addressed by the individual EDA tools and covers EDA from both the provider and user viewpoints. & & Learn the importance of marketing and business trends in the EDA industry. & & The EDA consortium is made up of major corporations including SUN, HP, and Intel.

**The Definitive Guide to Django** Sep 20 2021 Django, the Python-based Web development framework, is one of the hottest topics in Web development today. Its creator (and co-author of this book) Adrian Holovaty has built a compelling array of Web applications using Django, including <http://chicagocrime.org>. Django creator Adrian Holovaty and lead developer Jacob Kaplan-Moss have created this book as the definitive guide to the technology. Beginning with fundamentals such as installation and configuration, the book tackles sophisticated features of Django, such as outputting non-HTML content such as RSS feeds and PDFs, caching, and user management. Also includes a detailed reference to Django's many configuration options and commands.

*The Success Equation* Jan 25 2022 Examines the importance of skill and luck, describes how to develop analytical tools to understand them, and offers suggestions on putting these findings to work to achieve success.

[Cashing in with Content](#) Nov 22 2021 Written by a Web marketing expert, "Cashing In with Content" interviews 20 of today's most innovative Web marketers and shares their secrets for using content to turn browsers into buyers. It also shows how to encourage repeat business and reveals how to unleash the amazing power of viral marketing.

**Critical Genre Analysis** Feb 11 2021 Genre theory has focused primarily on the analysis of generic constructs, with increasing attention to and emphasis on the contexts in which such genres are produced, interpreted, and used to achieve objectives, often giving the impression as if producing genres is an end in itself, rather than a means to an end. The result of this focus is that there has been very little attention paid to

the ultimate outcomes of these genre-based discursive activities, which are more appropriately viewed as academic, institutional, organizational, and professional actions and practices, which are invariably non-discursive, though often achieved through discursive means. It was this objective in mind that the book develops an approach to a more critical and deeper understanding of interdiscursive professional voices and actions. Critical Genre Analysis as a theory of discursive performance is thus an attempt to be as objective as possible, rigorous in analytical endeavour, using a multiperspective and multidimensional methodological framework taking into account interdiscursive aspects of genre construction to make it increasingly explanatory to demystify discursive performance in a range of professional contexts.

**Weird But True 1: Expanded Edition** Jan 01 2020 Offers a collection of true facts about animals, food, science, pop culture, outer space, geography, and weather.

Efficiently Inefficient Mar 27 2022 Efficiently Inefficient describes the key trading strategies used by hedge funds and demystifies the secret world of active investing. Leading financial economist Lasse Heje Pedersen combines the latest research with real-world examples and interviews with top hedge fund managers to show how certain trading strategies make money--and why they sometimes don't. Pedersen views markets as neither perfectly efficient nor completely inefficient. Rather, they are inefficient enough that money managers can be compensated for their costs through the profits of their trading strategies and efficient enough that the profits after costs do not encourage additional active investing. Understanding how to trade in this efficiently inefficient market provides a new, engaging way to learn finance. Pedersen analyzes how the market price of stocks and bonds can differ from the model price, leading to new perspectives on the relationship between trading results and finance theory. He explores several different areas in depth--fundamental tools for investment management, equity strategies, macro strategies, and arbitrage strategies--and he looks at such diverse topics as portfolio choice, risk management, equity valuation, and yield curve logic. The book's strategies are illuminated further by interviews with leading hedge fund managers: Lee Ainslie, Cliff Asness, Jim Chanos, Ken Griffin, David Harding, John Paulson, Myron Scholes, and George Soros.

**The Semantic Web - ISWC 2019** Jul 31 2022 The two-volume set of LNCS 11778 and 11779 constitutes the refereed proceedings of the 18th International Semantic Web Conference, ISWC 2019, held in Auckland, New Zealand, in October 2019. The ISWC conference is the premier international forum for the Semantic Web / Linked Data Community. The total of 74 full papers included in this volume was selected from 283 submissions. The conference is organized in three tracks: for the Research Track 42 full papers were selected from 194 submissions; the Resource Track contains 21 full papers, selected from 64 submissions; and the In-Use Track features 11 full papers which were selected from 25 submissions to this track. The chapter "The SEPSES knowledge graph: An integrated resource for cybersecurity" is open access under a CC BY 4.0 license at [link.springer.com](http://link.springer.com).
