CAPITAL MARKET TOP SECRET Jun 23 2022 Sejak otoritas pasar modal dialihkan dari Bapepam-LK kepada Otoritas Jasa Keuangan (OJK), perkembangan Pasar Modal Indonesia semakin baik. OJK adalah lembaga negara yang bersifat independen seperti Bank Indonesia (Bl), sehingga OJK tak lagi dapat diintervensi oleh pihak manapun termasuk pemerintah. Bursa Efek Indonesia (BEI) tergolong salah satu bursa yang kinerjanya terbaik di Asia Pasifik pada masa krisis global 2008. Namun sayang, partisipasi masyarakat untuk berinvestasi dan minat perusahaan untuk mencari dana di Pasar Modal Indonesia masih tergolong rendah. Banyak kalangan menganggap pasar modal sebagai barang mewah yang hanya layak bagi perusahaan besar dan investor besar. Buku ini tergolong unik karena tidak hanya mengupas Pasar Modal Indonesia dari aspek hukum bisnis, tetapi juga dilengkapi tip bijak berinvestasi di pasar modal, serta kisah sukses bisnis di pasar modal. Para pakar dan akademisi juga dimudahkan sebab buku ini disertai bonus CD berisi peraturan lengkap pasar modal terbaru, daftar saham emiten, daftar perusahaan efek, dan data penting lainnya. Pembaca diajak mengenal berbagai instrumen pasar modal seperti saham, obligasi, reksa dana, produk derivatif (warrant, option, futures, right),DIRE, EBA dan instrumen syariah. Buku yang disajikan secara lengkap dan sistematis ini sangat cocok dibaca berbagai kalangan seperti: dosen, mahasiswa, pakar, pengusaha, calon investor, investor pemula, manajer investasi, konsultan bisnis dan hukum, notaris, penilai, akuntan, pengacara, pelaku pasar modal, UMKM, BUMN, BUMD, kaum profesional, bankir, pejabat Bl dan OJK, eksekutif perusahaan asuransi, dana pensiun, leasing, modal ventura, pegadaian, penjaminan, pemerintah, wakil rakyat, penegak hukum, dll.
Africa's Infrastructure Sep 21 2019 Sustainable infrastructure development is vital for Africa s prosperity. And now is the time to begin the transformation. This volume is the culmination of an unprecedented effort to document, analyze, and interpret the full extent of the challenge in developing Sub-Saharan Africa s infrastructure sectors. As a result, it represents the most comprehensive reference currently available on infrastructure in the region. The book covers the five main economic infrastructure sectors information and communication technology, irrigation, power, transport, and water and sanitation. 'Africa s Infrastructure: A Time for Transformation' reflects the collaboration of a wide array of African regional institutions and development partners under the auspices of the Infrastructure Consortium for Africa. It presents the findings of the Africa Infrastructure Country Diagnostic (AICD), a project launched following a commitment in 2005 by the international community (after the G8 summit at Gleneagles, Scotland) to scale up financial support for infrastructure development in Africa. The lack of reliable information in this area made it difficult to evaluate the success of past interventions, prioritize current allocations, and provide benchmarks for measuring future progress, hence the need for the AICD. Africa s infrastructure sectors lag well behind those of the rest of the world, and the gap is widening. Some of the main policy-relevant findings highlighted in the book include the following: infrastructure in the region is exceptionally expensive, with tariffs being many times higher than those found elsewhere. Inadequate and

expensive infrastructure is retarding growth by 2 percentage points each year. Solving the problem will cost over US$90 billion per year, which is more than twice what is being spent in Africa today. However, money alone is not the answer. Prudent policies, wise management, and sound maintenance can improve efficiency, thereby stretching the infrastructure dollar. There is the potential to recover an additional US$17 billion a year from within the existing infrastructure resource envelope simply by improving efficiency. For example, improved revenue collection and utility management could generate US$3.3 billion per year. Regional power trade could reduce annual costs by US$2 billion. And deregulating the trucking industry could reduce freight costs by one-half. So, raising more funds without also tackling inefficiencies would be like pouring water into a leaking bucket. Finally, the power sector and fragile states represent particular challenges. Even if every efficiency in every infrastructure sector could be captured, a substantial funding gap of $31 billion a year would remain. Nevertheless, the African people and economies cannot wait any longer. Now is the time to begin the transformation to sustainable development.
Equity Valuation and Analysis with EVal May 30 2020 While focusing on the underlying theories of financial analysis and valuation, this work aims to answer the question, "What is this company really worth?". It takes the view that sound forecasts of financial statements are the key input to a good valuation, and that other aspects of the valuation process are mechanical.
