Financial & Managerial Accounting Nov 06 2020

Give your students a solid foundation in core accounting concepts while helping learners develop a true appreciation for why accounting is important to business and a prosperous society. Warren/Reeve/Duchac's FINANCIAL AND MANAGERIAL ACCOUNTING, 14E clearly demonstrates how accounting is much more than simply data and black and white rules. Instead, students see how accounting provides key information used to make critical business decisions. A new chapter schema provides context for how each chapter's content fits into the big picture. The book focuses on why accounting is important and consistently reinforces connections to the big picture by connecting journal entries to the accounting equation. Fresh organization progresses from the simplest to the more complex topics with reorganized and fully integrated coverage of the new Revenue Recognition standard, reorganized coverage of adjustments, and

reorganized managerial accounting chapters

Amplifying the Curriculum      May 25 2022 This book presents an ambitious model for how educators can design high-quality, challenging, and supportive learning opportunities for English Learners and other students identified to be in need of language and literacy support. Starting with the premise that conceptual, analytic, and language practices develop simultaneously as students engage in disciplinary learning, the authors argue for instruction that amplifies—rather than simplifies—expectations, concepts, texts, and learning tasks. The authors offer clear guidance for designing lessons and units and provide examples that demonstrate the approach in various subject areas, including math, science, English, and social studies. This practical resource will guide teachers through the coherent design of tasks, lessons, and units of study that invite English Learners (and all students) to engage in productive, meaningful, and intellectually engaging activity. “This book offers the most detailed guide available for designing instruction for students categorized as ELLs. Theoretically grounded and informed by years of implementation and study, this work is without equal in the field. I recommend the

book enthusiastically as required reading in all teacher preparation programs." —Guadalupe Valdés, Bonnie Katz Tenenbaum Professor of Education, Stanford Graduate School of Education "Reflecting its title, this book is an amplification of what it means to provide the best learning opportunities for English Language learners. Drawing on classroom-based research, *Amplifying the Curriculum* offers many practical examples of intellectually engaging units and tasks. This innovative book belongs on the bookshelves of all teachers."

—Pauline Gibbons, UNSW Sydney "This timely book is a call to educators across the nation to integrate language, literacy, and disciplinary knowledge to improve the education of our new American students."

—Tatyana Kleyn, The City College of New York

*The Thread of Life* Jan 09 2021 In this distinguished book, first published in 1984, Richard Wollheim offers an original approach to the philosophical understanding of a person. Countering prevailing theories on the nature of persons, Wollheim submits an account of the mind dynamically conceived and proposes that we take as fundamental the process of living as a person. To illuminate this process, the author draws on psychoanalysis and literature, in particular the case studies of Freud and the writings of Proust. Copyright
