The Long Path to Wisdom Jun 14 2021 From the author of the internationally bestselling The Art of Hearing Heartbeats comes this charming collection of folktales that offer a window into Burma's fascinating history and culture. Since 1995 Jan-Philipp Sendker has visited Myanmar (Burma) dozens of times, and while doing research for his novels The Art of Hearing Heartbeats and A Well-Tempered Heart, he encountered numerous folktales and fables. These moving stories speak to the rich mythology of the diverse peoples of Burma, the spirituality of humankind, and the profound social impact of Buddhist thought. Some are so strange he couldn't classify them or identify a familiar moral, while others reminded him of the fairy tales of his childhood, except that here monkeys, tigers, elephants, and crocodiles inhabited the fantastic lands instead of hedgehogs, donkeys, or geese. Their morals resemble those of the Brothers Grimm or Hans Christian Andersen, illustrating how all cultures draw on a universal wisdom to create their myths. The Long Path to Wisdom's evocative stories run the gamut of

human emotions, from the familiar to the shocking, and are sure to delight fans of *The Art of Hearing Heartbeats* as well as those newly discovering the magic of Sendker's incandescent writing.

***The Oxford Handbook of Sound Art* May 02 2020 Sound art has long been resistant to its own definition. Emerging from a liminal space between movements of thought and practice in the twentieth century, sound art has often been described in terms of the things that it is understood to have left behind: a space between**

music, fine art, and performance. The Oxford Handbook of Sound Art surveys the practices, politics, and emerging frameworks of thought that now define this previously amorphous area of study. Throughout the Handbook, artists and thinkers explore the uses of sound in contemporary arts practice. Imbued with global perspectives, chapters are organized in six overarching themes of Space, Time, Things, Fabric, Senses and Relationality. Each theme represents a key area of development in the visual arts and music during the second half of the twentieth century from which sound art emerged. By offering a set of thematic frameworks through which to understand these themes, this Handbook situates constellations of disparate thought and practice into recognized centers of activity.

Captioning and Subtitling for d/Deaf and Hard of Hearing Audiences Jun 02 2020 Captioning and Subtitling for d/Deaf and Hard of Hearing Audiences is a comprehensive guide to the theory and practice of captioning and subtitling, a discipline that has evolved quickly in recent years. This guide is of a practical nature and contains examples and exercises at the end of each chapter. Some of the tasks stimulate reflection on the practice and reception, while others focus on particular captioning and SDH areas, such as paralinguistic features, music and sound effects. The

requirements of d/Deaf and hard of hearing audiences are analysed in detail and are accompanied by linguistic and technical considerations. These considerations, though shared with generic subtitling parameters, are discussed specifically with d/Deaf and hard of hearing audiences in mind. The reader will become familiar with the characteristics of d/Deaf and hard of hearing audiences, and the diversity - including cultural and linguistic differences - within this group of people. Based on first-hand experience in the field, the book also provides a step-by-step guide to making live performances accessible to d/Deaf and hard of hearing audiences. As well as exploring all linguistic and technical matters related to the creation of captions, aspects related to the overall set up of the captioned performance are discussed. The guide will be valuable reading to students of audiovisual translation at undergraduate and postgraduate level, to professional subtitlers and captioners, and to any organisation or venue that engages with d/Deaf and hard of hearing people.

Ways of Hearing Oct 19 2021 A writer-musician examines how the switch from analog to digital audio is changing our perceptions of time, space, love, money, and power. Our voices carry farther than ever before, thanks to digital media. But how are they being heard? In this book, Damon Krukowski examines how the switch from analog to digital audio is changing our perceptions of time, space, love, money, and power. In *Ways of Hearing*—modeled on *Ways of Seeing*, John Berger's influential 1972 book on visual culture—Krukowski offers readers a set of tools for critical listening in the digital age. Just as *Ways of Seeing* began as a BBC television series, *Ways of Hearing* is based on

a six-part podcast produced for the groundbreaking public radio podcast network Radiotopia. Inventive uses of text and design help bring the message beyond the range of earbuds. Each chapter of Ways of Hearing explores a different aspect of listening in the digital age: time, space, love, money, and power. Digital time, for example, is designed for machines. When we trade broadcast for podcast, or analog for digital in the recording studio, we give up the opportunity to perceive time together through our media. On the street, we experience public space privately, as our headphones allow us to avoid “ear contact” with the city. Heard on a cell phone, our loved ones' voices are compressed, stripped of context by digital technology. Music has been dematerialized, no longer an object to be bought and sold. With recommendation algorithms and playlists, digital corporations have created a media universe that adapts to us, eliminating the pleasures of brick-and-mortar browsing. Krukowski lays out a choice: do we want a world enriched by the messiness of noise, or one that strives toward the purity of signal only?

Differences in Developmental Art of Deaf Children and Hearing Children Sep 05 2020 The developmental art of deaf children and hearing children between the ages of 7 and 9 years were compared. Deafness was defined as having a hearing loss of 70 decibels in at least one ear.

Raters classified 24 drawings by deaf children and 29 drawings by hearing children according to a seven-item checklist based on Lowenfeld's stages of artistic development. The mean score of the drawings of hearing children was significantly higher than the mean score of the drawings of deaf children. The study supported Lowenfeld's idea of the schematic stage as normative for well-adjusted children aged 7 to 9 years. Results are discussed within the context of using culturally affirmative assessments to rate the drawings of deaf children.

Static Jedi Nov 19 2021 Overthrowing Your Empire of Noise Noise. It's everywhere. Televisions blaring out commercials. Opinions shouted over the radio. The Internet and its unlimited distractions. All of the tasks and choices that you know don't really matter. Always intensifying, becoming a deep part of our everyday cycle, our now hurried lives. But often God speaks to us in the stillness. When Elijah needed to hear from God, God sent a fire, a quake,

and a huge wind. But God wasn't in the fire. He wasn't in the quake. He wasn't in the wind. God was in the whisper. But the noise hides the whisper. Life is a dangerous place when we are stripped of our ability to hear God clearly. During His time here on earth Jesus Christ was a master of noise. He balanced time healing, teaching, and feeding the multitudes with regular periods alone with His Father. Static Jedi takes a look at the life of Jesus to help you master the noise and distractions and live in clarity.

***Go in Peace* Jan 22 2022 Helps develop the pastoral skills needed for hearing confessions. Although the sacramental Rite of Reconciliation is included in many Anglican prayer books, nothing has been written expressly Anglicans since the 1980s that focuses on the pastoral skills required for this ministry. This book combines and passes on the teaching, coaching, skill development, and accumulated pastoral wisdom that has not been widely accessible or well integrated into clergy training. Realistic transcripts and "verbatim" of sample confessions and counseling sessions involving a wide range of people makes this a unique ministry resource for most seminaries and theological colleges, plus clergy in general- including Lutheran pastors who use the rite of "Individual Confession and Absolution" in the Lutheran Book of Worship.**

The Art of Hearing Oct 31 2022 This is the first study of English sermons to focus on the sermon as heard by the listener rather than as uttered by the preacher. Throughout most of Christian history, the sermon has been the main vehicle for the transmission of religious ideas, particularly during the early modern period when many people could not read or write. Arnold Hunt assesses the effectiveness of the sermon as a means of spreading Protestant ideas, looking at the response from the audience and showing that the laity often interpreted sermons in ways that their clerical authors did not intend. It is also the first book to look in detail at the difference between the sermon as preached and the sermon as printed, showing that the sermons that survive in print are often a very inadequate guide to what was actually delivered from the pulpits of early modern England.

The Heart Remembers Apr 24 2022 The highly anticipated final book in the internationally

bestselling *The Art of Hearing Heartbeats* trilogy, a moving story about love's power to transcend distances and heal seemingly irreparable wounds. Twelve-year-old Ko Bo Bo lives with his uncle U Ba in Kalaw, a town in Burma. An unusually perceptive child, Bo Bo can read people's emotions in their eyes. This acute sensitivity only makes his unconventional home life more difficult: His father comes to visit him once a year, and he can hardly remember his mother, who, for unclear reasons, keeps herself away from her son. Everything changes when Bo Bo discovers the story of his parents' great love, which threatens to break down in the whirlwind of political events, and of his mother's mysterious sickness. Convinced that he can heal her and reunite their family, Bo Bo decides to set out in search of his parents. A gripping, heartwarming tale that takes the reader from Burma to New York and back, *The Heart Remembers* is a worthy conclusion to Jan-Philipp Sendker's beloved series.

Testing Hearing Nov 07 2020 Testing Hearing: The Making of Modern Aurality argues that the modern cultural practices of hearing and testing have emerged from a long interrelationship. Since the early nineteenth century, auditory test tools (whether organ pipes or electronic tone generators) and the results of hearing tests have fed back into instrument calibration, human training, architecture, and the creation of new musical sounds. Hearing tests received a further boost around 1900 as a result of injury compensation laws and state and professional

demands for aptitude testing in schools, conservatories, the military, and other fields. Applied at large scale, tests of seemingly small measure-of auditory acuity, of hearing range-helped redefine the modern concept of hearing as such. During the twentieth and twenty-first centuries, the epistemic function of hearing expanded. Hearing took on the dual role of test object and test instrument; in the latter case, human hearing became a gauge by which to evaluate or regulate materials, nonhuman organisms, equipment, and technological systems. This book considers both the testing of hearing and testing with hearing to explore the co-creation of modern epistemic and auditory cultures. The book's twelve contributors trace the design of ever more specific tests for the arts, education and communication, colonial and military applications, sociopolitical and industrial endeavors. Together, they demonstrate that testing as such became an enduring and wide-ranging cultural technique in the modern period, one that is situated between histories of scientific experimentation and many fields of application.

Investigating soundscapes that include a Puritan meetinghouse in colonial New England, the belfries of a French village at the close of the Old Regime, the court hall of Elizabeth I, and a Civil War battlefield, the essays vary just as widely in their topics, which include noise as a marker of social and cultural differences, the privileging of music as the sound of art, the persistence of Aristotelian ideas of sound into the seventeenth century, developments in sound related to medical practice, the advent of sound-recording technology, and noise pollution.

If you are one of the estimated 16 million Americans who have trouble hearing, consider The Art of Hearing. It is one of the first books to take a holistic approach toward healing less-than-optimum hearing. Methods include acupressure, the "psychology" of not hearing, affirmations,

natural foods, detoxification, and yoga. Rather than accept the terminal diagnosis offered by his doctor, and having found that a hearing aid and speech reading could not cure his own hearing loss, author Richard A. Bowen set out to research healing methods. This book is the result of his efforts and the record of his success. The simple techniques documented in The Art of Hearing cost next to nothing and can be done in the privacy of your home. Let them help you regain your birthright - the clarity and assurance of optimum hearing. Sixty-six pages, 14 illustrations.
