Set in a rural pub in western Ireland, "The weir" is a drama of interwoven stories as told by the locals about how they comfort and distract one another in the midst of desolation and grief. Buy now to get the main key ideas from Andy Weir's Project Hail Mary Out in the vast and endless darkness of space, after a thirteen-year journey, the last thing Ryland Grace expected was company. Project Hail Mary (2021) follows the brave and jaw-dropping expeditions of the astronaut as he attempts to save Earth from an alien life form that threatens to consume its only heat source: the sun. Grace not only finds his own courage, but he experiences the deep bond of friendship that stretches across all distances and rises beyond all differences. The spellbinding, beautifully observed hit from the master of suspenseful realism. A bar in a remote part of Ireland. The local lads are swapping spooky stories to impress a young woman recently moved to the area from Dublin. As the drink flows and the stories become increasingly frightening, it's clear that Valerie has something on her mind. She has a tale to tell that'll stop them all dead in their tracks. Conor McPherson's play *The Weir* combines superbly chilling tales of the supernatural with the hilarious banter of a small community in the heart of rural Ireland. *The Weir* was first performed at the Royal Court Theatre Upstairs at the Ambassadors Theatre on West Street, London, in July 1997. It transferred to the Duke of York's Theatre in the West End in February 1998, where it played for two years. The play went on to win the Olivier Award for Best New Play in 1999. McPherson also won the Evening Standard and Critics' Circle Awards for Most Promising Playwright. *The Weir* has since been performed very widely, including on Broadway in 1999. It received a major West End revival at the Donmar Warehouse in 2013, and transferred to the West End once again. It was voted one of the hundred most significant plays of the twentieth century in a poll conducted by the National Theatre in 2000. The bestselling author of *The*

Martian returns with an irresistible new near-future thriller—a heist story set on the moon. Jasmine Bashara never signed up to be a hero. She just wanted to get rich. Not crazy, eccentric-billionaire rich, like many of the visitors to her hometown of Artemis, humanity’s first and only lunar colony. Just rich enough to move out of her coffin-sized apartment and eat something better than flavored algae. Rich enough to pay off a debt she’s owed for a long time. So when a chance at a huge score finally comes her way, Jazz can’t say no. Sure, it requires her to graduate from small-time smuggler to full-on criminal mastermind. And it calls for a particular combination of cunning, technical skills, and large explosions—not to mention sheer brazen swagger. But Jazz has never run into a challenge her intellect can’t handle, and she figures she’s got the ‘swagger’ part down. The trouble is, engineering the perfect crime is just the start of Jazz’s problems. Because her little heist is about to land her in the middle of a conspiracy for control of Artemis itself. Trapped between competing forces, pursued by a killer and the law alike, even Jazz has to admit she’s in way over her head. She’ll have to hatch a truly spectacular scheme to have a chance at staying alive and saving her city. Jazz is no hero, but she is a very good criminal. That’ll have to do. Propelled by its heroine’s wisecracking voice, set in a city that’s at once stunningly imagined and intimately familiar, and brimming over with clever problem-solving and heist-y fun, Artemis is another irresistible brew of science, suspense, and humor from #1 bestselling author Andy Weir.

Alison Weir investigates one of the most enduring murder mysteries in English history -- the death of the lost Princes in the tower, nephews of Richard III, whose body has recently been discovered. The story of the death, in sinister circumstances, of the boy-king Edward V and his younger brother Richard, Duke of York, is one of the most fascinating murder mysteries in English history. It is a tale with profound moral and social consequences, rich in drama, intrigue, treason, scandal and violence. In this gripping book Alison Weir re-examines all the evidence -- including that against the Princes' uncle, Richard III, whose body was recently discovered beneath a Leicester car park. She brilliantly reconstructs the whole chain of events leading to their murder and reveals how, why and by whose order they died. Examines the king's remarkable influence on the laws, customs, culture, and politics of his kingdom and profiles the diverse courtiers, artists, and scholars who surrounded Henry VIII. Side weirs are widely used to divert or discharge flows from reservoirs, rivers, artificial channels and sewers. The hydraulic behaviour of this type of weir is complex and difficult to predict accurately using simple methods and the diversity of applications of side weirs has the potential to complicate guidance. This manual covers the fundamental hydraulic principles and discusses the practical design issues separately for each main structure type. #1 NEW YORK TIMES BESTSELLER • From the author of *The Martian*, a lone astronaut must save the earth from disaster in this “propulsive” (Entertainment Weekly), cinematic thriller full of suspense, humor, and fascinating science—in development as a major motion picture starring Ryan Gosling. Labyrinth spillways are almost as old as dam engineering. In spite of the fact that they appear as a very good technical-economical compromise, only 0.1% of large dams are equipped with such weirs. The main reason for this is that traditional labyrinth weirs usually cannot be installed on top of concrete gravity dams as they require a large foundat

The Martian: by Andy Weir | Conversation Starters A Brief Look Inside: Andy Weir's The Martian begins when astronaut Mark Watney finds himself stranded on Mars after an accident with an antenna caused his fellow crew to believe he had died, and they left Mars not knowing that he was still alive. The accident caused his bio-monitor computer to break, and he is left with only. The Hab, hydrazine, a generator, and potatoes to keep him alive. Watney, described as a "competent man," is not the type of person to give up so easily, however. He quickly finds a way to grow potatoes in The Hab using hydrazine to create water. Eventually, NASA realizes that Watney is still alive after seeing pictures of him on Mars. They scramble to find a way to safely return Watney home. **EVERY GOOD BOOK CONTAINS A WORLD FAR DEEPER** than the surface of its pages. Dam engineering is currently experiencing a strong revival of labyrinth oriented weirs. Labyrinth weirs, with a repetitive constructional character and an increased specific discharge capacity, are a very good technical-economical compromise. The concept of Piano Key Weir (PKW), with alveoli developed in overhangs from a reduced support area, enables the installation of non-linear crests at the top of concrete dams. As a result it eliminates the main drawback of classical labyrinth weirs, and enables their use to rehabilitate numerous existing dams. Since the first implementation of piano key weirs by Electricité de France on Goulours dam (France) in 2006, at least eight PKWs have been built in France, Vietnam and Switzerland. Their operation over a few years has already provided the first prototype data. Other projects are under study, construction or planning in varied countries. On another hand, research programs are under progress all over the world. Following a first edition in 2011, *Labyrinth and Piano Key Weirs II – PKW 2013* collects up-to-date contributions from people with various backgrounds, from engineers and researchers to academics. Summarizing the last developments on labyrinth oriented weirs, the book constitutes the state-of-the-art in research and application of piano key weir solutions, and will be invaluable to professionals and scientists interested in Dams Engineering. "What we see, and what we seem, are but a dream, a dream within a dream." Michael Bliss views Miranda's voice-over at the beginning of *Picnic at Hanging Rock* as so pivotal in explaining the films of Peter Weir that he borrows her words to create the title of his own study of the Australian filmmaker's work. Bliss views Weir as an artist whose values are rooted in the realm of the dream, of the unconscious. Surrealistic in technique, Weir avoids the pedestrian assurances of a material realm in favor of an irresolution that, while potentially frustrating, is nonetheless for him a more truthful representation of what he considers reality. For Weir, as for Plato, Bliss demonstrates, "empirical reality is nothing more than a shadow of what is real." Bliss also considers Weir's heritage. Australian cinema, Bliss explains, is characterized by melodramatic narratives born of a desire to see good and evil portrayed in striking opposition. Weir, for example, dramatizes the contradictory forces of light versus darkness, reason versus mystery, and rationality versus magic in such films as *Picnic at Hanging Rock* and *The Last Wave*. This melodramatic emphasis is evident as well in the polarized characterizations in such films as *Witness*, *Dead Poets Society*, and *The Truman Show*. Bliss also discusses Weir's use of another staple of Australian cinema? "mateship," the celebration of the bond between male companions. But by making self-knowledge dependent on action involving one's friends, Weir gives mateship a new meaning. Moreover, like other Australian filmmakers, Weir emphasizes the starkness of the Australian landscape, which functions either as a hazard or a deadly challenge, at least until American mythology caused him to see nature in a more positive light. Also prominent in Weir's films is an

Australian spirit of rebellion coupled with the Aussie ambivalence toward all aspects of British culture. To help explain Weir's films, Bliss looks to Freud and Jung, whom Weir has studied, and also to two other prominent purveyors of myth and archetype, Northrop Frye and Joseph Campbell. Virtually all Weir characters struggle toward a new mode of awareness, a psychological awareness based on archetypal truths. Many of his films involve archetypal journeys heading through conflict to spiritual unity. Weir's quest is to find out what we really know and how we know what we know. Please note: This is a companion version & not the original book. Sample Book Insights: #1 Feudal Europe was a military society dominated by men. Christianity governed the lives of everyone in feudal Europe, and the Pope's decrees were ultimate authority for all spiritual and moral matters. Women had little place in this society. #2 Eleanor of Aquitaine was heiress to one of the richest domains in mediaeval Europe. In the twelfth century, the county of Poitou and the duchies of Aquitaine and Gascony covered a vast region in the southwest of what is now France, encompassing all the land between the River Loire in the north and the Pyrenees in the south. #3 The region of Aquitaine was rich in resources, and its people were diverse and rich. It was a land of small walled cities, fortified keeps, moated castles, and wealthy monasteries. However, its rulers could not extend their power into the feudal wilderness beyond Poitiers. #4 Eleanor was the daughter of a noble race. She was the first of a number of strong-minded women in the ducal family tree. She married a man named William, who was the first of a number of strong-minded men in the ducal family tree. Summary: Drawing on contemporary concepts from transnational cinema studies, this book investigates Weir's entire three-decade career, paying particular attention to his journey from his native Sydney, with its largely auteur-driven national cinema, to the multimillion-dollar Hollywood film industry with its many genre conventions. Weir Farm National Historic Site is Connecticut's first national park and the only one in America dedicated to painting. No other book chronicles the property's rescue from residential development to its establishment as a park. The story is told through the only artistic photographic collection documenting Weir Farm National Historic Site, most of which has never been published before. Weir Farm was the home of Julian Alden Weir (1852-1919), a leading innovator of American Impressionism. The farm's landscape inspired countless masterpieces created by Weir, his famous painter-friends, two subsequent generations of artist-owners, and contemporary artists who continue to create at the park. In 2020, this iconic site will be featured on the US quarter. Since the first implementation by Electricité de France on the Goulours dam (France) in 2006, the Piano Key Weir has become a more and more applied solution to increase the discharge capacity of existing spillways. In parallel, several new large dam projects have been built with such a flood control structure, usually in combination with gates. Today, more than 25 Piano Key Weirs are in operation or under construction all over the world. More than 15 years of research and development have enabled detailed investigations of the hydraulic and structural behaviour of the Piano Key Weir complex structure and have provided more and more accurate design equations. Following the proceedings of the first two workshops held in Liege (Belgium – 2011) and Paris (France – 2013), Labyrinth and Piano Key Weirs III collects the contributions presented by people with varied background, from researchers to practitioners, at the 3rd International Workshop on Labyrinth and Piano Key Weirs - PKW 2017 (22-24 February 2017, Qui Nhon, Vietnam). The papers, reviewed and accepted by an International Scientific Committee, summarize the current state-of-the-art on Piano Key Weirs from a theoretical to a practical point of view, and present most of the main projects in operation or under construction. Labyrinth and Piano Key Weirs III is thus a reference for students, practitioners and researchers interested in Dams Engineering.
