Hear and Be Wise Jan 25 2022 Empowers the preacher to understand the role of wise leader to which he or she has been called, and to claim that role with conviction and joy. Pastors are called to an exciting ministry of proclamation and leadership. That excitement, however, often turns to demoralization and burnout as pastors become increasingly uncertain of what their role is supposed to be. Competing claims by the congregation, the denomination, and society about who and what the pastor is supposed to be breed confusion

and disappointment. Are they primarily managers? Therapists? Fundraisers? A way out of this confusion lies in reclaiming the biblical understanding of who the pastor is. One of the biblical roles within the pastoral vocation that often goes neglected is that of wise teacher or sage. Scripture presents as a model of pastoral leadership those who interpret the word and will of God for daily living. Especially in their preaching, pastors are called to help the congregation understand their place in God's world. In this book, Alyce McKenzie lays out the four qualities of the wise teacher—the bended knee, the listening heart, the cool head, and the courageous voice—and encourages pastors to make each of these integral to their ministry and vocation. She goes on to demonstrate that the sermon is the prime opportunity to function in the role of wise teacher. She offers strategies for applying biblical wisdom to all areas of everyday life. The strategies include: (1) Preaching that is as sensory as life is; using imagery, metaphor, simile, and story to connect with people's emotions as well as their intellect. (2) Preaching that uses first-person experiences without being narcissistic. (3) Preaching that teaches without boring. (4) Preaching on public, often controversial issues that minimizes defensiveness and maximizes dialogue.

Consistently formatted chapters review the development of each intervention,

Wise Church Mar 27 2022 "Wise Church is about rethinking church cultures so they become more of a wisdom culture. The topics vary as widely as church life itself: letter writing as pastoral care, the work life of congregants, evangelism, music, church economics, spiritual formation as the pursuit of wisdom, racial justice, marriage, learning how to teach like Jesus, gospeling like the apostles, and the wise use of social media. These studies are by pastors and scholars pondering wisdom, but more than that, they are pondering the life we all live in a wise way. We and our churches need wisdom, not simply because we live in an ever-changing world, but because the God we worship is himself

wise. Wise church cultures reflect the wisdom of God back into the world, a world looking for wisdom." With contributions from: Jeff Bannman Jeremy Berg Brandon Evans Pete Goodman David Johnston Ernest F. Ledbetter III Julie Murdock Joshua Little John M. Phelps Ivan Ramirez Bill D. Shiell

Data Wise in Action Feb 23 2022 What does it look like when a school uses data wisely? *Data Wise in Action*, a new companion and sequel to our bestselling *Data Wise*, tells the stories of eight very different schools following the *Data Wise* process of using assessment results to improve teaching and learning. *Data Wise in Action* highlights the leadership challenges schools face in each phase of the eight-step *Data Wise* cycle and illustrates how staff members use creativity and collaboration to overcome those challenges. *Data Wise in Action* builds on the work of leading faculty and graduate students at the Harvard Graduate School of Education, who joined with exemplary practitioners in 2005 to produce *Data Wise: A Step-by-Step Guide to Using Assessment Results to Improve Teaching and Learning*. Since its publication, *Data Wise* has been read by thousands of school leaders, many of whom have shared the book with colleagues and staff. The success of the original book has generated a new demand among school leaders: to hear real stories from schools that are implementing the *Data Wise* process. *Data Wise in Action* answers that need. Husserl Jul 07 2020 This second edition of David Woodruff Smith's stimulating introduction to *Husserl* has been fully updated and includes a new ninth chapter featuring contemporary issues confronting *Husserl's* phenomenology. It introduces the whole of Edmund *Husserl's* thought, demonstrating his influence on philosophy of mind and language, on ontology and epistemology, as well as ethical theory, and on philosophy of

logic, mathematics, and science. Starting with an overview of Husserl's life and works, and his place in twentieth-century philosophy and in Western philosophy as a whole, Smith introduces Husserl's conception of phenomenology, explaining Husserl's innovative theories of intentionality, objectivity, subjectivity, and intersubjectivity. In subsequent chapters Smith covers Husserl's logic, metaphysics, realism and transcendental idealism, epistemology, and (meta)ethics. Finally, the author assesses the significance and implications of Husserl's work for contemporary philosophy of mind and cognitive science. Also included is a timeline, glossary, and extensive suggestions for further reading, making Husserl, second edition, essential reading for anyone interested in phenomenology, twentieth-century philosophy, and the continuing influence of this eminent philosopher.

School-smart and Mother-wise Apr 15 2021 School-smart and Mother-wise illustrates how and why American education disadvantages working-class women when they are children and adults. In it we hear working-class women--black and white, rural and urban, southern and northern--recount their childhood experiences, describing the circumstances that led them to drop out of school. Now enrolled in adult education programs, they seek more than a diploma: respect, recognition, and a public identity. Drawing upon the life stories of these women, Wendy Luttrell sensitively describes and analyzes the politics and psychodynamics that shape working-class life, schooling, and identity. She examines the paradox of women's education, particularly the relationship between schooling and mothering, and offers practical suggestions for school reform.

The Well-Trained Mind: A Guide to Classical Education at Home (Fourth Edition)
Mar 15 2021 Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education—by doing it yourself. The Well-Trained Mind will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand, to be well-rounded and curious about learning. Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the

elementary school “grammar stage,” when the building blocks of information are absorbed through memorization and rules; the middle school “logic stage,” in which the student begins to think more analytically; and the high-school “rhetoric stage,” where the student learns to write and speak with force and originality. Using this theory as your model, you’ll be able to instruct your child—whether full-time or as a supplement to classroom education—in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well-Trained Mind* to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting-edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high-school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns. *The Well-Trained Mind* will give you the tools you’ll need to teach your child with confidence and success.

Lamyra Surya Das, American Lama and spiritual leader, whose inimitable light and lively universal teaching style has awakened the spirituality of thousands, now shares an enlightened approach to change and loss, dealing with difficult emotions such as fear, grief, and anger, and the role of crisis in uncovering our authentic selves. For many people, recent years have been characterized by profound change, whether it relates to financial upheaval, political shifts, or even massive losses of life to disease and violence. Even on the personal level each person must confront the curves life throws his or her way. Buddhism has a great deal to say about change and impermanence and how to meaningfully deal with it. In fact, change - whether on a large or small scale - provides our most important opportunity for learning about ourselves and the nature of reality. From this essential insight Lama Surya Das has crafted a fulfilling and important path to understanding and healing ourselves and finding peace.

Future Wise May 29 2022 How to teach big understandings and the ideas that matter most Everyone has an opinion about education, and teachers face pressures from Common Core content standards, high-stakes testing, and countless other directions. But how do we know what today's learners will really need to know in the future? *Future Wise: Educating Our Children for a Changing World* is a toolkit for approaching that question with new insight. There is no one answer to the question of what's worth teaching, but with the tools in this book, you'll be one step closer to constructing a curriculum that prepares students for whatever situations they might face in the future. K-12 teachers and administrators play a crucial role in building a thriving society. David Perkins, founding member and co-director of Project Zero at Harvard's Graduate School of Education, argues that curriculum is one of the most important elements of making students ready for the world of tomorrow. In *Future Wise*, you'll learn concepts, curriculum criteria, and techniques for prioritizing content so you can guide students toward the big understandings that matter. Understand how learners

use knowledge in life after graduation Learn strategies for teaching critical thinking and addressing big questions Identify top priorities when it comes to disciplines and content areas Gain curriculum design skills that make the most of learning across the years of education Future Wise presents a brand new framework for thinking about education. Curriculum can be one of the hardest things for teachers and administrators to change, but David Perkins shows that only by reimagining what we teach can we lead students down the road to functional knowledge. Future Wise is the practical guidebook you need to embark on this important quest.
