Not for Profit Jun 23 2022 A passionate defense of the humanities from one of today's foremost public intellectuals In this short and powerful book, celebrated philosopher Martha Nussbaum makes a passionate case for the importance of the liberal arts at all levels of education. Historically, the humanities have been central to education because they have been seen as essential for creating competent democratic citizens. But recently, Nussbaum argues, thinking about the aims of education has gone disturbingly awry in the United States and abroad. We increasingly treat education as though its primary goal were to teach students to be economically productive rather than to think critically and become knowledgeable, productive, and empathetic individuals. This shortsighted focus on profitable skills has eroded our ability to criticize authority, reduced our sympathy with the marginalized and different, and damaged our competence to deal with complex global problems. And the loss of these basic capacities jeopardizes the health of democracies and the hope of a decent world. In response to this dire situation, Nussbaum argues that we must resist efforts to reduce education to a tool of the gross national product. Rather, we must work to reconnect education to the humanities in order to give students the capacity to be true democratic citizens of their countries and the world. In a new preface, Nussbaum explores the current state of humanistic education globally and shows why the crisis of the humanities has far from abated. Translated into over twenty languages, Not for Profit draws on the stories of troubling—and hopeful—global educational developments. Nussbaum offers a manifesto that should be a rallying cry for anyone who cares about the deepest purposes of education.

To Profit Or Not to Profit Aug 25 2022 Nonprofit organizations are increasingly resembling private firms in a transformation bringing with it a shift in financial dependence from charitable donation to commercial sales activity. This book, first published in 1998, examines the reasons and consequences of the mimicry of private firms by fundraising nonprofits. User fees and revenue from 'ancillary' activities are mushrooming, with each having important side effects: pricing out of the market certain target groups; or distracting the nonprofit from its central mission. The authors focus first on issues that apply to nonprofits generally: the role of competition, analysis of nonprofit organization behavior, the effects of distribution goals and differential taxation of nonprofit and for-profit activity revenue, the effects of changes in donations on commercial activity, and conversions of nonprofits to for-profits. They then turn to specific industries: hospitals, universities, social service providers, zoos, museums, and public broadcasting. The book concludes with recommendations for research and for public policy toward nonprofits.

Comparative Corporate Governance of Non-Profit Organizations May 30 2020 The economic importance of the non-profit sector is growing rapidly in the USA and Europe. However, the law has not kept abreast with its development. The European Court of Justice has extended certain freedoms of the EC Treaty to non-profit organisations, and more case law is expected to follow in the near future, but the observations, theories, solutions and legal and non-legal rules in this field are manifold. The chances of harmonising the law on a European level are slim. Despite these differences, a common core of international corporate governance problems and regulatory solutions can be seen. This volume of essays brings together a variety of international experts from both corporate governance and governance of non-profit organisations to compare the two areas and explore the lessons that can be learned regarding comparative corporate governance for non-profit organisations.

Selected Aspects of Non-Profit Organisations Oct 27 2022 The volatility of the economy, political instability, and greater demands on not-for-profit organisations (non-profits) will require considerable rethinking and refocusing for many organisations. These days, non-profits evolve while attempting to regain financial ground, focusing more on workflow, fundraising, and staffing. The book highlights the upcoming challenges, among others funding instability, with a continuing shift in funding with more grantors focusing on funding mobilisation instead of intervention. Another challenge is clustering, which is where organisations are more likely to band together with others to share overhead costs, resources, and personnel. The non-profit sector will undergo essential integrations where the free flow of data and information will be crucial. Non-profits will continue to adjust their goals and priorities to meet changing trends. While the top priority was once acquiring new donors, that has now been eclipsed by the need for non-profits to engage the community and promote general brand awareness.

Now, it's akin to windsurfing—you must be nimble, prepared to maximize even the slightest breeze, and open to modifying your course at a moment's notice.
